

## MacuGuard® Ocular Support with Astaxanthin

*Comprehensive support for eye health and night vision*

**Item #01993 • 60 softgels**

This innovative supplement delivers a comprehensive array of ocular nutrients in a single softgel. Potent ingredients help protect the eyes' macula in a variety of different ways.

The formula includes lutein and two forms of zeaxanthin to maintain the density of macular pigment, the vital part of the retina protecting photoreceptor cells from the harmful effects of excess blue and ultraviolet light.<sup>1-3</sup> The supplement also uses alpha-carotene based on evidence that it helps support the macular pigment.<sup>4</sup>

MacuGuard® is enhanced with astaxanthin which improves visual acuity<sup>4-6</sup> and is shown to protect against free radical-induced DNA damage.<sup>7-10</sup> Another ingredient, Cyanidin-3-glucoside, is a cutting-edge flavonoid extract of European black currant berries that helps address age-related decline of night vision.<sup>11</sup>

One of this formula's most impressive nutrients may also be its most surprising: saffron. Normally used for cooking, saffron also has vision-enhancing benefits. People supplementing with saffron showed improvement in reading eye charts commonly used by doctors to test vision.<sup>12</sup>

Use this comprehensive formula to help safeguard optical health for years to come.

This product is also available without Astaxanthin.
