GOLD MINTING PRESS

ROSS & MOUNT

HYDRAULIC AUTO MINTING PRESS

Our latest automatic coin making machine is designed for fast and precise production of coins & bars in various shapes and sizes. It is equipped with advanced technology that allows for accurate shaping.

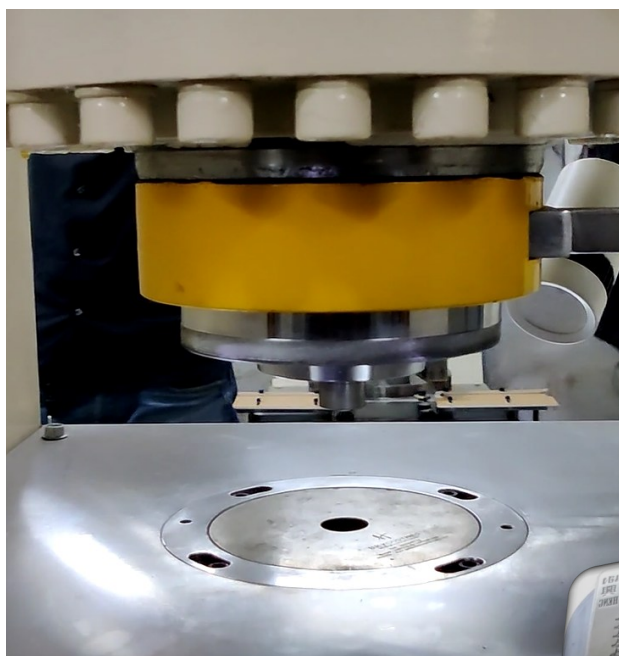

Features:

- Auto embossing & ejecting System,
- Electric operating PLC based control panel,
- Highest possible embossing forces,
- High strokes rate & faster production,
- Multiple strokes with variable force and die lifting,
- Number of pieces embossed information display,
- Touch screen menu navigation,
- High/Low-pressure system having indicator.

SPECIFICATIONS: LP-500-M

- Platen size : 200 x 200 mm
- Opening Stroke : 150 mm
- Max. Force : 600 KN
- Max. Pressure : 200 Bars
- Hydraulic pump : Manual Pump
- Minimum Day light : 20 mm
- Max. Day Light : 250 mm
- Dimensions : 400(L) X 400 (W) x 1100 (H)
- Weight : 2500 Kg

ROSS & MOUNT

The press cuts gold and silver blank sheets that have been processed after rolling. The blank sheet is then cut into the desired shape, such as round, rectangular, pendant-shaped, and more, using a cutting die. This process prepares the blanks to be minted into hydraulic coin and bar stamping presses. This small hydraulic press machine is designed for jewellery production unit adding out with multiple usage benefits for production like

- Bangles sizing,
- Melted gold and silver ingot stamping,
- Hallmarking signs,
- Gold bar cutting,
- Silver paper impressions and signs,
- Pendants etc.

Allows users to stamp logos, texts and other symbols on precious metal coins and bars. With The hydraulic press machine, branding your products becomes easy for different industries.

BY TECHNOLOGY ...

ROSS & MOUNT TECHNOLOGY CENTER

At the technology center of Ross & Mount , Germany . We blooms the innovation powered by cutting edge technology. The engineering system follows the standards in all their designs to ensure reliability at all levels of product designs .

The Ross & Mount products pass through all the extreme testing environments before reaching the equipment's and plants of the customer. Our set of proud customers prefers our products as their first choice for sub assemblies , proves our products reliability and integrity in all our relations .

Our technology team supports our valuable customers in selection of right assemblies , integration supports and Engineering to deliver our customer with engineered Reliability.
