

Well, here we are at the beginning of February. We survived the Holidays and the New Year. Most of us are thankful that 2021 is over and are looking forward to a happier and healthier 2022. The gyms are filling up and diet programs are constantly being offered on TV. Many of us are working on changes to improve our health.

This is the time of year I often remind everyone, that believe it or not, trees are getting ready to pollinate. I noticed the other day that some of the trees in my neighbourhood are showing buds getting bigger. It is not too early to start working on those springtime reactions to pollen. In the last few years, I have noticed people starting to react to tree pollen as early as the end of February.

So you say, "There is still snow on the ground and it is freezing outside! Why bother thinking about pollen now?" Well, I'll tell you, once we work on you for pollen, IT CAN

TAKE UP TO A MONTH OR MORE for your body to dump the associated toxins. So I encourage you to get a headstart working on those springtime pollen allergies in order to reduce or eliminate your reaction.

SPECIAL ONE-TIME EVENT OFFER

BIOSCAN and/or BEMER Experience

For the month of February, we will be offering a BioScan Full Body Check-Up for a special price on Fridays. In less than a half hour, we will do a 150-point total body assessment BioEnergetic Scan for \$60. This will evaluate from the inside of your cells all the way out through your skin and give us detailed information about every system in your body. NOW is a good time to PREPARE FOR THE SPRING SEASON. Let's get an update on how you are doing! Family and Friends are Welcome to participate.

On SATURDAY, FEBRUARY 26TH, we are offering BOTH BioScan and BEMER appointments for you to experience.

YOU CAN RESERVE YOUR 30 MINUTE \$30 INTRODUCTION TO BEMER WITH PAT BUSCH! BEMER APPOINTMENTS ARE FOR Saturday, FEBRUARY 26TH ONLY.

BEMER is a FDA-approved Class II medical device used in many hospitals and clinics around the world. It is non-invasive and enhances circulation. It is often used in conjunction with many other therapies, further increasing

their effectiveness. We find it very effective with clients who suffer from circulation and stress-related issues. Do any of the following sound familiar: high blood pressure, back problems, diabetes, neuropathy, digestive issues, breathing issues and many more. Increased circulation means increased nutrition and oxygen to your cells with a more thorough detoxification effect.
