THE GREAT TARMAC'S HALF-ASKED HISTORY

As the Europeans pushed westward, and with every subsequent treaty, the Native Tribes were relocated as well. In Ontario the Mohawks (derived from what the Dutch called them) were prevalent and were known as “The People of the Flint” as the Wyndotte/Windat Tribe – “the People of the Peninsular” – came to settle in Michigan and northern Ohio. An offshoot of the Ontario clan were the Ottawa (Odawa, “traders”) who traveled extensively throughout the woodlands.

Legend has it that many Moons ago the matriarch of the Odawa tribe, a tall robust squaw named White Buffalo Woman got into a game of chance with several Chiefs of the tribe. She used her wile and her wits and emerged from the Log House wearing a top hat, two buffalo robes and a horde of wampum/jewelry as she clenched the Chief's ornate and prized Peace Pipe between her smile. The other women looked at her with their mouths agape.

“Did you win *dat*?” they asked incredulously.

“And their Hunting Grounds,” she laughed.

And THAT’S how the Windats came to Upper Sandusky.
