

# The Company

Intercable is a modern, management-operated family business in its second generation.

The Company was established in the early 70s and over the years has grown to become a globally active corporate group.

Being a company with a long-standing tradition, we are deeply rooted in our location in Brunico/Bruneck, South Tyrol.

Our recipe for success lies in identifying and developing niche markets in the technology sector that have a high quality standard and potential for innovation.

As an innovative technology partner we develop custom-designed solutions for a wide range of business sectors and have a worldwide reputation for top quality and reliability.

Extruded  
NextGen Flexible busbars

High  
Voltage

## Extruded Busbar

Material of conductor	Copper
Material of insulation	Polyamide layer
Dimensions of cross-section [mm²]	25, 35, 50, 70 and 90
Nominal voltage [V]	330 VAC, 470V DC (25, 35 mm²) 600 VAC, 1000V DC (50, 70, 90 mm²)
Dielectric strength [VDC]	>3500
Operating temperature [°C]	-40 to 125
