CAGE CODE: 11WZ7 | UET: DSKVELBS7XN3

CAPABILITY STATEMENT

Airborne DefCo is a service-disabled, veteran-owned small business delivering proven acquisition and program management support for government and commercial Aerospace, Special Operations, Intelligence, and International Security Cooperation missions. Our team brings specialized, execution-focused capabilities in jet engine propulsion testing, additive manufacturing, electronic warfare, and military construction; enabling rapid, compliant, and deployable solutions across the full program lifecycle. Our multiple locations, positioned near key military installations in Ohio, Florida, and Oklahoma, provide responsive support when it matters most—**collaborating and deploying success!**

CORE COMPETENCIES

- **Program Management** Success starts at the beginning. DefCo brings extensive experience with requirements planning, budget formulation & optimization, proposal development and evaluation, contract strategy and negotiation.
- **Security Cooperation:** Our experience in Foreign Military Sales (FMS), Direct Commercial Sales (DCS), and Defense Security Assistance Programs enables true coalition success enabling international business partners while extending U.S. logistics footprints and strengthen U.S. industry through increased efficiencies and economies.
- **Graduate-Level Instruction:** DefCo brings a broad range of training experience including experience with the National Defense University's Eisenhower School and the Center for Near East and South Asian Studies.
- **Jet Engine Propulsion Testing:** In cooperation with our Joint Venture Partners at Echelon Propulsion, DefCo brings a history of success in designing, building and operating test facilities for both commercial and military jet engines.
- **Research and Development:** Our near-term R&D focus is on both defense weapons specializing in electronic warfare and the future of propulsion with our emerging hypersonics research facilities.

DIFFERENTIATORS

- **Veteran-Led Expertise:** Founded by retired USAF acquisition professionals with 45+ years working on classified programs supporting SOF, Intelligence, advanced R&D and tactical mission sets.
- **Proven Success:** Deep familiarity with DoD, Intelligence Community, and international security frameworks.
- **Customizable Workforce Arrangements:** remote, onsite or hybrid mechanical and/or software engineering support.
- **Certified and Secured:** JCP, CMMC, ITAR, SDVOSB. DefCo is committed to security and compliance.

FACILITIES & LOCATIONS

- **Findlay, Ohio** (Proximity to Wright-Patterson AFB and NSWC Crane): 13' x 13' x 35' Anechoic Chamber with X-band Radar (recently refurbished), Additive Manufacturing Capabilities, Software Engineering Lab Workstations.
- **St. Petersburg, Florida** (Proximity to MacDill AFB): Close support for SOCOM, CENTCOM, and the 6th Aerial Refueling Wing operations.
- **Edmond, Oklahoma** (Proximity to Tinker AFB): Close support to Oklahoma City Air Logistics Center (OC-ALC).

PRIMARY NAICS CODES

- 332994: Small Arms, Ordnance and Ordnance Accessories Manufacturing
- 541330: Engineering Services
- 541380: Testing Laboratories and Services
- 541611: Administrative and Management Consulting
- 541690: Other Scientific & Technical Consulting Services
- 928110: Public Administration, National Security
- 928120: Public Administration, International Affairs
