

Dear Dr Jaya Kaishnan,

We are very grateful for having been led to <sup>you</sup> have this heart surgery carried out without blood transfusion.

Our first meeting with you filled confidence in us. It made the prior days of the surgery very less stressful.

Even post surgery period at the ICU was not very painful because of the caring and encouraging nurses. The stay at the hospital was a pleasant experience as the room, its services and the entire set of people that worked during the day and night shifts were very helpful.

We thank you and your team for your support and the medical treatment chosen to help us revive health and maintain our clean conscience in the matter of blood.

We wish you success always,

With deep appreciation,

Gregory Alphonso

and family 25/03/23

Thanks

A
