Practical Exposure in Finance & Equity markets

We strongly believe that investing in equity market is an **art** & to be a flawless artist, **knowledge is the key**. If you look for career in Finance or wish to excel in the world of Equity, you got to consider endless parameters before selecting stocks.

If you plan to be an Investment banker or an Equity research analyst, you will need practical exposure to stock markets where in you have actually worked on data of real companies. Merely having a CFA degree or CFP degree is not going to help your cause.

The success mantra to become the
BADSHAH OF DALAL STREET
is here for you

HIGHLIGHTS

The programme will be spread over a period of **2 months** involving **15 study sessions** of extensive learning by doing number crunching of more than **125 listed stocks**

At the end of each session you will get a chance to discuss your assignment with **KP Sir**

f At the end of the session, you will be given opportunity to conduct **research on 5 stocks** with inputs from **KP Sir** & if your research work meets our standards, It will be published on our **Investowise Page** giving you recognition across thousands of Investors.

So what are you thinking about?
if Finance is the profile that excites you, this is the golden opportunity

*Bridge the gap
between knowing
finance & applying it*

- ⇒ **Companies look for practical exposure in giving you front end roles.**
- ⇒ **Degrees can only help land you in back end jobs of reports compilation.**
- ⇒ **A combination of degree + exposure of real market can surely be a lethal combination & will help you grow leaps & bounds.**
- ⇒ **Needless to mention, we are there to offer you 100% support post program as well as learning can't be confined to a specific duration**
