**Swim Club Management Group
North Carolina Executive Order 204
March 31, 2021**

North Carolina Governor Roy Cooper issued Executive Order 204 on March 23, 2021. EO204 relaxes several of the protective actions taken by the State of North Carolina to address COVID-19 but the announcement is not a complete “re-opening” despite the hope that this may be the last season we consider COVID restraints at all. Below is a list of specific items that relate to our clients and facilities managed by Swim Club Management Group. This includes feedback that we have received from some clients in the last week regarding the restrictions should you currently be evaluating how to manage COVID restrictions at your facility during this time.

Pools:

- Outdoor pools can return to 100% maximum occupancy as determined by fire code.
- Indoor pools are limited to 75% of maximum capacity as determined by fire code.
- Face coverings must continue to be worn outside when social distancing is not possible unless actively swimming, eating or drinking or another exception applies.
- Swim Team Competition: Events with spectators (like swim team events) are limited to 50% of maximum occupancy as determined by fire code and a face covering unless an exception applies.
 - Follow the Core Signage, Screening and Sanitation Requirements.

As we continue the preparation for a second successful season in a Global pandemic, we are seeing our clients take a thoughtful approach to re-opening with the continued goal of limiting the exposure of COVID. Below are some of practices we are seeing implemented in practice at our client locations.

General Operation:

- As in 2020, SCMG will continue to screen all employees prior to shifts, and masks are required as part of their uniform.
- Many of the clients implemented a registration system in 2020 to limit the number of guests at the pool (to allow for capacity and distancing) have chosen to continue this practice despite the increase in occupancy.
- Many of our managed facilities have still opted to eliminate furniture from the pool deck or, at a minimum, reduce the amount of furniture to encourage social distancing despite this recent announcement.
- Core signage at all facilities should be posted to reflect the social distancing and mask wearing requirements. As noted in the order, face covering will be required when social distancing cannot be attained, and the pool deck is no exception. Masks will not be required when actively swimming or when another exception exists as noted in the order. To the extent that facilities choose, many also provide full sanitation stations to disinfect high-usage areas which will contain the minimum sanitation requirements as noted in the order.

Swim Meets:

Facilities that host swim team competitions are eager to continue this tradition, but many will be making changes to the traditional meets. Below are some of the approaches we are seeing this year:

- Virtual swim meets are now being planned with each swim team planning to compete at their home facility against a competing team on a virtual level.
- Traditional Swim Meetings are being limited to small groups on the pool deck at any one time. For example, only competitors of one age group are allowed on the pool deck at one time to minimize close contact. To further minimize the number of attendees, some facilities are allowing one parent on the deck with their swimmer or requiring parents to remain in their vehicle during the meet. Upon completion of the heat, the swimmers must clear the pool deck to relieve the capacity limits.
- Other facilities are opting to not participate in swim team competitions at all to continue to take a more conservative approach for their members.

While the CDC has stated that there is no evidence that COVID-19 can be spread to humans through treated waters, SCMG continues to encourage our clients to follow safe swimming practices along with social distancing and everyday preventative actions including promoting the frequent use of hand-washing and hand sanitizer (with at least 60% alcohol for all members) to prevent the spread. SCMG is available to support our clients in any decisions you make to open your pool facility this year. We will work to provide the latest information as conditions change, Executive Orders are released, and industry best-practices are established. If you have any questions or concerns, please reach out to your local contact.

*Face Covering Exceptions: Here are some potentially relevant exceptions which would not require someone to wear a Face Covering per Executive Order 204:

- The person should not wear a Face Covering due to any medical or behavioral condition or disability.
 - The person is under five (5) years of age.
 - The person is actively eating or drinking.
- The person is seeking to communicate with someone who is hearing-impaired in a way that requires the mouth to be visible.
- The person is exercising and is having symptoms while strenuously exercising such as trouble breathing, dizziness, or lightheadedness.
 - The person is doing any activity in which the Face Covering could become entangled and a choking hazard or impair vision.

The person is doing activities that may cause the Face Covering to become wet, like swimming or other activities in a pool, lake, water attraction, or similar body of water.
