

AMPK Metabolic Activator

*Revitalize cellular metabolism
and fight unwanted abdominal fat*

Item #02207 • 30 vegetarian tablets

Did you know that belly fat can be hazardous to your health? Fight back by revitalizing youthful levels of AMPK, an enzyme found in every cell in your body. Studies show that increasing AMPK activity causes your cells to stop storing fat and start burning it for energy — which is good, because a major contributor to abdominal fat accumulations is the natural, age-related decline in AMPK.

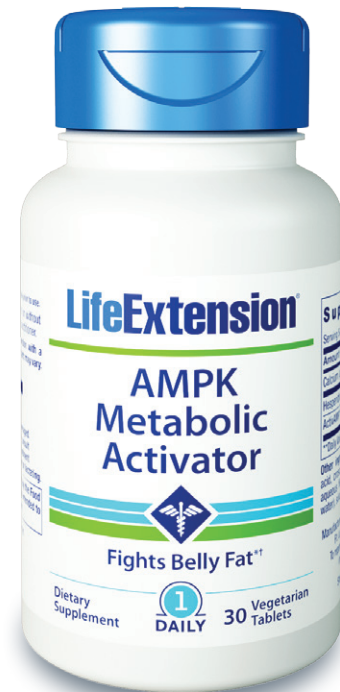

Our new AMPK Metabolic Activator combines the citrus flavonoid hesperidin with ActivAMP® *G. pentaphyllum* extract, two natural ingredients that safely trigger AMPK,^{1,2} in effect telling this unique enzyme to start burning unwanted fat — particularly around your abdomen.^{3,4}

In addition to reducing abdominal fat and activating AMPK, hesperidin helps inhibit circulating hsCRP levels, a major inflammatory factor. It also helps maintain already-healthy cholesterol levels and promotes healthy vascular function. So try AMPK Metabolic Activator — and take the fight against unwanted belly fat to the cellular level.

ActivAMP® is a registered trademark of Gencor.
