

RACKING

From cantilever to pallet racking, our consultants can work with you to create a seamlessly engineered layout of your application, all while working only with racking highest in quality.

INSTALLATION

Crews are stationed all across the country and are on call to help you safely install your racking in your present or new warehouse. We can haul your old racking away, too!

TURNKEY

In affiliation with Combilift and their distinguished sideloaders, our consultants can streamline your flow and maximize your efficiency with racking, permit assistance, installation, and sideloaders.

WHO WE ARE

CH Steel Solutions, Inc. has over 35 years of experience in the metals service center industry. We have hundreds of customers and engineered layouts in the field from coast to coast. Whether your facility is small or large we have the knowledge, experience and expertise to offer the best solution customized for your needs and budget.
