

FACT

**COURSE DURATION:**

- 3 Days Foundation

+

- 1 Day Practitioner

pre-req : AgilePM™ Foundation

**WHO SHOULD ATTEND**

- Practicing and aspiring project managers (Junior / regular / senior)
- Project team members

**WHAT SECTORS?**

Suitable for a wide range of sectors and industries  
Particularly well suited to volatile and innovative projects, where scope is more likely to change (i.e. software development)

**WHAT WILL YOU LEARN**

- Service Lifecycle & Products
- Themes & Responsibilities
- Techniques
- Planning, Control & Governance

**PREREQUISITES**

- 3 Days Foundation

An open mind to learning and a need to perform in a digital agile world at pace

# Agile Project Management - AgilePM®

AgilePM brings together all the elements of a project in an agile content:

- Principles (the behaviours);
- People (roles and responsibilities);
- Process (the life cycle);
- Products (what is produced and when);
- Practices (timeboxing, modelling, iterative development, prioritization and facilitated workshops).

A complete framework for agile project management.

**Fixed**

**Estimated**

Until the introduction of Agile frameworks and approaches, the world of project management was dominated by traditional (often referred to as “Waterfall”) methods for project management.

For decades, reports from a wide variety of sources highlight poor project performance (e.g. delivered late, over budget, scope creep, benefits unrealized, etc.)

Agile’s influence on the project management industry continues to rise at pace.

Agile methods have long been popular in IT & software development, offering a more collaborative and incremental approach to solution development.

Increasing numbers of organizations and project professionals are embracing Agile tools and frameworks as they aim to increase the success of – and return on investment from – projects and other change initiatives.

Despite originating in the software development arena, Agile methods and frameworks are becoming increasingly popular in a wide variety of industries and projects as the benefits over more traditional frameworks and methodologies are realised.

**FACT**

**DIGITAL BADGES**

3 EASY STEPS...

- Create badge in the APMG Candidate Portal
- Accept badge in Acclaim
- Share success online

**AgilePM® certification & syllabus**

Four key areas:-

- Lifecycle and Products
- People and Roles
- Techniques
- Planning and Control

## Course Outline

### Day 1

Introductions and domestics

The Agile Manifesto; The Agile Digital Services Principles

Break

The Agile Digital Services Principles Post-It Note Question; The Service Lifecycle

Lunch

User Needs and User Experience; Requirements

Break

User Stories Post-It Note Question; Prioritisation; Exercise 1

END

### Day 2

Roles and Responsibilities

Break

Exercise 2; Role Themes Post-It Note Question

Lunch

Planning and Control;

Break;

Exercise 3; Products Post-It Note Question; Agile Governance

END

### Day 3

Sprints; Iterative Development

Break

Estimating; Quality Assurance

Lunch

Parked Board; Revision

Break

Revision;

Foundation Exam

END

### Day 4

Exercise 4

Go through specimen practitioner exam answers

Lunch

Exam Preparation

Practitioner Exam

END
