

## Paradise Meadows Survey:

Over the past several meetings, the concern on continuing speeding has been brought up in discussion. The board is taking this topic under consideration now to put in measures for safety. We thank you in advance if you are driving through the community at a speed of 25 or less and if you are speeding through at a higher speed, we need you to slow down before someone is hurt.

Please mark the items you wish to see be implemented:

I would be in favor of placing speed bumps using the same road materials present. (The average speed hump using a road base is approximately 1600.00 each)

I would be in favor of adding more sign enhancements to the community.

My suggestion would be to add a sign to the gate that would be read when it was closed.

"SPEED LIMIT

25 MPH

Our children and families

THANK YOU!"

Cars will be sitting there waiting for the gate to open and can read the signs then, and even put another one halfway down the front stretch. I believe that most people speed because they don't see anyone on the road and think it is safe. Or they really don't know that the request is to go slower. Speed bumps may cause people to be more concerned about the bumps than noticing people or pets that they should be watching out for (even when going 20 mph).

Other: Please Provide your request- I feel we should add speed limit signs on the entry gate itself. I also think all residents should remind any guests of the speed limit, when they call from the gate. Speed bumps will create braking bumps leading up to the actual speed bump and deep impressions on the backside of the speed bump. Especially on a chip seal road during the summer heat, which create more very costly repairs to our roads. We could also add speed limit signs that have radar and show the driver their current speed. These types of signs are solar powered and average about \$3,000.00

Not sure what the solution is. I don't think the speed bumps will work. Speeders will just speed to the next speed bump. Enhancements to:

NO, I am not in favor of speed bumps, at the cost of 1600.00 per bump and several installed to the tune of 10,000.00 or more in costs. That is ludicrous. I have not noticed a large amount of speeding. With most of the current construction nearly finished, it does not make fiscal sense to spend that amount of money. If residents are the ones speeding, then something else should be done instead.

I would be in favor of adding more sign enhancements to the community.

What time of sign enhancements? Maybe a couple more speed limit signs but what else has been proposed?

XX Other: Please Provide your request: More lighting at the front gate and street entrance.

The people complaining about this need to keep their animals and their kids on their property. The road going through the neighborhood is not a playground or a pasture. If they are so bothered by speeders then they should don a safety vest, a hard hat and get out there and waive a flag to those speeders. I would approve for the payment of a speed radar, a white flag, a safety vest, and a hard hat for those who want to get out there and try to control others. We moved out to the country to get away from the city and don't appreciate those who want to keep adding eye sores to this community.
