

FOR IMMEDIATE RELEASE

TEPER LEGAL SEEKS ADMISSION IN FLORIDA TO DEFEND NATIONALLY SIGNIFICANT WOLF SANCTUARY

Teper Legal Joins Multi-State Legal Team to Protect Wolves and Challenge Frivolous Nuisance Claims

Massachusetts / Florida — April 28, 2026 — Teper Legal, PLLC proudly announces that Attorney Adam E. Teper, Esq., has formally sought admission to the Florida Bar *pro hac vice* in order to represent **In Harmony with Nature, Inc.**, a critically important wolf sanctuary dedicated to the protection, rehabilitation, and preservation of wolves.

Attorney Teper will be joining a distinguished, multi-state coalition of attorneys united by a shared mission: to defend wolves—both in the wild and those who are unreleasable and living under human care—and to safeguard the ecological and educational value they provide to the United States.

“This is not just another case—this is about protecting a species that plays a vital role in our ecosystem and preserving the sanctuaries that serve as their last line of defense,” said Attorney Teper. “Wolves are not nuisances. They are keystone animals. And efforts to weaponize the legal system through frivolous nuisance claims to harm them will be met with forceful, strategic opposition.”

This fight takes on even greater urgency in light of recent events in Florida, where **In Harmony with Nature, Inc. stepped in to take in wolves from the now-closed Seacrest Wolf Preserve**—an incident that has drawn significant concern within the animal welfare and conservation communities. These wolves, who are unreleasable, and several wolfdogs, now rely on IHWN for survival, stability, and continued care.

“The reality is simple—these wolves have already endured upheaval and uncertainty,” Teper added. “They cannot be displaced again. They cannot be treated as expendable. These animals must be protected—at all costs.”

In Harmony with Nature, Inc. serves as a refuge for wolves that cannot survive in the wild, offering not only sanctuary but also public education and conservation advocacy. The legal challenge at issue threatens not just the sanctuary itself, but broader principles surrounding wildlife protection, habitat preservation, and the responsible coexistence between humans and protected species.

Teper Legal—widely recognized for its leadership in animal law and complex litigation involving animal welfare, civil rights, and consumer protection—views this representation as a natural extension of its mission.

“This is about drawing a clear line in the sand,” Teper added. “We will not allow baseless claims to be used as a tool to dismantle legitimate, lawful, and essential animal protection efforts. When wolves are under attack, we don’t just watch—we howl back.”

The firm emphasizes that this case carries national implications, particularly as it intersects with evolving legal standards concerning wildlife protection, endangered species considerations, and land-use disputes framed as nuisance actions.

Teper Legal stands committed to ensuring that the law is not misused to silence or destroy those who dedicate their lives to protecting animals that cannot protect themselves.

About Teper Legal, PLLC

Teper Legal is a boutique law firm headquartered in Swansea, Massachusetts, focusing on animal law. Teper Legal represents the animals, whether wild or domestic, and their individuals, organizations, and sanctuaries who care for them, across the country in high-impact cases involving their protection and welfare.
