Cancer surgery, pancreatic cancer, biliary surgery, gastrointestinal surgery  
OU Medical Center  
OU Physicians, Department of Surgery  
825 NE 10th St., Ste. 4500, OKC, 73104  
405.271.1400

**DENISE RABLE**

Breast disease, breast cancer  
Norman Regional Hospital  
500 E. Robinson St., Ste. 2300, Norman, 73071  
405.329.4102

## Dr. Denise Rable

One year after joining what would soon become Norman Surgical Associates, Rable took the reins as Medical Director of the Norman Regional Health Systems Breast Care Center upon its opening in 2000.

Board certified in general surgery, Rable has made it her mission to ensure that women get appropriate breast evaluations with as much ease as possible, whether for a routine annual exam or complex workup of a suspicious finding.

“I am fortunate that the work I am passionate about is strongly supported by the health system in Norman,” she explains. “At our center, we are able to offer comprehensive imaging services including digital mammography, ultrasound, and stereotactic biopsy.”

On her watch, the center has incorporated a surgical clinic into the

breast care center and facilitates high priority on evaluation, diagnosis and treatment.

Operating on women with both benign and malignant diseases, Rable says that Norman Regional Hospital provides her with the tools and resources to deliver state-of-the-art technology and interventions.

“With breast cancer, I find the process of evaluating each individual patient’s situation and developing a surgical plan particularly rewarding,” she says.

“There is a lot of patient education involved. There are also so many personal and emotional issues that the patients are working through, and I appreciate their confidence and trust in me to help them through a very difficult time. The residents of Norman and the surrounding cities are a joy to meet and I feel privileged to care for them.” – *Meika Yates Hines*
