Source-to-solution Medical Disposables

Welcome to **NIMBUS**, your premier destination for top quality medical disposables

At NIMBUS, we're more than just a supplier; we're your trusted partner in healthcare excellence. Say goodbye to the traditional model of middlemen and markups. We're revolutionising the industry by taking control of the entire process from manufacturing to delivery. With our direct-to-customer approach, we're streamlining the supply-chain, reducing costs, and passing those savings onto you.

Drawing inspiration from ancient traditions and propelled by modern technology, we at NIMBUS have embraced the legacy of **cotton** to create premium quality gauze rolls, swabs, lab sponges, bandages and more.

With adherence to stringent international and national regulations, our products are CE and ISO 13485:2016 certified, and comply with British Pharmacopoeia (BP) requirements, meeting the highest levels of performance and safety. Through the completion of rigorous testing covering parameters including absorbency, acidity and colouring matter among others, we guarantee the effectiveness and reliability of our products.

We invite all healthcare institutions and distributors seeking reliable medical disposables to join us as we continue to weave the fabric of woundcare for generations to come...

Our Products

Sustainability

At NIMBUS, sustainability is ingrained in all that we do

Renewable Raw Materials

We prioritise the use of renewable raw materials, such as responsibly sourced cotton, in our medical dressings. By choosing renewable resources, we reduce our environmental impact and promote long-term sustainability.

Low Carbon Footprint Supply-Chain

Our commitment to sustainability extends throughout our entire supply-chain. Our direct manufacturer-to-customer approach helps to minimise environmental impact as we remove the need for additional logistics.

Energy Efficiency

We continuously invest in energy-efficient technologies and processes to not only reduce costs but also lower our carbon emissions, contributing to a cleaner environment.

Waste Reduction

We are dedicated to minimising waste generation across our operations. Through initiatives such as recycling, waste reduction programs, and efficient resource utilisation, we aim to minimise landfill waste and promote a circular economy.

Responsible Packaging

We carefully select packaging materials that are recyclable and environmentally friendly. By using sustainable packaging options and minimising packaging waste, we reduce our carbon footprint and minimise environmental harm.
