About this catalog

We are pleased that you have chosen to use Vyaire Medical products.

The Vyaire product portfolio for Respiratory Diagnostics ranges from small mobile devices to large pulmonary function laboratory devices. As a result there is a variety of consumables and accessories associated with each specific product. This catalog is designed to ensure that you find the correct consumables and accessories for the specific piece of Vyaire equipment you are using both quickly and effectively.

For ease of use the catalog has been divided into three hierarchical levels:

1. Level 1, functional areas such as Pulmonary Function Testing, Cardiopulmonary Exercise Testing, etc.
2. Level 2, subdivides the functional areas into specific device names. Look for the name of your device. If the device name is not very clear, the device overview on the following pages will give you assistance.
3. Level 3, is a further subdivision of the devices into their measuring applications or product groups e.g. Spirometry.

An index directory at the end of the catalog can also be used to search for all consumables and accessories listed in the catalog.

An order form can be found in the back of the catalog. Should you use your own order forms we ask you always reference the Vyaire product part number and item description to ensure there is no confusion and orders are processed in a timely manner.

Vyaire consumables and accessories are medical products and are designed, selected and validated specially for Vyaire devices. Please use only the original consumables and accessories from Vyaire to ensure accuracy of results and patient safety.

We are happy to hear from you.
