- *Skin Shrinkage
- *Lose Inches
- *Eliminate Cellulite
- *Spot Reduction
- *Chin "Tucks" with chin fat
- *Eliminate Muffin Tops Easily
and Effortlessly

How it works

It is a cold laser light, applied directly to the skin, which causes the fat cells to open up and release their "fat" contents, which is the same thing that happens when you exercise. Only the hormones cause the fat cells to release fats when you exercise. The water, glycerol, and free fatty acids leave the cell, and your fat cell shrinks.

This is Safe —It is just a cold laser light, no cutting or invasive procedures. The same process that exercise causes the fat cells to go through, happens from the paddles.

This new laser like technology gives you hope

Have you felt frustrated you haven't lost those 7-23 inches - doing diet and exercise? Lost hope? When you see the fat come off quickly, you will have hope, and be more inspired to make the changes you know you should be doing. Not to mention the health benefits of losing weight.

*Hope for people who exercise and eat right, but still have those problem areas; this can spot reduce trouble areas

*Hope for people who diet and exercise, but it doesn't seem to help them lose weight, and they lose motivation to continue

*Hope for people with cellulite - to smooth out the skin

*Hope for people with excess skin, after losing weight, and they don't want to go in for surgery

*Hope for people who want to see immediate results - for the motivation to make lasting lifestyle changes

*Many patients find it easy to do the right things after they have the results this machine produces for them

Would you ever have dreamed, you could lie there, and have the inches literally melt off you because of shining a high-tech equipment on your belly, thighs, chin or wherever you want to lose fat?

Yes it works. We have a double satisfaction pledge to back it up. But first, how it works: The laser light process is almost exactly the same as exercise, only instead of hormones opening the fat cells (as with exercise), the laser light opens the fat cells - right through your skin! The same stuff comes out of the fat cells, and the fat cells get smaller.

FAQs

How many times do I need it?

9-18 sessions takes an average of 7-23 inches total, respectively - how much fat do you want to lose?

Do I have to do other things to lose the fat?

Only for bigger results - 7 inches with minor lifestyle changes, 18-23 inches with major lifestyle changes, like diet and exercise. We have support if you choose to change your life while doing the sessions.

What do you do to keep the fat off?

Normal things you need to keep weight off - diet and exercise, drinking water, etc.

When can I do it?

We are open early and close late. Appointment times vary depending on availability. Sometimes, there is a wait, so call today.

What Kind of Results are Produced?

12.25 inches AVERAGE-the most lost in 18 sessions is 23 inches. People who make major lifestyle changes are on the higher end of the average, and those who don't, the lower end.

What is Involved?

For the procedure, 3 sessions a week for 3-6 weeks, 45 min per session. You relax in a comfortable position while a trained technician places two paddles and two smaller paddles to the target areas. Then lay back, relax, read, or whatever you like. Then you go to the vibrating platform for exercise and lymphatic drainage.

Where Does the Fat Go?

After the paddles are removed, you move to our state-of-the-art vibrating platform for a short sequence. This will stimulate lymphatic drainage and jump start the weight loss process!

How Quickly Will I See Results?

97% of clients see measureable results after their first session.
