

# FEATURES OF OUR *RaceCar* SIMULATOR RENTAL!

## Vibration, Wind, & Sound

Our RaceCar lets the driver feel every bump, curb strike, and road texture through elite-level force feedback with haptics, blowing wind, and surround sound!

## Hypercool Ventilation SIM Racing Seat

Features six high-flow internal cooling fans—three in the seat base and three in the backrest—to deliver constant airflow where it matters most. Choose between two fan settings and stay cool, focused, and in control from start to finish.

## 6 Degrees of Freedom

Drivers feel Forward/Backward (Surge), Left/Right (Sway), Up/Down (Heave), and Rotation around all three axes (Pitch, Roll, Yaw). This motion racing simulator technology creates the most realistic racing simulation experience possible by replicating the exact sensations you feel in a real race car during acceleration, braking, cornering, and weight transfer.

Each event we use a Digital Leaderboard showing all viewers who has the fastest time around the track. After the event our staff, or the event coordinator, will present a trophy to the champions. This could be a fun and exciting time during the event so get your cameras out!

## RACE RESULTS

|   |            |       |
|---|------------|-------|
| 1 | LeBron J.  | 48.52 |
| 2 | Kobe B.    | 49.91 |
| 3 | Michael J. | 52.87 |
| 4 | Karl M.    | 54.93 |
| 5 | Wilt C.    | 57.02 |
| 6 | Dirk N.    | 58.11 |

## 4K Triple Monitor Setup

Our RaceCar Simulator comes with three curved 55" TV Screens. This makes the driver see everything like a real RaceCar driver would see on a racetrack course.

## Adjustable Pedals and Seat

Allows all drivers a chance to drive.

## Direct Drive Force

Our RaceCar Simulator lets you feel weight transfer, tire slip, and track surface changes just like in a real RaceCar!
