

## 18 Reformation of All Family Services

### Quick Note

The bottom line here is that only, when necessary, we will help a given family unit to stabilize themselves relative to human necessities of proper food and decent housing. To be clear, a family unit can be just one (1) person or many people of various ages.

Then, employment status and opportunities will be pursued and followed up with the person or persons involved.

Unemployment and/or welfare income will be consolidated into a Base Employment Income allotment.

Various food and spending allotments will be realistic and very efficient to distribute and track the use thereof, without being ridiculous!

Teenage girls will be very publicly encouraged not to get pregnant, especially out of wedlock until they are at least 18 years old! And, most importantly that they also have a High School diploma in their hand before such a life-directing event enters their young life.

Birth control will be made available to teenagers as a national law. And a birth counseling class should be given to boys and girls by the 9<sup>th</sup> grade. Not to encourage either way – to inform. Separate classes for boys and girls. Similar, but specific boy or girl content with emphasis on personal responsibility for the act that could yield pregnancy...

I believe that if a teenage girl gets pregnant (out of wedlock) and her parents will be held partially accountable. Regrettably, I have known too many people that would talk to their children about sex, etc. It is an important thing for you to do.

The national goal I to help individuals and families to progress regarding their Quality of Life.

Certainly, to help those that want to help themselves, but need assistance getting it together in the first place.

And certainly, to help those that require a “swift kick in the -ss” to get moving. Those that can work will work – if they are not legally, financially self-sufficient. And seek public income support.

We will surely raise the bottom level of society – with a hand and a job.

See the Info box, below.

**Reformation of ALL Family Support Services**

- This proposal will address many taxpayer complaints about welfare fraud, unemployment fraud, food stamp/WIC fraud, housing fraud, and so on.
- Just as the new Re-Employment System is designed to be a closed-end, individual and family healing program, so will this Reformation be to public support services. Amen!
- Individuals and family units will be strongly counseled regarding their finances, employment options, vocational and education options. As well as in basic life skills, such as managing a checkbook.
- Bluntly put, young women 18 years old and under will be counseled not to get pregnant before they have a High School Diploma in their hand! Was that clear enough?!
- Birth control will be made available to teenage girls, including the “morning after pill” in an act of simply reality. Giving those girls a chance for a better life, frankly.
- We will provide for planned pregnancy prevention, so that we may in some way reduce the demand for abortions.
