

evil file no. 14 - promo - evilstare ,stare ampliphier/mic

Evil stare amplifier amplifies any instrument applied or as a microphone 🎤 .

to operate turn on with finger zip tone (on/off)

to apply instrument "imply" selected instrument to square with symbol (labeled input), then say activation word, the mechanism should ask you for confirmation then confirm /for microphone just say "mic " then say activation word, mechanism will issue choice, either hand mic or headphone mic (microphone will appear with holo-magic)

to hear amplifier look(or stare) into mild screen,the screen in the center of the appliance, between the speakers,then while staring into mild screen,listen for the sound produced by the amplifier,the audio receptor will catch on(audio will contunue)come from the speakers(aai gesture aux function is featured,just say to aai where to overlay audio output,ie, ezel box or other speakers).

the next square beneath the mild screen is the ampliphier reading,reading output is fairly intuitive controls(basically,just fiddle it a little).

the next square is the amplifier frequency monitor,same intuitive type of controls.

the last square is the 10key buttons to tune modes as desired.

you have received a free **eviltech™**
