

Retinal Evaluation Information

You will be asked if you will be doing one or both of the screenings we have to check the health of the eye by looking at the retina

Optomap Retinal Imaging: This service is available at the **Oxmoor Center, Jefferson Mall and Hamburg Pavilion**

OCT(ocular coherence tomography): Only available at **Oxmoor Center and Jefferson Mall.** It will be coming to Hamburg soon!

Best option is Optomap in a retinal exam during the current health situation. The dilation is closer contact with the patient

THE NEWEST TECHNOLOGY FOR EYE HEALTHCARE

We have state of the art technology which can screen for glaucoma, macular degeneration, diabetes, high blood pressure, retinal detachments, retinal holes, retinal tears, ocular melanoma, and other ocular pathology.

- OPTOS Retinal Imaging:** This is used widely as an alternative to dilation where we take a picture of the back of your eyes. We keep a record of these pictures for future exams to better evaluate the health of your eyes. This process is painless and has no side effects. The fee is only **\$39.00**
- Optovue OCT:** OCT technology generates high-resolution, cross-sectional and three-dimensional (3D) images of the retina, optic disc and anterior segment, to give your Optometrist valuable information that aids in the diagnosis and management of a range of ocular diseases **\$29.00**

Combine the two if possible! It is the **Best** option to **prevent damage, detect, evaluate and manage eye disease**

- OPTOS retinal imaging + OCT only 49.00
