

I am a professional graphic designer with a strong ability to connect with audiences through clear and purposeful visual communication. Great design requires sensitivity, strategy, and creativity — turning powerful ideas into meaningful results.

With 27 years of experience, I specialize in vector illustration, branding, and photography editing. I have extensive expertise in print production, including newspapers, magazines, flyers, commercial stationery, and digital printing processes. I understand not only how to design, but how to prepare artwork for flawless production.

In addition, I bring over 12 years of experience in international trade in Chile and Colombia, working in freight sales for container shipments, export and import logistics operations, cargo insurance, and treasury management. This business background strengthens my strategic thinking and project management skills.

Beyond design and commerce, I also have hands-on experience in construction hardware, rustic carpentry for interior decoration, and painting — skills that enhance my creativity and practical understanding of materials, structure, and aesthetics.
