Eratosthenes appears very properly to have called the above invention a sieve; for in it the composite are separated from the incomposite numbers, just as in a sieve, the pure is separated from the impure, and that which is subtle from that which is dense and gross.

This diagrammatic sector represents the major gradations of energy and substance between elemental earth and absolute unconditioned force. Beginning with the superior, the fifteen graduated spheres descend in the following order: Limitless and Eternal Life; the superior, the middle, and the inferior Empyrean; the seven planets; and the four elements. Energy is symbolized by Fludd as a pyramid with its base upon the concave surface of the superior Empyrean, and substance as another Pyramid with its base upon the convex surface of the sphere (not planet) of earth. These pyramids demonstrate the relative proportions of energy and substance entering into the composition of the fifteen planes of being. It will be noted that the ascending pyramid of substance touches but does not pierce the fifteenth sphere--that of Limitless and Eternal Life. Likewise, the descending pyramid of energy touches but does not pierce the first sphere--the grossest condition of substance. The plane of the sun is denominated the sphere of equality, for here neither energy nor substance predominate. The mundane monochord consists of a hypothetical string stretched from the base of the pyramid of energy to the base of the pyramid of substance.

In this diagram two interpenetrating pyramids are again employed, one of which represents fire and the other earth. It is demonstrated according to the law of elemental harmony that fire does not enter into the composition of earth nor earth into the composition of fire. The figures on the chart disclose the harmonic relationships existing between the four primary elements according to both Fludd and the Pythagoreans. Earth consists of four parts of its own nature; water of three parts of earth and one part of fire. The sphere of equality is a hypothetical point where there is an equilibrium of two parts of earth and two parts of fire. Air is composed of three parts of fire and one part of earth; fire, of four parts of its own nature. Thus earth and water bear to each other the ratio of 4 to 3, or the diatessaron harmony, and water and the sphere of equality the ratio of 3 to 2, or the diapente harmony. Fire and air also bear to each other the ratio of 4 to 3, or the diatessaron harmony, and air and the sphere of equality the ratio of 3 to 2, or the diapente harmony. As the sum of a diatessaron and a diapente equals a diapason, or octave, it is evident that both the sphere of fire and the sphere of earth are in diapason harmony with the sphere of equality, and also that fire and earth are in disdiapason harmony with each other.

In this diagram Fludd has divided each of the four Primary elements into three subdivisions. The first division of each element is the grossest, partaking somewhat of the substance directly inferior to itself (except in the case of the earth, which has no state inferior to itself). The second division consists of the element in its relatively pure state, while the third division is that condition wherein the element partakes somewhat of the substance immediately superior to itself. For example the lowest division of the element of water is sedimentary, as it contains earth substance in solution; the second division represents water in its most common state--salty--as in the case of the ocean; and the third division is water in its purest state--free from salt. The harmonic interval assigned to the lowest division of each element is one tone, to the central division also a tone, but to the higher division a half-tone because it partakes of the division immediately above it. Fludd emphasizes the fact that as the elements ascend in series of two and a half tones, the diatessaron is the dominating harmonic interval of the elements.

Absolute is the essence of essence. It is Self, independent identity of the individual. Absolute is a self-sufficient power that runs its course through the machine. The machine, although, runs by law, and this Divine Law orders and manifests all that is and that which is not. The Absolute Power is Supreme Law; as Law is sovereign and has power of us All. It has this power as it is due to the fact that Absolute Power Corrupts, and mankind is corruption absolutely.

Why does the Absolute have a condition to Individual which is infinity infinite expression manifesting? It is because the individual is as boundless as space. He is only Absolute within the confines of his own identity. Without the identity, the infinite nothing applies itself and one is with non-being. Non-being exists because we are talking about it right now.

Non-being infinity awareness manifests itself as consciousness in our plane. The Absolute and Relative Infinity can be seen as follows.

Absolute	<	Equal	>	Infinity

-fixed conditions	<		>	-all expressions
-limited	<		>	-unlimited potential
Absolute \neq Infinity	<Absolute	Middle	Relative>	Infinity \neq Absolute

A Wizard's Rule

1.. Do not meddle in the affairs of Wizards, for they are subtle and quick to anger.

2. Short cuts make long delays

3. To find who you are in seeked by "Others", first seek ye Self to reveal to those opposed

4. Grace is Love giving redemption.

5. Never stand in unbelief, for BEING afraid you will face the Sword.

6. To be cut off is to create the Way

7. Reason is Spirit in Form

8. Form is reason in Spirit

9. Never convince the madding Crowd.

This is how quantum states work. It moves in progression to an more advanced state that creates new designs within the quantum state of the atom. Each atom is a universe within itself and contains all of infinite and has the potential to create any form due to the fact that math is absolute and we are the living word. The math and word implied in the states shows how we level and also create new words as we continue to level. Each mathematical number is a signature of the soul and each letter is the soul expressing itself in it's conditioning due to the quantum state that promotes the micro to macro.

$X + Y + Z = \text{Infinite}$

The trinity of quantum states of different variables allows us to see into the maximum limit of infinite. Quantum states require the coordinate X to figure out time and sequence from the initial beginning of becoming.

$X > X + \text{Distance (CDX)}$

Each time the coordinate moves, X moves to $X + \text{CDX}$ which is movement of the initial state to the next state with the velocity and time of CDX. This allows for infinite constructions due to time and velocity from the speed of light moving all in unison.

Quantum states require wave functions to operate. It is the potential reaching a maximum state than exploding and creating waves that go and move throughout space time. When the involution of information is coded at the maximum, the initial state combusts and creates a light wave that emits wave patterns. The potential of finding the variable of the motion of essence requires us to use $T(D)=C$ to figure out the quantum state that is in its rate of disorder so we can see into the macro state what that is occurring in the micro. This allows us to mathematically pinpoint the quantum state of the atom will inducing the macro state at the same time. We learn both things at once. To finalize.

THIRD EYE

Amenti

The Emerald Tablet

In truth, without deceit, certain, and most veritable.

What which is Below corresponds to that which is Above, and that which is Above corresponds to that which is Below, to accomplish the miracles of the One Thing. And just as all things have come from this One Thing, through the meditation of One Mind, so do all created things originate from this One Thing, through Transformation.

Its father is the Sun; its mother the Moon. The Wind carries it in its belly; its nurse is the Earth. It is the origin of All, the consecration of the Universe; its inherent Strength is perfected, if it is turned into Earth.

Separate the Earth from Fire, the Subtle from the Gross, gently and with great Ingenuity. It rises from Earth to Heaven and descends again to Earth, thereby combining within Itself the powers of both the Above and the Below.

Thus will you obtain the Glory of the Whole Universe. All Obscurity will be clear to you. This is the greatest Force of all powers, because it overcomes every Subtle thing and penetrates every Solid thing.

In this way was the Universe created. From this comes many wondrous Applications, because this is the Pattern.

Therefore am I called Thrice Greatest Hermes, having all three parts of the wisdom of the Whole Universe. herein have I completely explained the Operation of the Sun.
