

Marola Dental Laboratories product Lead/delivery times information

The purpose of this information is to provide insight into our laboratory workflow and production timelines, ensuring timely delivery of our products to you. It's imperative for us to uphold the highest standards of quality while meeting deadlines for your patients' needs. To achieve this, we meticulously plan our work to prevent technicians from feeling pressured to expedite cases.

It is quite important to remember our “full” working days.

Our working days are Monday to Friday **and do not include weekends or bank holidays or collection/delivery days**

Example: If we received impressions either by post or by collection for special trays on Thursday 21st March, the five full working days to manufacture would be: Friday 22nd, Monday 25th, Tuesday 26th, Wednesday 27th & Thursday 28th. The case will be dispatched on Thursday the 29th and you will receive on the Friday 29th either by Royal mail or by hand delivery.
