Enterprise Agile Readiness

Are you starting a new job?
Need to know what to expect?
In a new team and don't understand why how to get things done efficiently?
Has your team been told that you're all now working in an Agile way? The old way is out and new way is agile?
How does this agile thing work?
Some of you may have been on Scrum training, some of you may have just heard about agile and picked it up along the way. But you're still not quite getting what's really going on?

This short introduction course is action packed full of critical and must have knowledge to setup for success and succeed at being agile. A quick mix of context, theory, practical setup and examples to get you and your team motivated to get off to a great start.

Unlike other courses, this one is designed to talk about real world and work challenges and how to overcome them in a sensible and reliable way based on years of learning and successful outcomes.
