DocView Implementation Checklist Midway Data Systems

Practice Information	
Practice Name	
Billing Address: Attn, Street, City, State Zip	
Practice primary contact person (name, email, work, cell)	
Practice Website URL	
What IP address(es) will our system see traffic from for users at your <u>practice</u> when accessing DocView via the internet. (Only these IP addresses plus the hospital IP addresses will have access to DocView.)	
Names of delivering providers (please list ALL and please double-check spelling). Hospital staff will use this list to access your practice's patients.	
Greenway Site Number	
Contract Signed Date	
Business Association Agreement Signed Date	

Hospitals at which your physicians deliver	
Hospital Name, City, State	
What IP address(es) will our system see	
traffic from for users at the hospital when	
accessing DocView via the internet. (either	
forward this question to a hospital IT	
contact or have them contact us.)	

Application Settings				
Hospital staff see a list of patients that have a				
practice-defined Flag set via Clinical Alert.				
Please use the instructions below to set up a				
flag and Clinical Alert.				
Enter the NAME of the Patient Flag you	(example: Prenatal re	cords ava	il in DocView)	
created:				
List two patient ID's that have this Patient Flag				
set:				
List two patient ID's that do NOT have this				
Patient Flag set.				
Document List: Please indicate which	Document Type	<u>Y/N</u>	Patient ID	
Greenway-defined Document Types you want	Correspondence	Y/N		
included in the prenatal packet. <i>Please include</i>	Custom Note	Y/N		
at least one Patient ID that has these	H&P Note	Y/N		
documents associated with them for testing	Misc. Note	Y/N		
purposes.	Orders Note	Y/N		
	Procedure Note	Y/N		
	Progress Note	Y/N		
	Quick Note	Y/N		
	Triage Note	Y/N		
	Prenatal Flowsheet	Y/N		
	Lab Flowsheet	Y/N		
Please list all Non Greenway-defined				
Document Types (please verify the spelling				
matches the Document Type spelling you				
defined in PrimeSUITE)				
Maximum Retrieved Document Age : <i>e.g.,</i>				
365 days				

Patients with "Restricted" flag or "Sensitive" flag are NOT visible in DocView. Practices wishing them to be visible will need to remove the "Restricted" or "Sensitive" flag.

Flag and Clinical Alert Setup

- In Registration / Patient Flags Administration, click the Clinical Alerts tab
- Click the Plus sign to create a flag
- Select Category "Clinical Alerts"
- Enter a label for the flag, anything will work but we recommend something like what is shown
- Hit the Right arrow.
- Pick an image and save the Flag

Create a Clinical Alert

On the Chart Clinical Alerts window, set up the Clinical Alert with values like shown (or specific for your practice if desired).

Preview Alerts

Alerts	Alert Tune
