AGE MANAGEMENT & AESTHETICS

LOOKING YOUNGER LONGER

Optimized 90 day program

- Skin Elasticity
- Cellular Renewal
- Muscle Support
- 12 Key Optimization Indicators
- System support indicators
- Gut & Intestinal Support Indicators
- Liver Metabolism Support Indicators
- Resistance indicators
- Environment indicators
- Food Additive Restrictions
- Foods to eat

Plan for:

This plan created by:

None of these statements have been evaluated by the FDA. This product is not intended to diagnose, treat, cure or prevent any disease or condition. It is intended to provide nutritional food information. The digital process does not provide reproducible indicators as it reflects the changing epigenetic environment at the quantum biological level. Nutritional Food Optimization should only be considered every 90 days. It is NOT recommended that a new Nutritional Food Plan be created within this period.

AGE MANAGEMENT & AESTHETICS PLAN

AN INTRODUCTION FROM MEDICAL PROFESSIONALS

"The Age Management Plan" is a simple, enjoyable and proven system of aligning your environment to optimize your physical, mental and emotional potential.

Your environment controls up to 98% of the way in which many of your genes express themselves. This means the way in which they act physically and control virtually all aspects of your metabolism and your life.

Currently, you and almost everyone else on the planet, are operating below your potential due to the effects of the environment. Processed foods, low nutrient intake, toxins and chemicals, electromagnetic fields and extremely low frequency influences are responsible for a breakdown in the body's normal day to day functions.

These functions are basic processes which are crucial to the way in which your physical body expresses. Firstly, the quality of new cells your body creates to repair itself and secondly, the nervous system and enzyme processes which are responsible for all bodily processes.

As the environment controls gene expression, it is the most crucial aspect of producing optimized cells, which in turn produce optimized tissues, which in turn produce optimized organs and finally systems and the entire organism – or optimized you!

Your enzyme processes are entirely reliant on a constant supply of vitamins, minerals and amino acids for them to operate. Your nervous system is strongly affected by toxins, additives and EMF/ELF. All of these factors can contribute to a breakdown in metabolic function.

To achieve your potential, you need to ensure that these processes are working at their optimized levels. Anything less than optimum and you feel the effects in a loss of function, which can be reflected in low energy, poor sleep, weak immune system, poor concentration, irritability, general aches and pain, slow recovery, susceptibility to injury and more. If left in a sub-optimal state for too long, then this can eventually lead to chronic issues.

The Age Management program is designed to help identify many of the common environmental influences that could be leading to a less-than-optimum output of your genes, enzymes and metabolic function. Also, to provide you with a 90-Day Plan for dealing with these issues and optimizing yourself through dietary, nutritional and supplement programs.

Optimization is an awakening process, whereby you become aware of the effects of your environment on your body, you feel the positive choices that you make and you become responsible for your own destiny.

Alfons Meyer, medical doctor

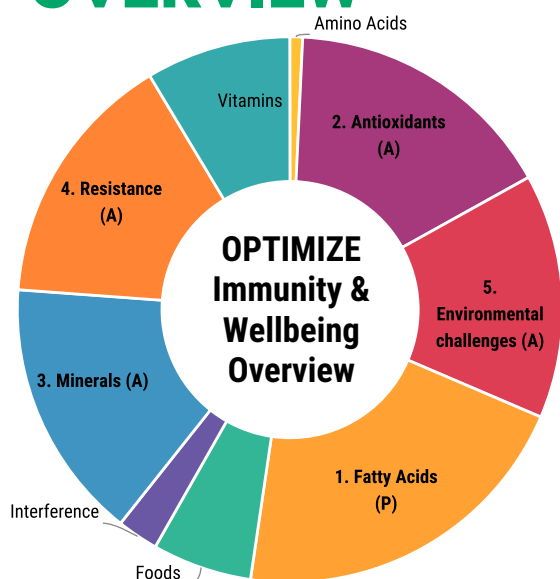

Marcus Stanton, medical doctor

THIS REPORT IS ONLY VALID FOR THE NEXT 90-DAYS

Your next Optimize Report date is: 20/04/2023
Book today with your provider at: ReviveYourCells
Phone: PRIVATE NUMBER
Email: hello@ReviveYourCells.com

With any regime change that supports wellness or performance, it is most beneficial to follow a course of reports. Being optimized means staying in alignment with your epigenetic environment and adjusting your food and nutrient intake to meet your changing needs over time. We recommend that you do this every 90-days as this is a natural cycle the body follows. Don't miss out and book your next report now based on the above date.

KEY OPTIMIZATION OVERVIEW

Systems Support Summary

Gut & Intestinal
 Emotions
 Musculoskeletal
 Circulatory System

For full indicators see page 4.

Foods Restrictions Summary

Dates	Pork
Lentils	Brazil Nuts
Yams	Strawberry
Flounder	Spelt
Broccoli	Beer

For full food restriction indicators see tables on pages 9 and 21

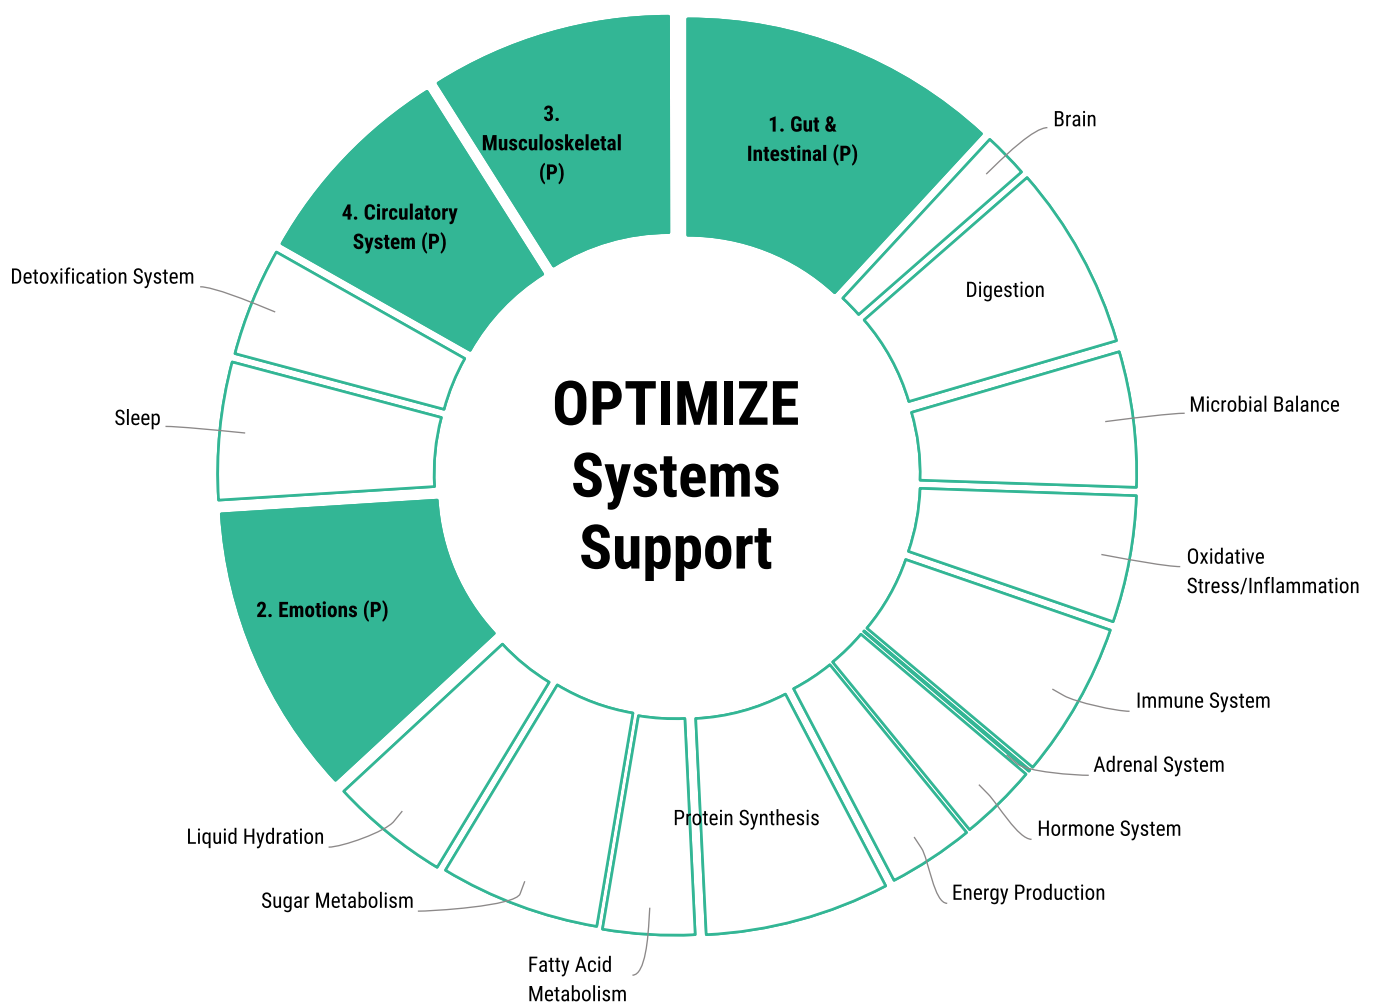

YOUR OPTIMIZATION PLAN CAN BE FOUND ON PAGES 18, 19 AND 20

Category	Indicator	Information
Fatty Acids	Eicosapentaenoic Acid - 3 (EPA). Docosahexaenoic Acid - 3 (DHA)	For full results see the chart on page 15. For food sources refer to page 19.
Antioxidants	Phytoestrogen. Flavonoids. Sulforaphane	For full results see the chart on page 17. For food sources refer to page 19.
Minerals	Potassium. Molybdenum. Sulfur. Manganese	For full results see the chart on page 14. For food sources refer to page 19.
Resistance	Fungus. Parasite. Virus	For full results see the chart on page 12. For food sources refer to page 20.
Environmental challenges	Toxic Metals	
Foods	Please refer to the foods tables on page 18 and 19 of the plan.	For full results see the chart on page 9.
Additives to Avoid	Please refer to the food additives table and link on page 21.	For full results see the chart on page 21.

The Key Indicators Chart

The larger the segment in the chart, the higher the epigenetic relevancy indicator, which means the item is more of a **Priority** for you to address. Lesser items are marked **Advisory** or **Consider** and no indication means low relevance. These are indicators of underlying issues which you should consider addressing using the suggested nutritional food intake programs.

METABOLIC AGE SUPPORT INDICATORS

The above chart indicates which areas may require nutritional support by cross referencing the other chart data and comparing the total number of relevant support factors indicated for each area. This is an indicator of a support requirement only and not a diagnosis of any physical malfunction within any specific area. If you are concerned about the physical function of any of your systems processes, you should seek the help of a qualified health professional.

CELLULAR DETOXIFICATION & DE-STRESSING

Cellular destressing and cleansing is a natural function of our molecular system. When we age or if we have neglected ourselves, this system slows down which makes it harder to **remove harmful toxins at the cellular level**.

Optimizing the performance of this process is crucial as it is reflected in the skin's elasticity and recovery.

Every human reacts differently to a variety of nutritional foods and has differing demands which impact our epigenetic cellular systems. We are also impacted by invisible environmental toxins which can be seen in the table below.

Vitamins Markers	Betaine	Inositol	Vitamin A1	0	67+ Total Value High Support
	Vitamin B1	Vitamin B3	Vitamin B5		
	Vitamin B6	Vitamin B12	Vitamin C		
	Vitamin D3	Vitamin E	Vitamin K1		
	Vitamin K2				
Minerals Markers	Calcium	Chromium	Copper	3	39-68 Total Value Moderate Support
	Iodine	Iron	Magnesium		
	Molybdenum	Selenium	Zinc		
Antioxidants Markers	Alpha Lipoic Acid	Anthocyanidins	Carotenoids	15	39-68 Total Value Moderate Support
	Co-Enzyme Q10	Flavonoids	Phytoestrogen		
	Polyphenols	Superoxide Dismutase	Sulforaphane		
Amino Acids	Cysteine	Histidine	Methionine	0	0-38 Total Value Maintenance Support
	Ornithine	Threonine	Arginine		
	Valine				
Fatty Acids Markers	Docosahexaenoic Acid - 3 (DHA)	Eicosapentaenoic Acid - 3 (EPA)		6	0-38 Total Value Maintenance Support
Environmental Stressors	Toxic Metals	Chemicals and Hydrocarbons	Radiation	5	
	Bacteria				
Total Value				29	

The above chart indicates which areas may require nutritional support by cross referencing the other chart data and comparing the total number of relevant support factors indicated for each area. This is an indicator of a support requirement only and not a diagnosis of any physical malfunction within any specific area. If you are concerned about the physical function of any of your systems processes, you should seek the help of a qualified health professional.

CELLULAR REJUVENATION

Feed your cells with the foods they need.

Cellular Support and renewal is a daily bodily function, which is maintained by your nutritional diet and life style both of which can be stressed by environmental influences such as toxins.

These are all key drivers of the cellular system and your physiology and vary according to our personal epigenetic environmental impacts and the nutritional food intake. Your skin has its own cellular renewal program where the epithelial cells regenerate from the epidermis deepest layer to replace those that form skin surface. This renewal function is supported by the diet we consume.

Vitamins Markers	Vitamin A1	Vitamin B1	Vitamin B2	0	69+ Total Value High Support
	Vitamin B3	Vitamin B5	Vitamin B6		
	Vitamin B9	Vitamin B12	Vitamin C		
	Vitamin D3	Vitamin E	Vitamin K2		
	Biotin	Inositol			
Minerals Markers	Iodine	Iron	Selenium	0	41-68 Total Value Moderate Support
	Zinc	Magnesium	Calcium		
Antioxidants Markers	Vitamin C	Vitamin E	Alpha Lipoic Acid	0	
	Co-Enzyme Q10				
Amino Acids	Arginine	Cysteine	Lysine	0	
	Methionine	Taurine			
Fatty Acids Markers	Alpha-Linolenic Acid - 3 (ALA)	Arachidonic Acid - 6 (AA)	Eicosapentaenoic Acid - 3 (EPA)	4	0-40 Total Value Maintenance Support
	Oleic Acid - 9	Gamma Linoleic Acid - 6 (GLA)			
Environmental Stressors	Radiation	Toxic Metals	Chemicals and Hydrocarbons	4	
	Electro Sensitivity OR Radiation	Bacteria	Moulds/Spores		
			Total Value	8	

The above chart indicates which areas may require nutritional support by cross referencing the other chart data and comparing the total number of relevant support factors indicated for each area. This is an indicator of a support requirement only and not a diagnosis of any physical malfunction within any specific area. If you are concerned about the physical function of any of your systems processes, you should seek the help of a qualified health professional.

MUSCLE & BALANCE OPTIMIZATION

Cell dehydration can have severe consequences for the intracellular protein structure and function of the muscles and the dermis of the skin. Moreover, water determines cell volume which acts as a positive metabolic signal.

Aging also leads to a progressive loss in muscle mass and strength which is why nutritional balance is required; exercise alone cannot provide adequate support.

Vitamins Markers	Vitamin B6	Vitamin B9	Vitamin C	0	49+ Total Value High Support
	Vitamin B3	Vitamin B12			
Minerals Markers	Zinc	Manganese	Copper	4	
	Selenium	Sodium	Calcium		
	Potassium	Chromium			
Antioxidants Markers	Co-Enzyme Q10			0	29-48 Total Value Moderate Support
Amino Acids	Leucine	Isoleucine	Valine	0	
	Glutamine	Threonine	Arginine		
	Phenylalanine	Carnitine	Taurine		
	Lysine	Tryptophan			
Fatty Acids Markers	Alpha-Linolenic Acid - 3 (ALA)	Docosahexaenoic Acid - 3 (DHA)	Eicosapentaenoic Acid - 3 (EPA)	5	0-28 Total Value Maintenance Support
			Total Value	9	

The above chart indicates which areas may require nutritional support by cross referencing the other chart data and comparing the total number of relevant support factors indicated for each area. This is an indicator of a support requirement only and not a diagnosis of any physical malfunction within any specific area. If you are concerned about the physical function of any of your systems processes, you should seek the help of a qualified health professional.

SKIN ELASTICITY OPTIMIZATION

Skin elasticity is directly linked to the aging process. Micronutrients support the skin's wellness function, which protects our bodies against environmental stressors including ultraviolet irradiation, chemical toxicity and bacterial infection.

A healthy balanced diet is required to maintain overall cellular skin renewal and an impaired nutritional diet can alter the structural integrity and biological function of skin.

Vitamins Markers	Vitamin A1	Vitamin B1	Vitamin B2	3	15+ Total Value High Support
	Vitamin B3	Vitamin B5	Vitamin B6		
	Vitamin B9	Vitamin B12	Vitamin C		
	Vitamin D3	Vitamin E	Vitamin K1		
	Vitamin K2	Biotin	Inositol		
Minerals Markers	Iodine	Iron	Selenium	0	8-14 Total Value Moderate Support
	Zinc	Magnesium	Calcium		
Antioxidants Markers	Vitamin C	Vitamin E	Alpha Lipoic Acid	0	
	Co-Enzyme Q10				
Fatty Acids Markers	Alpha-Linolenic Acid - 3 (ALA)	Arachidonic Acid - 6 (AA)	Eicosapentaenoic Acid - 3 (EPA)	1	
	Oleic Acid - 9	Gamma Linoleic Acid - 6 (GLA)			
Amino Acids	Arginine	Cysteine	Lysine	1	1-7 Total Value Maintenance Support
	Methionine	Taurine			
Environmental Stressors	Radiation	Toxic Metals	Chemicals and Hydrocarbons	1	
	EMF/ELFs	Bacteria	Moulds/Spores		
			Total Value	6	

FOOD RESTRICTIONS

See page 21 for further information

WARNING – THIS IS NOT A FOOD ALLERGY TEST.

The foods listed here should be restricted for the next 90-days only. **ALL KNOWN ALLERGIES** must continue to be avoided at all times.

ABOUT FOOD RESTRICTIONS

There are many different levels at which foods can effect a person from the severe to the very mild but all have the ability to affect the wellness processes.

There are foods which you could be eating which show NO physical signs and symptoms of being a problem but which are not supporting the body's needs as they take up more energy to digest than the body gets in return. This puts pressure on the entire system and these foods are best restricted in the short term and up to 90-days.

ENERGY FLOW

When we are struggling against the foods we ingest, the body will end up using energy from another source in the body to digest and liberate key nutrients. This process leads to a compensation process which will leave another function unable to complete properly and this does not support overall function. So, it is important not only to eat foods which can support the overall status of the body. But also to adjust for foods which might not be best supporting and maintaining normal functions in the short to medium term.

Foods Restrictions	
Dates	Pork
Lentils	Brazil Nuts
Yams	Strawberry
Flounder	Spelt
Broccoli	Beer

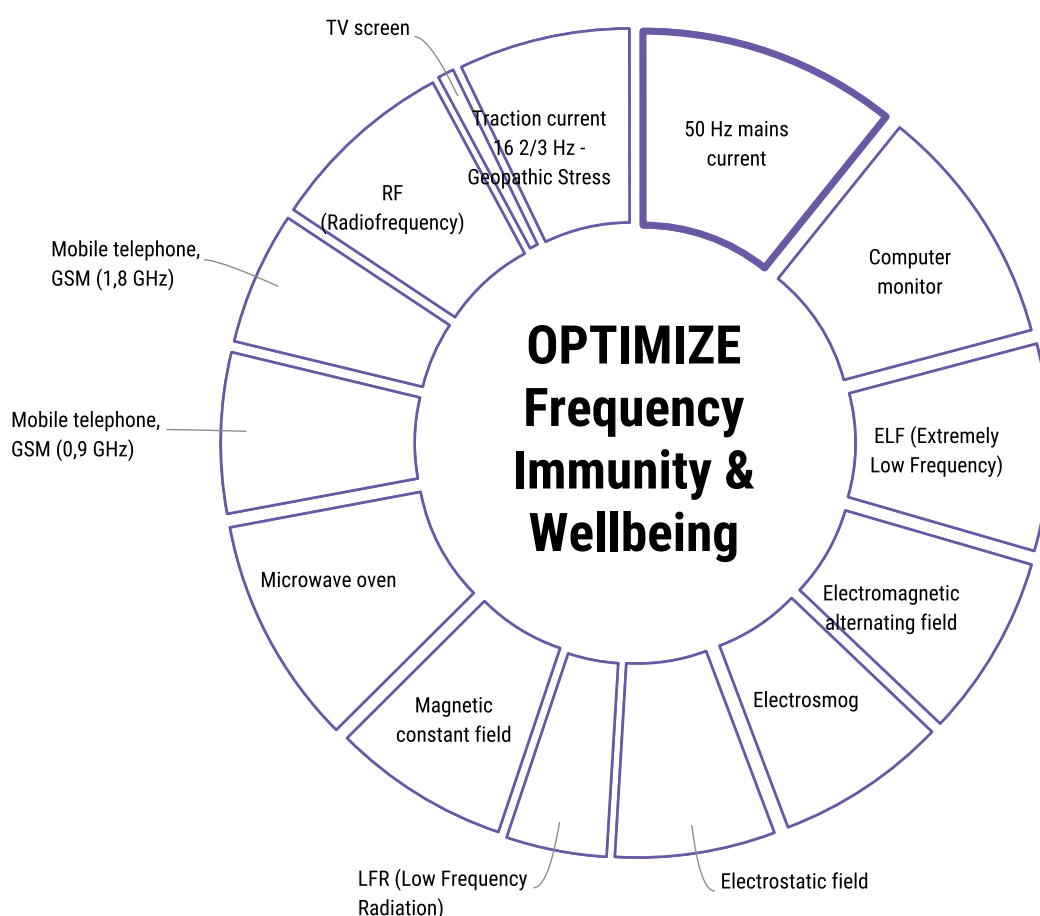

The food indicators list is from the epigenetic relevancy indicators and NOT a physical intolerance or allergy. Please continue to avoid foods that you know physically affect you. Please restrict these foods for a 90 day period.

Any indication in this report of an underlying food restriction does not relate to physical food Allergies. For allergy advice seek a medical professional. **If you know you are ALLERGIC to foods, you must always avoid them.** Please refer to Food Restrictions page.

FREQUENCY INTERFERENCE INDICATORS

Consider - Reduce Exposure

See page 22 for further information

Category Indicators Chart

The above chart provides you with an overview of the Frequency Interference indicators which are specific to you. If this category is marked with a (Priority, Advisory or Consider), then these are considered items which you might wish to address through your nutritional food regime.

An indication in the overview chart of any underlying issues and/or the matching of any symptoms on this page is not a physical diagnosis of deficiency or associated illness. Always seek professional health advice when making nutritional and dietary changes.

ENVIRONMENTAL CHALLENGE INDICATORS

Advisory - Reduce Load

See page 23 for further information

Category Indicator Chart

The above chart provides you with an overview of the Toxins indicators which are specific to you. If this category is marked with a (Priority, Advisory or Consider), then these are items which you might wish to address through your nutritional food regime.

An indication in the overview chart of any underlying issues and/or the matching of any symptoms on this page is not a physical diagnosis of deficiency or associated illness. Always seek professional health advice when making nutritional and dietary changes.

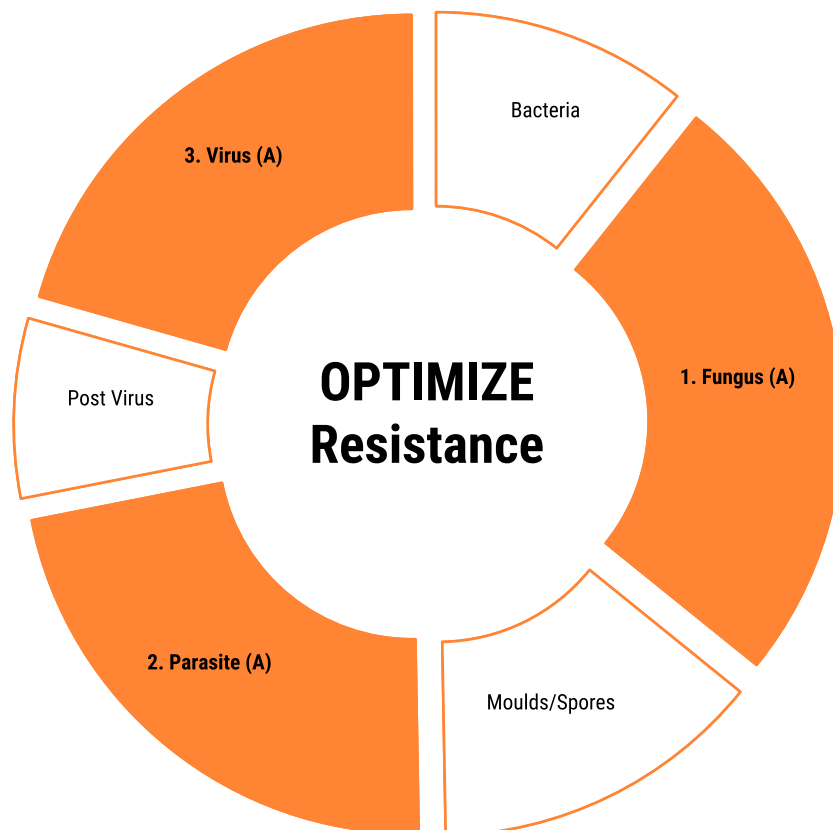

RESISTANCE INDICATORS

Advisory - Reduce Load

See page 24 for further information

AN INDICATOR OF VIRUS OR POST VIRUS DOES NOT SUGGEST THE PRESENCE OF A COVID CONNECTED VIRUS. If the report recipient may have been exposed to an individual who has contracted a COVID infection or is expressing symptoms of a COVID linked infection, it is recommended that they consider obtaining a separate COVID screening test.

Category Indicator Chart

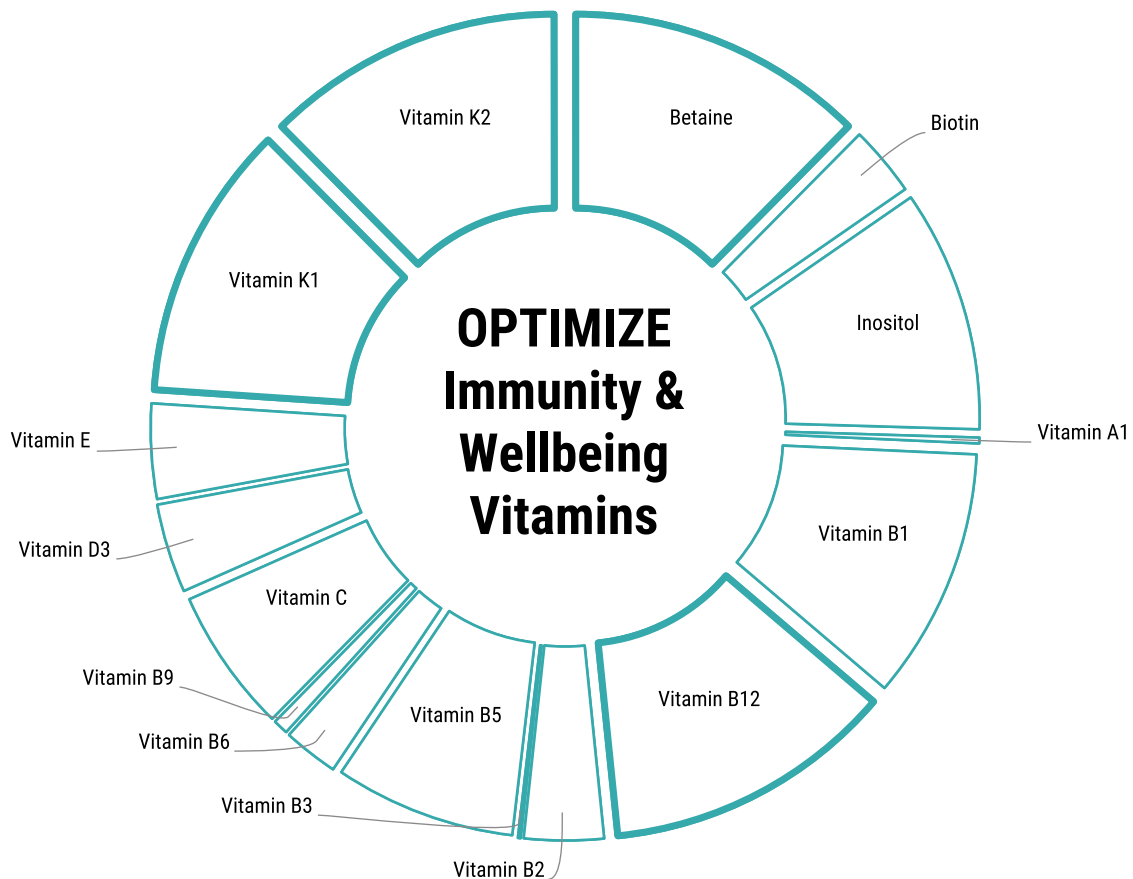

The above chart provides you with an overview of the Microbiology indicators which are specific to you. If this category is marked with a (Priority, Advisory or Consider), then these are items which you might wish to address through your nutritional food regime.

An indication in the overview chart of any underlying issues and/or the matching of any symptoms on this page is not a physical diagnosis of deficiency or associated illness. Always seek professional health advice when making nutritional and dietary changes.

VITAMINS INDICATORS

Consider - Increase Intake

See page 25 for further information

Category Indicator Chart

The above chart provides you with an overview of the Vitamins indicators which are specific to you. If this category is marked with a (Priority, Advisory or Consider), then these are items which you might wish to address through your nutritional food regime.

An indication in the overview chart of any underlying issues and/or the matching of any symptoms on this page is not a physical diagnosis of deficiency or associated illness. Always seek professional health advice when making nutritional and dietary changes.

MINERALS INDICATORS

Advisory - Increase Intake

See page 26 for further information

Category Indicator Chart

The above chart provides you with an overview of the Minerals indicators which are specific to you. If this category is marked with a (Priority, Advisory or Consider), then these are items which you might wish to address through your nutritional food regime.

An indication in the overview chart of any underlying issues and/or the matching of any symptoms on this page is not a physical diagnosis of deficiency or associated illness. Always seek professional health advice when making nutritional and dietary changes.

FATTY ACIDS INDICATORS

Priority - Increase Intake

See page 27 for further information

Category Indicator Chart

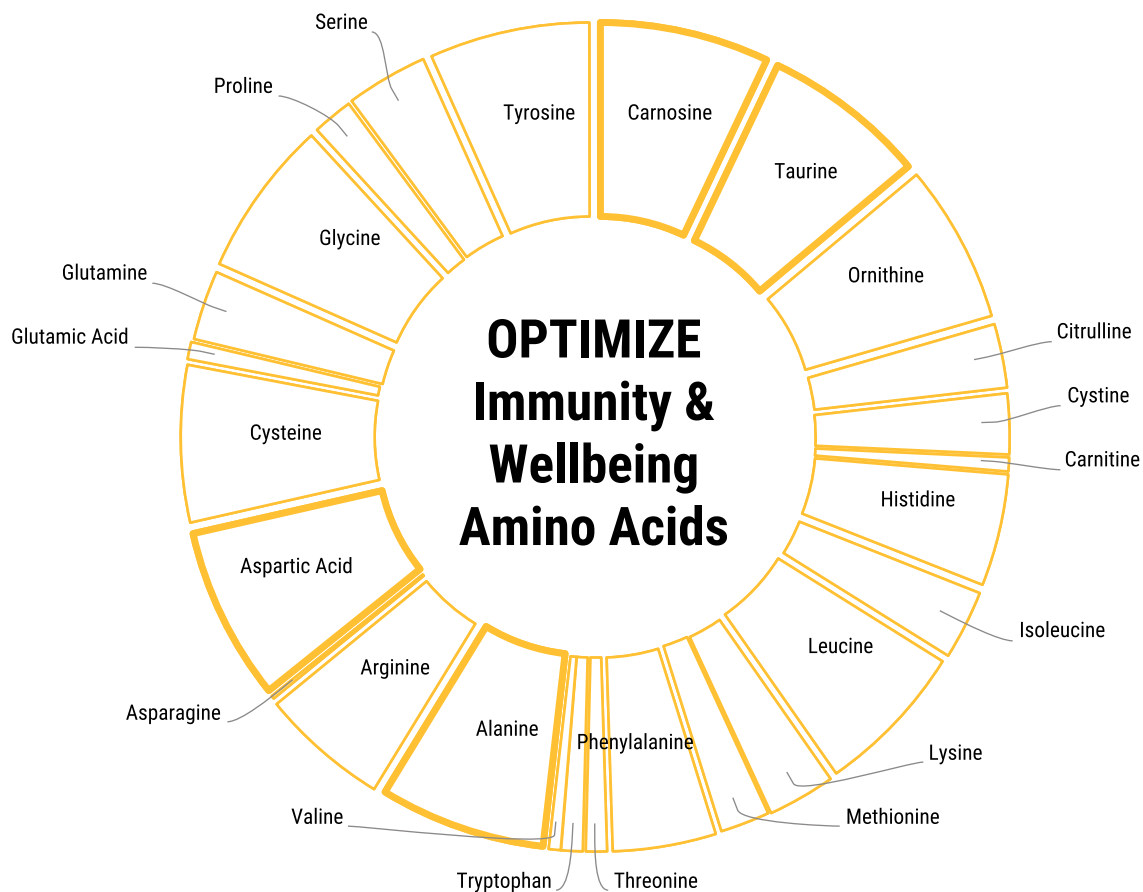

The above chart provides you with an overview of the EFAs indicators which are specific to you. If this category is marked with a (Priority, Advisory or Consider), then these are items which you might wish to address through your nutritional food regime.

An indication in the overview chart of any underlying issues and/or the matching of any symptoms on this page is not a physical diagnosis of deficiency or associated illness. Always seek professional health advice when making nutritional and dietary changes.

AMINO ACIDS INDICATORS

Consider - Increase Intake

See page 28 for further information

Category Indicator Chart

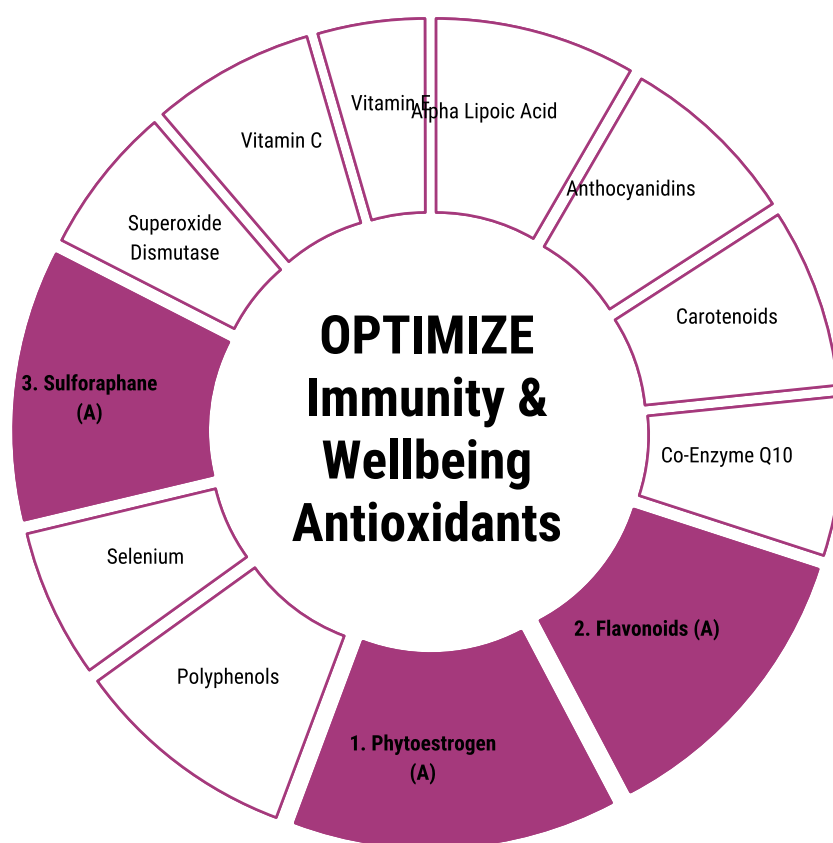

The above chart provides you with an overview of the Amino Acids indicators which are specific to you. If this category is marked with a (Priority, Advisory or Consider), then these are items which you might wish to address through your nutritional food regime.

An indication in the overview chart of any underlying issues and/or the matching of any symptoms on this page is not a physical diagnosis of deficiency or associated illness. Always seek professional health advice when making nutritional and dietary changes.

ANTIOXIDANTS INDICATORS

Advisory - Increase Intake

See page 29 for further information

Category Indicator Chart

The above chart provides you with an overview of the Antioxidants indicators which are specific to you. If this category is marked with a (Priority, Advisory or Consider), then these are items which you might wish to address through your nutritional food regime.

An indication in the overview chart of any underlying issues and/or the matching of any symptoms on this page is not a physical diagnosis of deficiency or associated illness. Always seek professional health advice when making nutritional and dietary changes.

90 DAY OPTIMIZE PLAN

THIS REPORT IS ONLY VALID FOR THE NEXT 90-DAYS

Your next Optimize Report date is: 20/04/2023
Book today with your provider at: Ian Lyons, Cell Wellbeing
Phone: PRIVATE NUMBER
Email: ian@cell-wellbeing.com

With any regime change that supports wellness or performance, it is most beneficial to follow a course of reports. Being optimized means staying in alignment with your epigenetic environment and adjusting your food and nutrient intake to meet your changing needs over time. We recommend that you do this every 90-days as this is a natural cycle the body follows. Don't miss out and book your next report now based on the above date.

Step 1

START Day 1

The first and easiest step to optimizing is to restrict foods which might be causing stress to your body's digestive or immune system. Dealing with some foods can drain the body's energy resources and stop the absorption of nutrients which are crucial to enzyme and metabolic function. See the table below for foods that you should restrict for a minimum of 90-days.

Dates	Lentils	Yams	Flounder	Broccoli
Pork	Brazil Nuts	Strawberry	Spelt	Beer

Step 2

START Day 1

The second step of optimization is to avoid Environmental challenges, Interference indicators and food additive, which could be compromising your enzyme function through key nutrient depletion and contributing to poor cellular expression. Use the links below to download documents which will indicate common sources of these so that you can easily avoid them.

[CLICK Here for more EMF/ELF Information](#)

[CLICK Here for more Gut Support Guidance](#)

[CLICK Here for more Toxins Information](#)

[CLICK Here for more Food Additives Information](#)

Step 3

START Day 1

Step 3 of the optimizing process is to ensure that you are absorbing enough nutrients from the foods you are eating in order to fully support all of the enzymes processes in the body. A good quality systemic enzyme can support the breakdown of foods in the stomach so that nutrients can be readily released for the body to process and use. A natural multi-strain probiotic will further assist with the breakdown and absorption of nutrients from the food you eat and ensure that the body's daily nutritional needs are supported.

Step 4

START Day 1

The next step for optimization is to ensure that the quality of your drinking water will support your body's need for hydration and waste removal and detoxing from EMFs. Water containing high levels of toxins (typical tap water) cannot be readily used by the body for its key functions. Ensure that you have a regular source of good quality drinking water and drink 1 to 2 liters daily.

Step 5

START Day 30

The next step for optimization is to increase your dietary intake of the foods which will help address the priority and advisory nutritional indicators highlighted in your report. This will help you to meet your body's nutritional needs and all around enzyme and metabolic functions, thereby supporting your wellness. See table Step 5 on page 19 for foods recommended for you.

Step 6

START Day 40

The final step of the optimize immunity & wellbeing plan is to support your body to deal with the Environmental Challenges or Resistance and Interference indicators, which could be contributing to poor cellular expression and metabolic function. See the table on page 20 for the specific foods and recommendations suggested for you.

90 DAY OPTIMIZE IMMUNITY & WELLBEING FOODS

PLEASE EXCLUDE THE FOODS TO AVOID ON PAGE 9, FROM THE RECOMMENDED FOODS BELOW

Optimize Indicator (STEP 5 - Nutrition)	Suggested Food Sources Day 30-90 (introduce as many foods as you can, at least 2 for each indicator)
Eicosapentaenoic Acid - 3 (EPA)	Mackerel, salmon, sardines, tuna, flax seeds
Docosahexaenoic Acid - 3 (DHA)	Salmon, herring, mackerel, anchovies, eggs, butter, milk, cheese (full fat)
Phytoestrogen	Nuts, soy, tofu, cereals, multigrain bread, miso paste, tempeh
Potassium	Fish, fruit, legumes, vegetables, whole grains, apricots, avocados, bananas, lima beans, brown rice, dates, figs, garlic, nuts, spinach, yams, nettle, sage
Molybdenum	Beans, cereal grains, dark green leafy vegetables, legumes, lentils, split peas, green peas, cauliflower, spinach, brown rice
Flavonoids	Apples, apricots, blueberries, pears, raspberries, strawberries, black beans, cabbage, onions, parsley
Sulforaphane	Broccoli and broccoli sprouts, cauliflower, cabbage, cress, bok choy, brussels sprouts
Sulfur	Onion, garlic, eggs, apple, strawberries, dates, figs, banana, brazil nuts, mustard
Manganese	Wheat germ, pecan nuts, whole wheat pasta, pumpkin seeds, sweet potatoes, pineapple, oysters, blackstrap molasses, tomato juice, blackberries, grape juice, spinach, brown rice, almonds, tofu, tea, rye, barley, buckwheat, pecan nuts, brazil nuts, sunflower seeds
Aspartic Acid	Fresh eggs, meat and salmon, halibut, sardines, mackerel. Walnuts, pistachios, chestnuts
Betaine	Whole wheat, wheat bran, wheat germ, spinach, beetroot, broccoli, spinach
Vitamin K2	Natto, Hard Cheese, Soft Cheese, Egg Yolk, Butter – full fat, Chicken Liver, Salami, Chicken Breast, Beef
Carnosine	Beef, poultry, fish
Vitamin B12	Sardines, mackerel, salmon, trout, tuna, lamb, milk, eggs and poultry, nori
Alanine	Spirulina, Beef, Lamb, Almonds, Cucumber, Spinach, Capsicum, Carrot
Taurine	Eggs, meat, fish, milk
Vitamin K1	Brussels sprouts, broccoli, kale, cauliflower, spinach, loose leaf lettuce, carrot, green beans, asparagus, egg, strawberry, avocado

If you find adding the suggested foods to your diet difficult, then you can choose to supplement your diet with nutritional supplements. Supplementation is not a replacement for eating a balanced and healthy diet but can be a way of helping to increase your intake of specific nutrients or nutrient groups. When taking supplements for Environmental Challenges and Resistance Indicators support, you should seek the advice of a qualified health professional who can advise you on the products and processes involved.

90 DAY OPTIMIZE IMMUNITY & WELLBEING FOODS

PLEASE EXCLUDE THE FOODS TO AVOID ON PAGE 9, FROM THE RECOMMENDED FOODS BELOW

Optimize Indicator (STEP 6 - Cleansing and Resistance)	Indicator	Suggested Food Sources Day 60-90 (introduce as many foods as you can, at least 2 for each indicator)
Resistance Foods	Fungus	Garlic, Ginger, Onions, seaweed, pumpkin seeds, cayenne pepper
Resistance Foods	Parasite	Pumpkins seeds, pomegranate, papaya, garlic, horseradish, thyme, cayenne pepper, spring onions
Resistance Foods	Virus	Elderberry, green tea, garlic, fermented foods, green leafy vegetables, ginger, broccoli, aloe vera, pineapple
Environmental Foods	Toxic Metals	Pectin foods – (apples, bananas, grapes, carrots, cabbage - all organic), Cilantro, wheatgrass, barley grass, chlorella, garlic, avocado, nuts and seeds, probiotic wholefoods

Optimize Indicator (STEP 6 - Frequency Interference)	Suggested Food/Supplement Sources
Interference (Calcium Day 1-90)	Salmon, sardines, dark green leafy vegetables, almonds, asparagus, blackstrap molasses, brewer's yeast, broccoli, cabbage, carob, kale, mustard greens, figs, tofu, watercress, chickweed, chicory, flaxseed, kelp, parsley, sesame, poppy seed
Interference (Water Day 1-90)	Good quality drinking water for cell optimization. (Avoid tap water, plastic bottled water or water of an unknown source)
Interference (Essential Fatty Acids Day 1-90)	Salmon, mackerel, sardines, herring, trout, flax seed, walnut, pumpkin seeds, hemp seeds, soy bean

If you find adding the suggested foods to your diet difficult, then you can choose to supplement your diet with nutritional supplements. Supplementation is not a replacement for eating a balanced and healthy diet but can be a way of helping to increase your intake of specific nutrients or nutrient groups. When taking supplements for Environmental Challenges and Resistance Indicators support, you should seek the advice of a qualified health professional who can advise you on the products and processes involved.

FOOD ADDITIVE AVOIDANCE

Consider - Avoidance Recommended

Food Additives Indicators	
E 445 Glycerine ester of rosin/colophoner	E 281 Sodium propionate, propionic acid
E 473 Sucrose esters	E 285 Sodium tetraborate, Boric acid
E 476 Polyglycerol polyricinoleate	E 306 Natural tocopherols (Vitamin E)
E 515 Potassium sulphate, Potassium hydrogen sulphate	E 337 Sodium potassium tartrate (salts from tartaric acid)
E 226 Calcium sulphite (Sulphur dioxide)	E 535 Sodium ferrocyanide

ABOUT FOOD ADDITIVES

The best choices will always lead to optimized wellness and natural, unprocessed, home cooked food will always be best.

Therefore, the proper understanding of how food additives affect wellness is crucial in reaching your wellness goals. Here are some of the important food additive avoidances that we recommend. You must know that beyond reading labels on products, you must understand and be able to choose the best resources for an optimal wellness.

Here are some of the food additive avoidances we recommend:

1. High Fructose Corn Syrup (HFCS); It has been implicated in affecting poor cardiovascular response, poor blood sugar management and body fat gain. Unfortunately, it is found in many popular foods, energy drinks and energy bars.
2. Aspartame: An unsafe, however, very popular food additive considered to be an "excitotoxin". Regular use of this substance may distort a brain's cellular function and affect neurotransmitters. At a minimum, this substance may lead to poor focus, cloudy cognitive function and brain fog that could adversely affect a peak wellness state.
3. Monosodium Glutamate: This is a hydrolyzed protein, it is in many energy bars and protein supplement, such as whey protein isolates or textured proteins and pre-prepared foods. This is utilized to fool the tongue into thinking these bars and shakes have a better taste profile than they may have.
4. Artificial Colors: They may cause false involuntary physical responses and hyperactivity. These artificial colorings are found in many sports, energy and protein drinks and everyday foods, as well as nutrition and energy bars and many consumable sports and fitness supplements.

In conclusion, the best way to achieve optimized wellness is to avoid these unhealthy ingredients, as well as all of the additive indicators that appear in your personalized plan and listed above. This is just the tip of the iceberg and designed to bring to your attention to the issue of processed foods. Please note: Always read your food labels and as a helpful baseline, try to follow the USA FDA GRAS list. This stands for Generally Recognized as Safe. This is a USA /FDA designation that a chemical and or a substance added to a food is recognized as safe. This information has been provided to assist you in understanding more about, and navigating around food additives, helping to achieve more optimized wellness.

The above list provides you with an overview of the food additives avoidance indicators for the client named in this report. It is recommended that the foods additives listed are avoided for the foreseeable future (minimum 90-day period).

FREQUENCY INTERFERENCE

ABOUT INTERFERENCE FOODS

Modern day electrical supply and technologies are largely powered by or utilize frequencies at the very low spectrum range. These are considered non-ionizing forms of EM radiation in the 50Hz to 1GHz range. There are many forms of natural frequency like visible light or ultra violet, even the body and its cells have a very weak frequency field. Modern forms of frequency appear not to be very compatible with the body's own fields and this is starting to create knock on effects for wellness. These factors can interfere with everyday communication within your body and you should be eating a wide variety of foods which can support and maintain normal function.

REDUCE EXPOSURE TO FREQUENCY INTERFERENCE

As of yet, we do not fully understand the effects that our modern electrical environments are having on our wellness processes. However, it is clear that there is some effect and that it would be wise to start introducing foods which can help support the body and maintain systems which may come under pressure from the electrical appliances which we use on a daily basis both at home and work. Structured water may support cellular communication and help conserve energy in the system.

INTERFERENCE SUPPORT FOODS

- Spirulina
- Vitamin D3
- Curcumin
- EFAs
- Calcium
- Melatonin
- B Vitamins
- Sulfur

An indication in the overview chart of any underlying issues and/or the matching of any symptoms on this page is not a physical diagnosis of deficiency or associated illness. Always seek professional health advice when making nutritional and dietary changes.

ENVIRONMENTAL CHALLENGES

ABOUT CLEANSING FOODS

Our environment has changed dramatically since the industrial revolution and one of the biggest changes has come about in the area of man-made elements. We can accumulate many influences which are not well tolerated by the body and which we should get rid of through the body's natural elimination processes. However, these processes were not designed to cope with the amount and variety of man-made elements which they are now required to. This requires extra support from your diet.

To help support and maintain a clean and optimized system, we require foods which support this process.

There are many foods which can support your body's daily cleansing needs and which will help to maintain the systems at their optimum function. Typical cleaning foods are green foods, wholefoods, nuts, seeds and herbs. But there are many and it's important to get good selection of different foods which have this ability into your nutritional food intake.

BALANCING ENVIRONMENTAL EXPOSURES

The body has systems which are designed to help it cleanse itself of accumulated waste. Certain foods can support the systems which carry out this function and ensure that they do not get over burdened. You have organs and systems which can assist with your help. You need a wide variety of foods to help support and maintain the myriad of underlying cleansing mechanisms which will in turn support optimized Wellness.

CLEANSING SUPPORT FOODS

- Beets
- Sweet Potatoes
- Lemon
- Green Leafy Vegetables
- Apple
- Garlic
- Onions
- Nuts and seeds
- Probiotics

If there are foods recommended for you, see the tables on page 20.

An indication in the overview chart of any underlying issues and/or the matching of any symptoms on this page is not a physical diagnosis of deficiency or associated illness. Always seek professional health advice when making nutritional and dietary changes.

RESISTANCE FOODS

ABOUT RESISTANCE FOODS

On a daily basis our body's come under attack by micro-organisms that can weaken our ability to defend ourselves.

We have natural processes which are designed to enable us to resist these attacks and there are many foods which can support our natural ability to defend against these invaders.

By eating a diet rich in certain foods, you can keep your natural resistance in good shape and allow your body to naturally defend itself. Typical foods groups which can support this natural process are, herbs, fruits, vegetables, prebiotics and probiotics. An overall good healthy diet, with moderate exercise will maintain good resistance and support the normal function of your defensive systems.

KEEPING OUR RESISTANCE STRONG

Your body has an entire system dedicated to naturally resisting outside invaders and providing good protection to your cells and organs.

This system requires a good overall and balanced nutritional intake to support it and help maintain all aspects of defense. There are other certain foods which can actively boost the system and help the body produce more elements which can resist invaders.

RESISTANCE SUPPORT FOODS

- Garlic
- Ginger
- Pineapple
- Elderberry
- Onions
- Coconut Oil
- Pumpkin Seeds
- Broccoli

For specific foods that maybe recommended for you see page 20.

An indication in the overview chart of any underlying issues and/or the matching of any symptoms on this page is not a physical diagnosis of deficiency or associated illness. Always seek professional health advice when making nutritional and dietary changes.

VITAMINS

ABOUT VITAMINS

Vitamin C molecular model

Vitamins are organic compounds which are needed to sustain life. You get vitamins from food, because the human body either does not produce enough of them or none at all. An organic compound contains carbon. When an organism (living thing) cannot produce enough of an organic chemical compound that it needs in tiny amounts, and has to get it from food, it is called a vitamin. Vitamins play a vital role in the enzymatic processes of your body and a shortage of them in your diet can cause a host of wellness related problems.

HOW VITAMINS SUPPORT WELLNESS

Many processes in the body require a variety of vitamins in order to function at their optimum level. Vitamins are a key part in the enzyme processes, which are the drivers behind all of the body's metabolic processes. You need a wide variety of vitamins to help support and maintain the myriad of underlying mechanisms, which will in turn support optimized wellness. The best source of vitamins you can get is from the foods you eat, where the vitamins are present with other nutrients which work synergistically to support your wellness.

VITAMIN SUPPORT FOODS

- Dairy
- Seeds and Nuts
- Lentils
- Chickpeas
- Green Vegetables
- Grains
- Red Peppers
- Chicken
- Turkey
- Fish
- Eggs
- Apricots

**There are many other foods but these are some of the common examples.*

MINERALS

ABOUT MINERALS

Magnesium molecular model

All our recipes are a good source of minerals.

Minerals are important for your body to stay healthy. Your body uses minerals for many different jobs, including building bones, making hormones and regulating your heartbeat.

There are two kinds of minerals: macro-minerals and trace minerals.

Macro-minerals are minerals your body needs in larger amounts. They include calcium, phosphorus, magnesium, sodium, potassium, chloride and sulphur. Your body needs just small amounts of trace minerals. These include iron manganese, copper, iodine, zinc, cobalt and selenium. The best way to get the minerals your body needs is by eating a wide variety of foods. However, even when eating a varied diet you often do not receive all of the required minerals and in the quantities the body needs. A broad spectrum mineral supplement should be considered.

HOW MINERALS SUPPORT WELLNESS

Many processes and structures in the body require minerals in order to function at their optimum level. Minerals are a key part in the enzyme processes which are the drivers behind all of the body's metabolic processes. They also play a role in structure, muscle action and nerve transmission. You need a wide variety of minerals to help support and maintain the myriad of underlying mechanisms which will in turn support optimized Wellness.

MINERAL SUPPORT FOODS

- Green Leafy Vegetables
- Nuts (all)
- Whole Grains
- Fish
- Shellfish
- Broccoli
- Cabbage
- Kale
- Brown Rice
- Eggs
- Mushrooms
- Seaweed
- Lentils
- Beans
- Tomatoes

**There are many other foods but these are some of the common examples.*

An indication in the overview chart of any underlying issues and/or the matching of any symptoms on this page is not a physical diagnosis of deficiency or associated illness. Always seek professional health advice when making nutritional and dietary changes.

FATTY ACIDS

ABOUT FATTY ACIDS

Omega 3 molecular model

Many fish varieties, including salmon, are a good source of EFAs

Fatty acids, as they sound, are fats that are necessary within the human body. Though you have probably often heard the word 'fats' and associated it with bad health, there are some essential fatty acids that are necessary for your survival.

Without them, you could cause serious damage to different systems within the body. However, essential fatty acids are also not usually produced naturally within the body. This means that you have to obtain essential fatty acids by adding them to your diet.

HOW FATTY ACIDS SUPPORT WELLNESS

Many processes in the body require EFAs in order to function at their optimum level. EFAs are a key part in supporting the cell membranes and brain and nervous system of the body. Other regulatory processes require EFAs and they have protective qualities. You need a wide daily intake of EFAs to help support and maintain the myriad of underlying mechanisms which will in turn support optimized Wellness.

FATTY ACID SUPPORT FOODS

Non-Vegetarian	Vegetarian
• Sardines	• Flaxseed
• Salmon	• Walnuts
• Shrimp	• Tofu
• Mackerel	• Hemp
• Herring	Seed
• Trout	

**There are many other foods but these are some of the common examples.*

An indication in the overview chart of any underlying issues and/or the matching of any symptoms on this page is not a physical diagnosis of deficiency or associated illness. Always seek professional health advice when making nutritional and dietary changes.

AMINO ACIDS

ABOUT AMINO ACIDS

Protein is needed by every living organism, and next to water, makes up the largest portion of our body weight since it is contained in muscles, organs, hair, etc. The protein used in making up the body is not directly derived from diet, but the dietary protein is broken down into amino acids, and the body then re-constitute these amino acids into the specific proteins needed.

Enzymes and hormones regulating body functions are also proteins. Amino acids are used in most body processes from regulating the way the body works to how the brain functions—they activate and utilize vitamins and other nutrients.

HOW AMINO ACIDS SUPPORT WELLNESS

Many processes in the body are supported by amino acids in order to function at their optimum level. Amino acids are a key part in the enzyme processes and the protein building which the body needs for everyday maintenance. You need a wide variety of amino acids to help support and maintain the myriad of underlying mechanisms which will in turn support optimized Wellness.

AMINO ACID SUPPORT FOODS

- | | |
|--------------------|-------------|
| • Meat | • Nuts |
| • Dairy | • Spirulina |
| • Seeds | • Poultry |
| • Lentils | • Seafood |
| • Chickpeas | • Onion |
| • Green Vegetables | • Garlic |
| • Grains | • Peppers |

ANTIOXIDANTS

ABOUT ANTIOXIDANTS

Antioxidant neutralizing a free radical

Many berry varieties, including blueberries, are a good source of antioxidants

Antioxidants are substances that may protect cells in your body from free radical damage that can occur from exposure to certain chemicals, smoking, pollution, radiation and as a by-product of normal metabolism. Dietary antioxidants include selenium, vitamin A and related carotenoids, vitamins C and E, plus various phytochemicals such as lycopene, lutein, and quercetin.

You can find these antioxidants in many different foods. There are large amounts of antioxidants in fruits, vegetables, nuts, and whole grains and smaller amounts of antioxidants in meats, poultry and fish.

HOW ANTIOXIDANTS SUPPORT WELLNESS

Our body's produce a lot of free oxygen molecules and other by-products, which can lead to oxidative stress. Anti-oxidants are a key part in the processes which supports the body to deal with these issues. You need a wide variety of antioxidants to help support your body to deal with oxidation and which will in turn support optimized Wellness.

ANTIOXIDANT SUPPORT FOODS

SELF-CHECK PROGRESS

The process of optimizing varies for everyone and it's important to keep a track of the changes over time. The more optimized you become, the more difficult it can become to remember how things used to be. Keeping a record of your journey helps you to quantify the changes and motivates you to keep them. **At that start, be sure to schedule the 4 dates that you are going to complete the questionnaires, helping to ensure you give yourself enough time to complete this thoughtfully.**

DAY 1

DATE

REACTION	SCALE	1	2	3	4	5	6	7	8	9	10	SCORE
TIRED	Extremely											Never
TEMPERAMENT	Racy											Calm
A LITTLE SNAPPY	Very Bad Tempered											Placid
A LITTLE EMOTIONAL	Highly											Balanced
FOOD DOESN'T DIGEST	Uncomfortable											No Problem
SHORT TERM MEMORY	Forget Easily											Great Memory
SUGAR CRAVINGS	Love Sweets											Don't Need Sugar
STAMINA	Very Low											High
COLD HANDS OR FEET	Very Cold											Normal
FEELING OF HOPELESSNESS	Depressed											Life is Good
MIGRAINE	Extreme											No Headaches
THRUSH	Frequently											Never
BOWEL MOVEMENTS	Irregular											Frequent/Normal
CONSTIPATION	10 Days Apart											Every Day
APPETITE	Always Snacking											Never Hungry
ACNE	Extreme											Nil
VOICE	Very Deep											Soft
HIGHLY STRUNG	Volatile											Calm
IRRITABLE BOWEL SYNDROME	Bad											No
SLEEP PATTERNS	Poor											Very Good
NUMBER OF HOURS OF SLEEP	10 or More											5-8
RESTLESS LEGS	Often											Never
LOWER BACK PAIN	Extreme											Never
WIND/BLOATING	Often											Never

TOTAL

SELF-CHECK PROGRESS

LOWER BACK PAIN	Extreme											Never
WIND/BLOATING	Often											Never

TOTAL

SELF-CHECK PROGRESS

Compare your self-check questionnaires from day 1 to day 90 to get a feel for some of the tangible changes that optimization can bring about. Changes can vary but should generally be on an upward trend. If changes are occurring, then you can see for yourself that the process of optimizing is boosting your enzymes function, helping your genes to produce better cells, promoting an adaptable nervous system and improving your overall metabolic function. **Now get your re-scan and keep up the good work and continue to Optimize.**

DAY 90

DATE

REACTION	SCALE	1	2	3	4	5	6	7	8	9	10	SCORE
TIRED	Extremely											Never
TEMPERAMENT	Racy											Calm

OPTIMIZED NUTRITION IS THE KEY TO WELLNESS

NUTRITION SUPPORTS & MAINTAINS

- Many body processes
- Better resistance
- Sleep patterns
- Cleansing
- Optimum weight and shape
- Performance
- Energy Production

WHAT COULD BE STOPPING YOU FROM GETTING OPTIMIZED NUTRITION?

Nutrient Intake

Many soils are depleted of key nutrients and those that do exist are much lower than a generation ago. Even a healthy diet may not provide you with enough nutrients.

Processed Foods

These foods have a very low nutritional value. Known as empty calories/carbs, they actually create a deficit of key nutrients for the body.

Convenience

We like convenience in certain foods but it can come at a cost. The easiest of options often have the lowest of nutritional values.

Lifestyles

Lifestyles of high stress deplete the body of many nutrients and, when combined with other factors, leave many people malnourished of micro-nutrients.

IT'S TIME TO STOP JUST SURVIVING... & START OPTIMIZING!

**Thank you for investing your time
and resources to get your 'Age
Management & Aesthetics Report'
nutritional food plan.**

**Empower yourself and take the
quantum leap towards optimal
nutritional support today!**
