WORK EXPERIENCE

Unity Technologies

Austin, TX

Technical Program Manager– Licensing and Unity Hub

November 2023-Present 2023

- Modernized the License Management solution by migrating serial-based license keys to identity-based license entitlements, supporting new business models, bundling products, and meeting compliance requirements resulting in revenue of \$10M.
- Drive Beta and GA releases of the Unity Hub by managing Jira sprint plans and generating internal and external release notes to keep customers informed of major and minor changes to the technology, allowing greater insight into how to take advantage of new features for project management.
- Increase seat count of Enterprise customers by facilitating feature releases in the Licensing Client that provide access to an administrator dashboard to manage licenses, extended support, and meet the strict date privacy requirements of government organizations and large customers.

Unity Technologies

Austin, TX

Program Manager– eCommerce and Creator Experience

December 2020-Sept 2023

- Strategically select, drive, and monitor initiatives by implementing repeatable, consistent, and proven agile project/program management frameworks that improve the overall performance of our organization.
- Enhanced the integrity of initiatives being carried out by reviewing their user and business value, managing dependencies while monitoring the coherency of the overall program against Objectives and Key Results.
- Perform resource allocation and create RAID logs, Project Plans, Project Schedules, change management processes and tools to efficiently lead status meetings and delegate action items; contributing to the production release of several products onto the eCommerce website.

HID Global

Austin, TX

IT Program Manager– Finance and HR

September 2018-March 2020

- Administered processes, procedures, and standards for Subscription functionality by leading cross-functional teams to identify and resolve escalated issues, document critical business processes, and communicate critical program-related events.
- Manage risk and issue logs to remove roadblocks and plan for known and unknown challenges that impact scope, schedule, or costs of project delivery; providing appropriate guidance on project tasks, and aiding stakeholders with information to make decisions that positively influence business objectives.
- Perform resource allocation and create RAID logs, Project Plans, Project Schedules, change management processes and tools to efficiently lead status meetings and delegate action items; contributing to the production release of several Cloud SaaS based solutions to support Global Recurring Revenue Program corporate defining objectives.
