Welcome!

Canva is EVERYWHERE these days and having even basic Canva skills is becoming an incredibly useful, marketable, and dare I say, essential skill!

Canva is a user-friendly design website that allows you to easily design almost anything, from party invites and journal pages, to social media posts and graphics, to full ebooks and workbooks.

Mastering the basics of Canva means that not only can you modify, edit and adapt purchased templates to your liking, but you might even find yourself developing your own products, documents and graphics in Canva yourself - whether it's social media posts and a logo for your business, or whole products that you can sell and profit from yourself.

Even many workplaces are using Canva now, making it a crucial tool to add to your toolbox.

Canva is PACKED with tools but don't get overwhelmed if you're new to the software. Take it step by step, explore and play, and don't be afraid to harness other people's hard work by purchasing templates, especially while you're learning.

I hope this overview of the essentials in Canva will empower you to harness this incredibly useful tool!

**GETTING
STARTED[®]**

QUICK & EASY CANVA ESSENTIALS

GETTING STARTED

MAKE A FREE CANVA ACCOUNT

It is easy and FREE to make a Canva account!

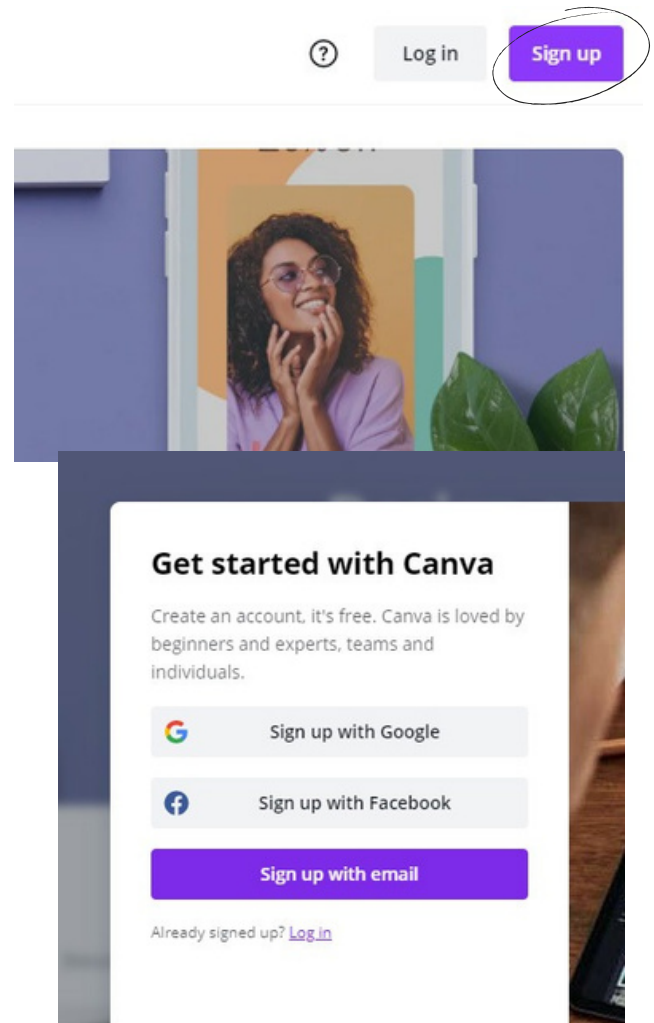

Just head to www.canva.com and choose the “sign up” button in the top right corner.

Choose your sign up method and complete the simple process.

Now you have access to this incredibly powerful yet user friendly design tool.

You can do a lot with a free account! To learn more about the difference between Free and Pro accounts, head to page XX of this guide.

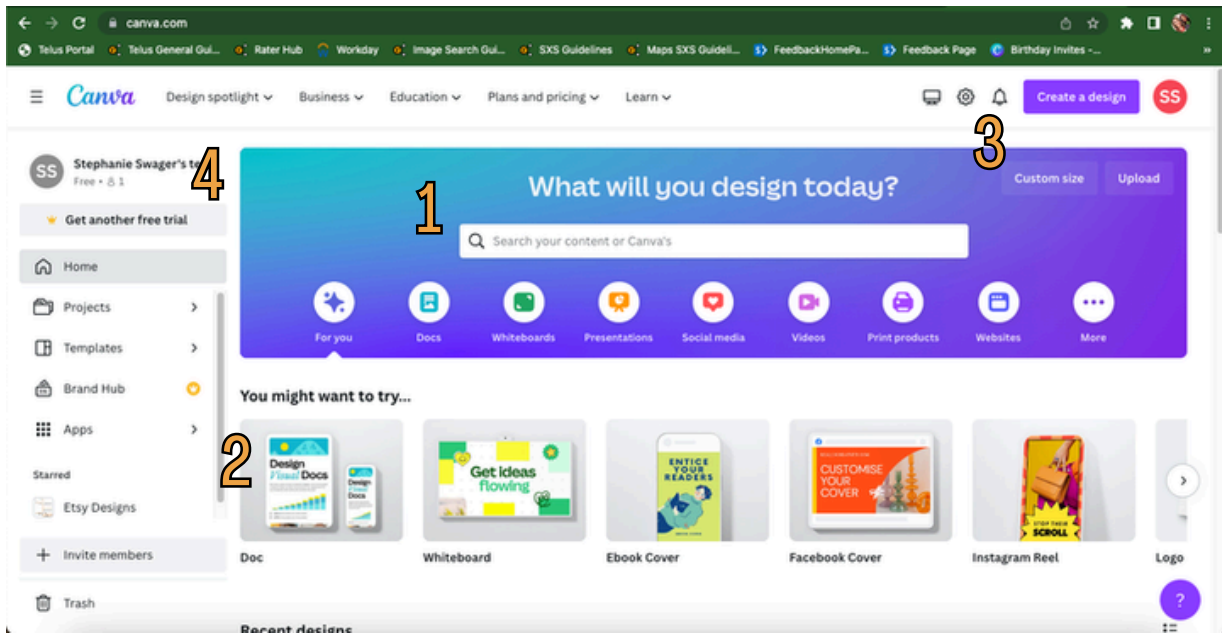

Now let’s get familiar with the interface!

QUICK & EASY CANVA ESSENTIALS

GETTING STARTED

THE LANDING PAGE

First, you'll be greeted by a user-friendly workspace consisting of a toolbar, canvas area, and a sidebar.

1. The **tool bar** is the easiest way to search for a template! This is also where you can easily search projects you have already created.
2. Below you will see the **canvas area**. This is where there are categories of templates laid out for easy access. Once you have begun creating your own projects, you will also see your most recent work below.
3. The **custom size button** makes it a breeze to create a design that is the exact specifications you are needing. Whether is a simple letter size or a big poster, just enter the dimensions and it will create a blank document ready for you! There are also pre-determined sizes available.
4. To the left you will see the **side bar**. You can access your designs, templates, pro-account if you join, and any "folders" you create. These folders are a great way to keep your designs organized by category. If the side bar feels overwhelming or distracting, simply hit the three lines in the top left corner to minimize it!

GETTING STARTED

LOADING A TEMPLATE YOU'VE PURCHASED

Make sure you are logged in to Canva.

Open the link provided with your template purchase.

A screen previewing the template will display (as per image on the right).

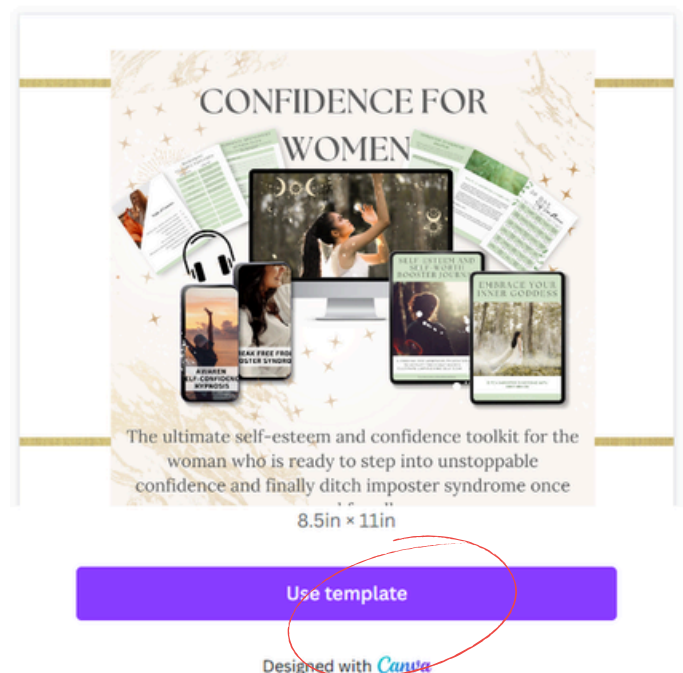

Click 'use template'.

The template will open in Canva, ready for you to edit.

You can make a copy of the template to preserve the original - once your template is opened, just head up to "File" at the top left and choose "Make a copy" from the menu.

Now the template is yours to do as you wish with! You can change colours, fonts, add or remove text, images, pages and more.

THE PROJECT WORKSPACE

1.Zoom- This slider at the bottom right of the screen will help you simply zoom in and out. This will ensure that you get a close up view of your design as well as a full page to see your overall design. There is also a slider right above that allows you to slide the page left to right.

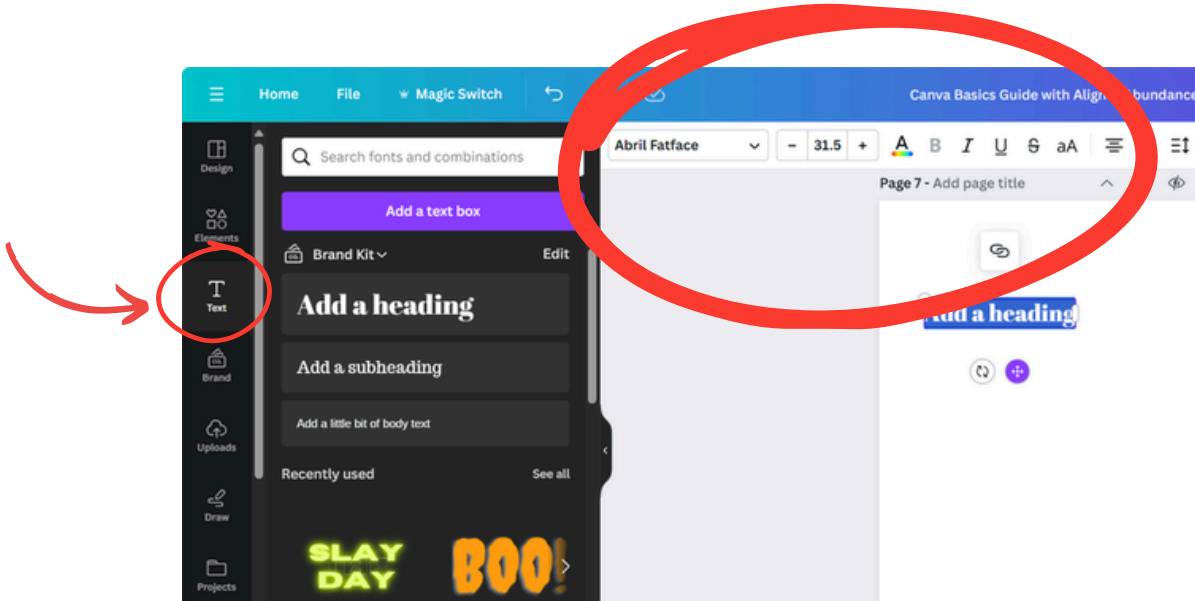

2.Grid View- The small arrow in the bottom center or four square icon in the bottom right allows you to navigate multipage designs quickly. Simply click the icon then select the page you want to work on and it will take you straight there! And if you are wanting to see your design full screen, the double arrow icon to the right will do so.

3.Side Bar- This side bar is possibly the most essential tool in Canva. It is where you add elements, text, backgrounds, and even upload images of your own. By clicking the icon of the action you wish to perform, it will take you to that category. In each section you are able to easily search Canva's library! To minimize the side bar to better see your design, simply click the small arrow on the right. Then click the side bar to open it back up again.

WORKING WITH TEXT

Adding text to a design is simple! The text button in the side bar makes it easy to add a text box, heading, subheading, and body text. Just select a text option (or text box) and type away! Once you have your text written out, use the tool bar at the top of the page to select a font, size, and color. Add multiple text boxes for different font styles to create a look you love. They also offer a variety of text designs that are pre-made!

WORKING WITH TEXT

ADDING TEXT

Starting with text in Canva is as straightforward as clicking the "Text" tab on the sidebar. Or simply hit the "T" key.

FONT SELECTION

Fonts carry personality; they can be formal, casual, playful, or severe. Canva offers a wide range of fonts under the "Font" dropdown when you've selected your text. If you've got particular brand fonts, you can also upload those. Experiment until you find the font that nails your message.

TEXT ALIGNMENT

You're not just stuck slapping your text in the center of your design. Use the text alignment options to shift your text to the left, center, or right of its text box. This seemingly minor adjustment can make a significant difference in how balanced your final design looks and feels.

TEXT EFFECTS (BOLD, ITALIC, UNDERLINE)

Text effects are like the spice rack of your design kitchen. A little goes a long way. The "Effects" button reveals several ways to emphasize your text, including bolding, italicizing, and underlining. Use these sparingly to highlight key points or create contrast.

LINE SPACING AND LETTER SPACING

Ever feel like your text is too squished or too stretched out? That's where line and letter spacing comes in handy. Adjust the space between lines or individual letters by selecting your text and using the "Spacing" option. Perfect for when you want your text to breathe or snug up for a cozy feel.

COLOURS

Colours are more than just decorative elements; they breathe life into designs, set the tone, and evoke emotions. Canva understands the power of colour, providing users with an extensive palette and tools to ensure that your design radiates exactly the vibe you envision. This guide will illuminate the process of colour selection and application in Canva, from basic choices to advanced combinations.

NAVIGATING CANVA'S COLOUR PALETTE:

- To start, click on any design element (text, shape, background, etc.). A colour circle icon will appear in the toolbar.
- Clicking on the icon will unveil Canva's default colour palette. Here, you'll find a myriad of shades perfect for any design.

CREATING CUSTOM COLOURS:

- Want a specific shade? No problem! Click on the "+" symbol in the colour menu.
- You can now either use the colour picker to select a shade or input a hex code if you have one. Once chosen, your custom colour is saved to the palette for future designs.

USING COLOUR HARMONIES:

- Canva often suggests complementary colours based on the ones you've already chosen. These harmonious suggestions can aid in creating a visually appealing design.

APPLYING GRADIENT EFFECTS:

- Some elements in Canva support gradient colours. If available, you'll see the gradient option next to solid colours. Select it and then choose two colours to create a gradient effect.

THE COLOUR WHEEL AND COMBINATIONS:

- For those seeking advanced colour coordination, navigate to the 'colours' tab on the left panel. Here, you'll find the colour wheel tool, which helps in selecting analogous, complementary, or triadic colour schemes for a harmonious design.

APPLYING COLOURS TO MULTIPLE ELEMENTS:

- If you wish to apply a colour to multiple elements simultaneously, simply select all the desired elements (by holding down the Shift key) and then choose a colour from the palette.

USING BRAND COLOURS:

- For those with Canva Pro accounts, you can set specific brand colours that remain consistent across all your designs. This is immensely helpful for businesses or individual brands wanting to maintain a consistent visual identity.

WORKING WITH PHOTOS

Uploading your own

It's easy to upload your own images to use in your Canva design.

Simply select "Uploads" in the left toolbar, click on "upload media" and you'll be able to browse your computer (or phone! Canva also has a very functional app) and find your images to upload.

The images you upload will stay in this uploads area to access any time, in any design.

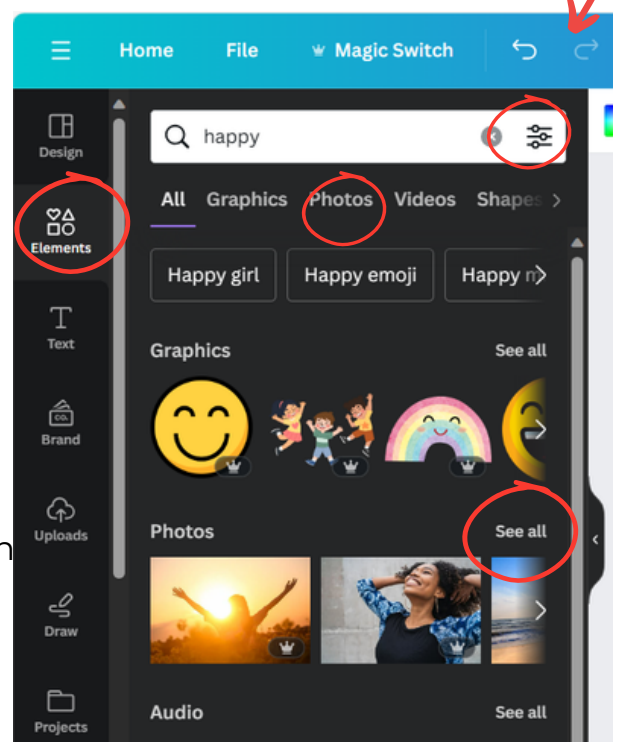

Using stock images

If you don't have your own images, you can select from Canva's extensive stock library. Simply select the "Elements" tab and start a search for the type of photo you'd like. Then you can click into the photos area to see more.

Once you have a photo you like, simply click on it to add it to your design, or drag it over.

Remember, anything you see with the crown icon is only available to Pro members. You can filter to only see Free results using the little hamburger menu to the right of the search bar.

Click here to filter results, for example to only show Free elements.

TIPS & TRICKS[®]

USE THE "TIDY UP" FEATURE TO ALIGN

from this  **to this!**

This works with any shapes, lines, images, etc. and aligns the objects both vertically and horizontally. Great for notes lines! Here's how:

Select all of the objects at once

From the top toolbar, click on "Position"

Click the "Tidy up" feature and you are done!

CREATE DIMENSION BY PUTTING TEXT BEHIND IMAGES

from this → to this!

Text on top of the house

Text behind the house

Place an image on your page

Select the image and duplicate it (hit command + D)

Select the top image only and hit "Edit photo" in the top toolbar

Select BG remover to remove the background (the sky in this example)

Now type your text (it will still be on top of both images).

Quick tip: Hit "T" for a text box

With your text selected, hit Position and move it Backward until it is between the two images. Make sure both images are placed in exactly the same place!

MAKE TEXT POP WITH A TRANSPARENT GRADIENT

from this  **to this!**

If your text is hard to read over an image, use a gradient shape over it and convert one end colour to 0% transparency (clear).
Step-by-step instructions on the next page.

MAKE TEXT POP WITH A TRANSPARENT GRADIENT

Create a rectangle
(type the letter "r")

In the top toolbar, click
on the colour square

Select a gradient from the
bottom of the menu
(pick any one)

While clicked on the
gradient shape, click the
colour square again

Hover over the colour to
see the purple slider bars,
then click on the sliders

This menu will pop out.

Click on one of the colours
(black shown)

Slide the transparency bar
all the way left to 0%
(shown here at 10%)

The colours should appear like
this and you can place your
shape over your photo.

EYEDROPPER TIP! In Canva Pro, you can use the eyedropper tool to select a colour from something else (your image, a graphic, a colour of a shape, etc.)
