

Our Premium Linen & Fabric Collection

Greige Fabric

We specialise in high-quality greige (grey) fabric, also known as gada or kora cloth, for medical and hospital applications. Our fabric range includes 100% cotton, polycotton (T/C), and viscose (rayon), with yarn counts from 10s to 100s. We offer various constructions and widths, ranging from 16” to 120”, produced on both power looms and auto looms. We provide a variety of weaves, including plain, satin, drill, twill, leno, double cloth, honeycomb, herringbone, oxford, and dobby, tailored to meet buyers’ specific needs. Our fabrics are ideal for use in scrubs, surgical gowns, bed sheets, curtains, and other medical and hospital products.

Weave	Description	Properties	Applications
Plain Weave	Basic criss-cross pattern with warp and weft threads crossing alternately.	Durable, smooth, lightweight.	Scrubs, surgical gowns, bed sheets.
Satin Weave	Long floats of warp or weft threads skip over several threads, giving a glossy surface.	Lustrous, soft, luxurious feel.	High-end bed sheets, specialty hospital items.
Drill Weave	Strong diagonal weave with noticeable texture.	Strong, durable, resistant to wear and tear.	Uniforms, medical aprons.
Twill Weave	Diagonal ridges formed by offsetting warp and weft threads.	Durable, stain-resistant, drapes well.	Surgical gowns, durable hospital textiles.
Leno Weave	Twists warp threads around weft to create an open mesh or gauze-like texture.	Lightweight, breathable, sheer but strong.	Medical gauze, breathable hospital fabrics.
Double Cloth	Two layers of fabric woven together with different patterns or textures.	Thick, strong, highly durable.	Heavy-duty hospital products, insulated textiles.
Honeycomb Weave	Textured grid pattern resembling a honeycomb structure.	Excellent absorbency, lightweight, soft.	Towels, absorbent medical cloths, washcloths.
Herringbone Weave	Twill weave variation with a zig-zag pattern.	Durable, strong, wrinkle-resistant.	High-quality hospital sheets, blankets.
Oxford Weave	Basket weave variation with two warp threads crossing over one weft.	Soft, breathable, durable, textured finish.	Hospital uniforms, scrubs.
Dobby Weave	Decorative weave produced with geometric patterns.	Textured, intricate, adds aesthetic appeal.	Specialized medical fabrics requiring both function and design.
