THE COSMIC CALENDAR THRESHOLD

(Adapted from Sagan, C. *The Dragons Of Eden*)

Daniel Reurink
Metemphysics

Key = Entropy = Disorder

Formula = "T (D) = C ".

T = Time

D = Entropy

C = Speed of Light (299 792 458 m/s)

Order Formula = "1 - D"

ABSTRACT:

The idea is to take the time in seconds of the calculated cosmic years and using an algorithm defined by Metemphysics; one can conclude the entropy of the system. Entropy is in a state of disorder and to conclude; we can marvel at its properties of Order which is defined within the premise of entropy. The Entropy is the rate of disorder within the system and the order is the equivalence of the ratio left over from Entropy. Thus we conclude the sequence of a 3 in 1; which thus then uses numerology to combine the 3 digit sequence into 1 number and thus finalizes the numerology of the system. The final digits are the static and dynamic meaning of the logos behind the math. Thus then all 1 (as 100% order) digit numbers are sequenced and added to formulate the premise of these cosmic calendar dates.

Sequence = 100

Numerology = 1

“THE BIG BANG FIREBALL”

**Abstract = “Big Bang “(Unlimited Kinetic Energy Explosion of
Potential 100% Information) aka “ Everything from Nothing”**

The concept of the Big Bang is the idea that within the timeless void of the singularity containing all things and energies of life, explodes after meeting an infinite state of perfect order; hence where the big bang occurs with everything inside the singularity expressing itself through the nothingness of space-time. This was the first order and explosion that created the energies that move the forces of existence from state to state.

“UNIVERSE BECOMES TRANSPARENT”

**Abstract = Creation of Space Time as Completed through Oneness of
Heaven's Order**

The Universe becoming transparent (or visible) is through the explosion of light from the singularity; and when the nodes arrange into a hologram form; the expression creates a matrix in which the density of all things is expressed through the oneness of space-time; which is an infinite ocean of density changing orders within the frame of the cosmos.

“GALAXIES FORM (INCLUDING OUR MILKY WAY)”

Abstract = Reality of Dimensions as Orders within Density of Material

The Galaxies forming within our Solar System is correlated with the premise that the previous Orders of life have been created within the density of space-time. The force of life is given through the creative intelligence that sparks life within the material realm; from the sun's fires we form in light to take shape upon the objective realm of Reality.

“ORIGIN OF THE SOLAR SYSTEM”

Abstract = Space-Time (Astral)

The origins of the Solar System predates back to an order in which the planets have previous life seeded on them. Unfortunately due to events; the space-time explosions of Maldek (planet between Mars/Jupiter) created a system in which life had to leave and thus the Solar System assumed form from the dimension of Space-Time in which we seeded life as the beginning of the play during the halftime show.

“OLDEST KNOWN SURFACE ROCKS”

Abstract = Magick Time Crystals “aka” (quartz) (Orders of Previous Density)

The oldest known rocks are crystals that have bacteria on them from space-time. The result is a harmony of all perfect order which constitutes a relationship to heaven; in which the order of the crystal relates how its pure field can create a resonance of life. The relationship to rocks forming is from the fact that asteroids, crystals and all materials from space-time formed to create a harmonic relationship of codependents that frame existence.

“EARTH DEVELOPS OXYGEN-RICH ATMOSPHERE”

Abstract = panspermia from crystal bacteria to create “Oxygen”

The origin of Oxygen on our Planet is dependent on previous life in infinite forms. These forms created plants which could harness the oneness of densities through photosynthesis; and thus created the spark of life called oxygen one needs to survive. The realm of oxygen is within all planets able to contain life; but is life itself for the planet.
