

Corporate Emergency Response Training

Protecting Tomorrows Business Today

harry@emergencymanagement-nt.net

Were you aware that under current NT legislation there are up to 19 items in relation to Fire Safety which must be checked each month?

There are 3 additional items to be checked on a six-monthly basis and a further 2 items annually Corporate Emergency Response Training is now offering this service due to an increase in demand by organisations in Alice Springs.

If this is not happening you may be found in breach of the legislation, or should an incident occur it may have a profound effect on your insurances.

What do we do?

Monthly we will attend your premises and conduct the required checks, this will be followed up by a report being emailed to you immediately after the inspection.

Six-Monthly we will conduct the normal monthly inspections as well as the required six-monthly inspections, this will be followed up by a report being emailed to you immediately after the inspection.

Annually we will complete the final inspections for the year, and again you will be furnished with a report immediately after the inspection.

Each report will list any items which require attention and the subsequent items will continue to appear on your reports until rectified.

What Does it Cost?

The cost of these inspections is dependent on the size of the facility and also the complexity of the reporting required as not all sites have every piece of Fire Protection equipment installed. Our pricing starts from as little as \$20.00 per month. These inspections are invoiced at completion of each inspection.

If you would like to know more just complete the attached form and submit it we will be in touch within 24 hours. The initial visit to provide a quote is **FREE OF CHARGE**
