			Subsequent Consultation	0.75	0.75	\$339.75
Podiatry	\$229	\$132	Consultation	0.5	0.25	\$147.50

Important Notes

Direct Activities: These services include direct participant consultation and/or clinical support, travel to and from the participant within the unit-costed rate. These components are bundled into the hourly rate to ensure clarity and consistency in billing.

Indirect Activities: These are services where the health professional's expertise is applied outside of direct participant contact. This may include the time taken to complete an accurate progress note and reports, produce clinical reports to other service providers, participate in case conferences, or develop clinical programs or guides for participants or carers.

GST Treatment: Rates listed in this document are exclusive of GST unless otherwise stated. GST will apply where services are provided as a subcontracted service to another organisation in accordance with current ATO guidance.

Unit Pricing and Billing Structure: Where a service includes both direct and indirect activities, the total service price reflects the combined time allocation based on the unit prices listed above. When service delivery exceeds the standard service duration, additional time will be billed in 15-minute increments. This approach supports flexible and accurate billing in line with the complexity of the service and the time required for both direct and indirect clinical activities.

Service Cancellations: To ensure fairness and continuity of care, the following applies to all scheduled services. A cancellation fee equivalent to 100% of the scheduled face-to-face service time may apply where:

- A participant cancels a scheduled service with less than **2 business days' notice** (late cancellation, or
- A participant is not present at the agreed time and location for a scheduled service (no show).

Cancellation fees may be waived where reasonable grounds are provided, such as emergency hospital admission, a significant health incident, or loss of a loved one. Super Rehab may exercise reasonable discretion when determining whether cancellation fees will apply.

Parking Fee: If free parking is not available at or near the participant's home and our clinicians are required to pay for parking, the full parking cost will be added to the allied health service invoice. Parking in shopping centres may not be suitable due to safety considerations and the time required to access large complexes. Our clinicians will use the most practical and accessible parking available when attending a visit.
