

TAIYO INDIA PVT. LTD.

JAPAN'S NO. 1

For soils, crops, and people of the world

SUP6 & TWIST = WORKS 20% LONGER

- Using SPRING STEEL(SUP6) as our raw material, Taiyo L Type Blade is tough & has longer life.
- Our Original Twist makes the edge wider, which makes the blade life even longer.

REDUCING ENERGY COMSUMPTION

- Using SUP6 enables to make this blade light without decreasing the high performance. This helps to reduce energy consumption while you are working on the field.

DIG DEEP with less Energy Consumption

- This blade can dig deeper than L type.
- Deep digging helps crops to spread their roots firmly.
- SUP6 makes the blade light which leads to less energy consumption.

New Launched

New Launched

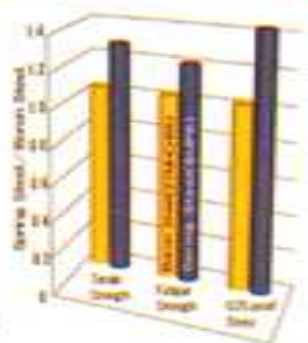

- Best for Paddy & other Field.
