## Technical Plating, Inc. Is One of Top Finishing Shops in North America

*Products Finishing magazine names Technical Plating to its 'Top Shops' list for 2019*

CINCINNATI, Ohio – Technical Plating, Inc. has been named one of the best finishing shops in North America for 2019, according to an industry benchmarking survey conducted by *Products Finishing* magazine, a trade publication which has covered the industry since 1938.

The magazine conducted an extensive benchmarking survey that analyzed hundreds of finishing companies in several different areas, including Current Finishing Technology, Finishing Practices and Performances, Business Strategies and Performances, and Training and Human Resources.

Only the top 50 shops were given the honor of being a *Products Finishing* magazine 'Top Shop' for 2019 based on a scoring matrix in those four criteria.

"Tech Plating has established itself as one of the best finishing operations in the industry," said Tim Pennington, editor of *Products Finishing* magazine. "The criteria we used was very stringent, and only the top finishing shops that excelled in all four areas made the list. Technical Plating is in rare air when it comes to finishing operations."

Technical Plating, Inc. is located at 8760 Xylon Avenue North in Minneapolis, Minnesota and offers Tin, Tin/Lead, Electroless Nickel, and Passivation to high tech clients across the country.

"We are extremely excited and pleased to be named one of *Products Finishing* magazine's 'Top Shops'," said Bryan Thomas, owner of Technical Plating, "Our employees and management team have worked very hard to be the best in the industry, and to provide our customers with quality service."
