

ULTIMATE GUIDE TO CARDSTOCK

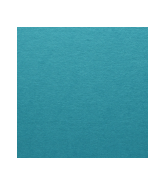

TIPS & TRICKS

- The material selected in Cricut Design Space must match the weight (lbs) or gsm count shown on your cardstock packaging.
- Specialty cardstock like glitter & holographic are listed under **All Materials**.
- When cutting delicate or intricate designs, use the **Cardstock (for intricate cuts)** setting.

- Use a brayer to adhere your cardstock to the mat & remove any air bubbles
- The **Light Grip Mat** is best for light cardstock, vellum & paper, while the **Standard Grip Mat** is best for medium to heavy cardstock.
- To avoid tearing, gently bend the mat & peel it away from the cardstock.
