

Complete Mental Status Evaluation Content Validity Expert Rating

The purpose of this survey is to quantitatively determine the content validity of the **Complete Mental Status Evaluation**. A test is considered content valid if items on the test appropriately measure the severity of the condition which may be experienced by the patient.

Directions: Please read each of the test items in the **Complete Mental Status Evaluation**. For each item, based on your clinical knowledge and experience, please indicate (by marking a check) whether the category/item is "Irrelevant/Ineffective", "Relavent/Effective", or "Effective Accurate" - as it descibes each of the symproms and the severity.

Test Category/Item		Irrelevant/Ineffective	Relavant/Effective	Effective/Accurate
