

Marola Dental Laboratories Lead/Delivery times 2025

The purpose of this information is to provide insight into our laboratory workflow and production timelines, ensuring timely delivery of our products to you. It's imperative for us to uphold the highest standards of quality while meeting deadlines for your patients' needs. To achieve this, we meticulously plan our work to prevent technicians from feeling pressured to expedite cases

Manufacturing days in laboratory

Acrylic and Flexible dentures (each stage)

Bite blocks and Special trays	5 full working days
Wax try-in	5 full working days
Finish	5 full working days

Chrome/Acrylic dentures (each stage)

Bite blocks and Special trays	5 full working days
Wax try-in with chrome frame	10 full working days
Finish	5 full working days

Splints/Mouthguards/Trays	5 full working days
----------------------------------	---------------------

Acrylic denture repairs/additions

Acrylic denture repair	1 full working day
Addition of teeth to existing acrylic denture	1 full working day

Flexible denture repairs/additions

Flexible denture repair	3 full working days
Addition of teeth to existing flexible denture	3 full working days

Please note

Our "Full" working days are Monday to Friday and do not include weekends, bank holidays or collection/delivery days

An example

If we receive your case on Wednesday 21st in our lab requesting a bite block and a special tray for a denture (either by post or collection), your case will follow this timeline as we require 5 full working days in the lab for this stage

Wed 21st	CASE RECEIVED
Thur 22nd	First Full day
Fri 23rd	Second Full day
WEEKEND	
Mon 26th	Third Full day
Tues 27th	Fourth full day
Wed 28th	Fifth full day
Thur 29th	CASE DISPATCHED by delivery driver (delivered same day) or Royal Mail Tracked 24 (delivered following working day)
