

Steve Yates

Chair Resilience Association

Resilience Association

Our Identity – We are:

- A body which freely connects people, content and ideas from across the resilience spectrum with the common aim of championing and improving organizational resilience across our community by promoting open communication, sharing best practice and extending networks, knowledge and performance;
- An organization that provides an informed and influential voice on all aspects of resilience, with the association being open to all interested parties;
- A hub, bringing together ideas, information and resources from the many organizations and experts that support and promote resilience;
- A community where its website (www.resilienceassociation.org) is regularly updated with a source of materials for education, research and development, reviewing industry papers on this subject matter and offering an even playing field in a non-competitive environment;

Resilience Association

Our Vision

We want to become a place to engage in lively discussion about development of the science and the latest techniques of resilience, and in the broadest sense a place to seek advice and share ideas with other resilience networks, being a place to explore formal and informal career development as a place to consider opportunities and work placements in industry.

Our Mission

We will convert our vision into Reality through our Mission, through which we will provide resources for:

- Full time resilience professionals;
- Those for whom resilience is a part of their wider role;
- Anyone considering resilience as a career;
- Industry organizations and players with many years' experience;

Our Strategic Goal

We want to establish a Resilience Association (www.resilienceassociation.org) that will reach out to the wider resilience community to provide a platform / hub / forum for the transfer of knowledge and collaboration, with support provided by likeminded Corporate Partner organizations and its Members.

The initial membership of RA comprises of those working in:

- Organizational Resilience;
- Operational Resilience;
- Business Continuity Management;
- Information Security Management;
- Crisis Management;
- Emergency Planning;
- Disaster Recovery;
- Risk Management;
- Operational Risk;
- Health & Safety;
- Facilities Management;
- Fraud & Investigations;
- Physical Security;
- Operational Audit;

Special Interest Groups (SIG's) are being established:

- Women In Resilience Exchange (WIRE);
- Young Resilience Professionals Exchange (YRPE);
- Supply Chain Management;
- Value of BCM & IT;
- Security & Personal Protection;
- Decontamination & Salvage;
- Communications;
