

Etness is the next attribute useful with light, etness is the the state of something being known being said. An example of etness is when something has been caught, when by all indications it is guilty of what it is obviously doing, ei, bloody knife, caught redhanded. etness with magic would make something objectified show with emblem, a signal or message that would signify exactly what about it that was being pointed to.

Etness is done with private and sense. private, to clearly explain the characteristic, then sense, to say simply to part pertinent.

An example of etness: done en es- aim this spell on something that you know what it is or what it is for, then look at it, you should see that there is an emanation or sign on it saying what you know it is, making it understood as what it is, if it says different

than from what you know it is, look to find out if it is different or find out if you knew right.

Etness spells will begin with words like done, or say, or en.

done en on

say es ei

en o la

all these spells will make these things known as they are. If you were going to make etness onto something or someone that was being concealed or hiding something you would direct the spell as you intended what to specify, like what that person is doing to deter-en on an ot-you would know what that person was doing and you would want to point it out (indicate), you would do that then with that spell. Shipping sinners usually do

things to bother and deter at actions things and people do in order to make things not work well, or to cause trouble and despair. they usually do so in covert, not being seen. it would be important to make them being seen then, so better handling of right and justice could conduct. Etness would be done when it would be understood that it would important to make actions and conditions known, to people, nature, and the elements.

Etness spells

etness to doing

-en an on-doing being seen

-say al en-doing you would say as you see

-no en ah-doing you would say

is(wrong, right, strange, etc)

etness to conduct

-en done o-if it is done,then what could happen

-say es mass-if it or they do what was being indicated upon(when they do what)

-done en et-when something is that something or someone does(pointing out occurrence,saying the culprit)

etness to state

-en done en on-when something has been done to something(saying what happened to it,and by what)

-en done et-when something is being done(what something or someone was intending at someone or something)

-en done es-when something is being done as you know what was being done(flag spell)

With etness it important to know clearly what is or being done,as in order to point it out,it would not be good to not know or

comprehend what the status of things are when pointing them out, but etness should prove useful when deterring sinner (crimes to nature).

The next attribute is nice, to bring things up to where they are used or able to be procured. This lesson will continue on the next file

Donations when possible are appreciated, and will expediate the process of emitting lessons (really, I can put them out a lot quicker, I still have a bit cover!)
