

Making FECO* from tincture

*Full Extraction Cannabis Oil

FECO: Equipment Needed

My Favorite Distiller

First: Pour tincture into Air Still

Then run Air Still and recover recycled alcohol

Return recycled
alcohol to
bottle.

Label!

When Air Still automatically shuts off, open carefully to allow steam to escape.

Cool to safe temperature, then scrape FECO from Air Still into Bonjour double boiler.

Cook double boiler on low temperature until little bubbles stop coming to surface.

**This removes
water from the
FECO.**

Prepare Syringes

Draw FECO into syringes with
large aperture needle

Seal
syringe with
Luer Loc
Cap and
label.

750 ml of tincture yields approximately
10 grams of FECO

Store in cool dark place

Making Salve

Use warm coconut oil to clean equipment and make salve

Heat 12 oz of coconut oil.
Pour into Air Still and double boiler.

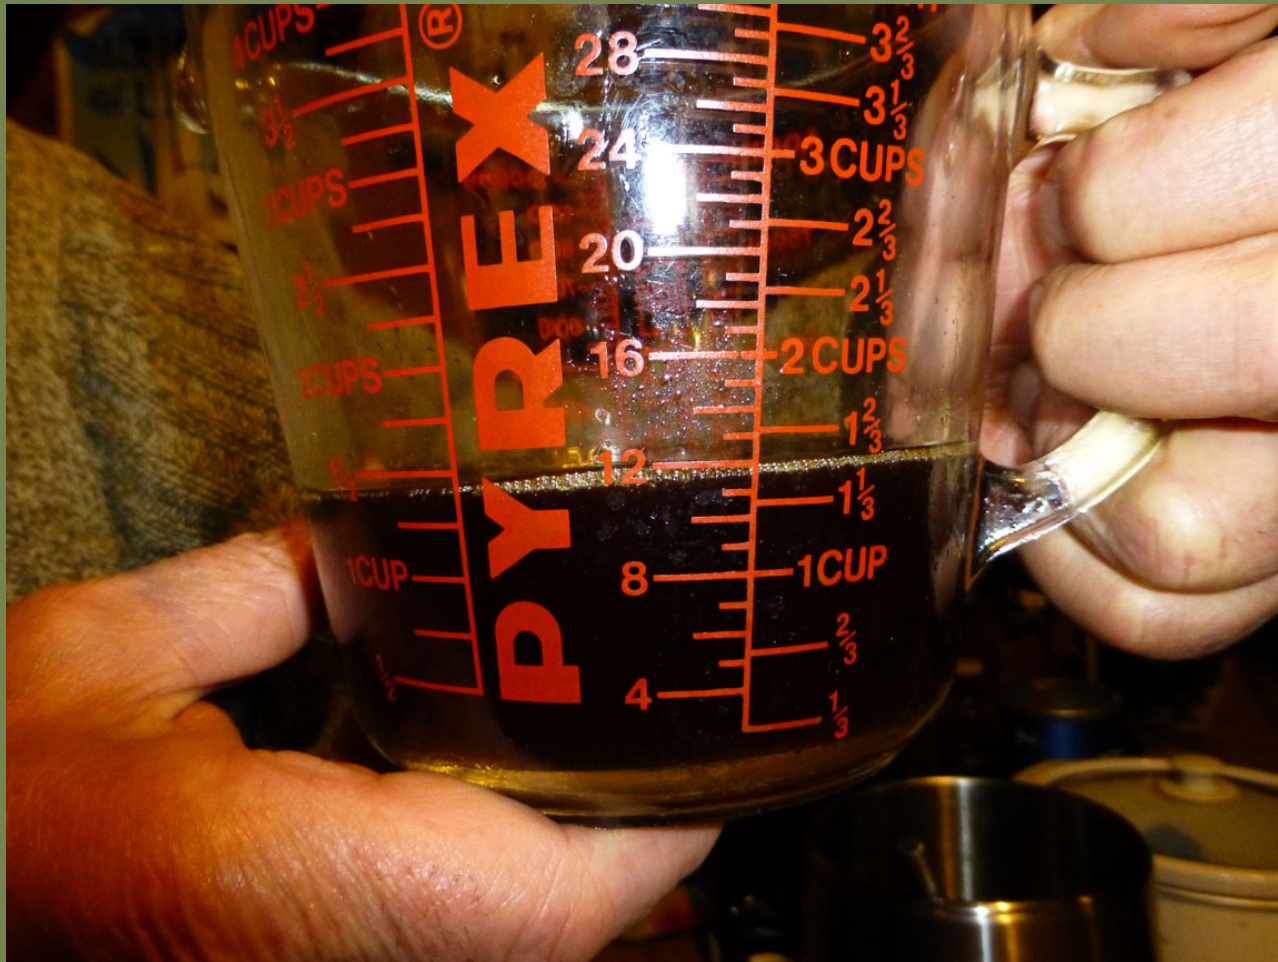

Coconut oil dissolves remaining FECCO.

Mixing warm oil with NutriBullet cleans equipment while making salve.

Yields 12 oz of FECO-infused
coconut oil

Pour into jars

Label and store in cool dark
place

Progression:

Tincture

FECO

SALVE

Homemade medicine heals.
