4. **OPERATIONS REPORT** – See attached report for April 2025
5. **CONNECTIONS REPORT** – (1) 1110 Dietz Road, Windsor Township
6. **VISITORS** – none

WATER AND SEWER – NEW BUSINESS

- York Water has sent us their submission to the PUC on 4/16/25. A counter proposal was sent to York Water Company to provide customer water meter reading data for the Chanceford Manor Village Development to York Water. York Water wants to use this billing data to bill their sewer customers once they have purchased the CMV Sewer System. York Water is still reviewing our counter proposal.
- Entech Engineering has submitted a letter to the PA DEP in response to our Filter Plant Performance Evaluation. Please see this response to the DEP's requests.
- Paddock at Equine Meadows - See attached email. Entech provided surety information. HOA and Developer do not want to provide surety based upon Authority revenue already generated. Discussion concerning dedication of water lines.
- The Aldi Deed of Dedication has been completed. (attached)

- The Greenbranch Generator Project is almost ready to move forward. We have paid Martin Energy the remainder of the balance due on the Cummings Generator, and we are scheduling a preconstruction meeting with the contractors to install this generator.
- The Paddock wants to dedicate their distribution mains to the Red Lion Municipal Authority. We are gathering information to supply to Entech Engineers to determine the Maintenance Bond amount.
- Entech Engineering has sent a letter to the PA-DEP/PENNVEST requesting permission to replace the rest of the water main coming from Edgewood Tank and connecting to the water main on Woodridge Drive. We would finance this additional main replacement with additional PENNVEST money. Entech believes that there is an obstruction in this line which is causing the tank to not drain into the distribution system. The replacement of this portion of the main should correct this issue.
- The Trash Rake at Beaver Creek Raw Water Intake is in need of replacement, it was originally installed in 1996. (29 years old.) Please see the attached quote in your Superintendents Supporting Documents.
- The Hydraulic Cylinder that controls the Bascule Gate at the Cabin Creek Reservoir is in need of repair. Attached is a quote in your Superintendents Supporting Documents from AIS/Heisey Mechanical to remove and repair this hydraulic cylinder.
- Brubacher Excavating will begin the installation of the 6" ductile iron water main extension on Vulcan Road on June 9th, immediately following the Red Lion Boroughs Suds and Song Event. This is necessary to correct the poor water quality issue for the Borough Garage as soon as possible.

Solicitor's Report – See attached report.

Engineer's Report – See attached report.

Superintendent's Report-See attached report.

Review statements and approve bills to be paid.

Executive Session: Employee and Legal Issues Adjournment
