

# Velocity Subsea 6" ROV Dredger

## Technical Specifications

|                              |                                    |
|------------------------------|------------------------------------|
| Max Flow Rate 60LPM @ 200bar | 8600LPM                            |
| Max Flow Rate 50LPM @ 200bar | 7750LPM                            |
| Suction Capability           | 100 KPA - 60lpm @ 200bar           |
| Hydraulic Requirements       | 50-60LPM @ 200bar                  |
| Removal Capacity             | Up to 75t/hr Depending on Material |
| Max Rock Size                | 140mm                              |
| Weight in Water              | 66Kg                               |
