

The Kansas City Super Bowl Parade Shooter Meets
the Sandy Hook Obviously Guilty
90-Day Death Penalty Rule

“The SHOG Rule”

by A. J. Wildman

Posted on February 27, 2024

Normalizing and Expediting the Death Penalty Sentencing and Executions of those
Obviously Guilty of the Acts of Murder and Personal Assault

The American Public is way past fed-up with the dysfunctional Judicial Legal Complex (JLC). Herein, we will only look into one of their public failures. Legal industry’s Court system that causes unnecessary civil pain, and promotes social and economic unrest for fun and profit. At the same time, it has not controlled or even significantly reduced either murder and assault rates in our neighborhoods. They are all but functionally useless in preventing crime.

Historically, criminals will alter or even stop their illegal activities only when the cost of committing a given crime is higher than the risks, they are willing to take. The SHOG Rule means that American society is declaring to the criminal community that certain crimes against our people will now become an immediate and terminal threat to their life!!!

Our civil society now Demands real rules and true punishment to back them up in certain cases.

- We the People, have had enough of the Judicial Legal Complex (JLC) dragging out trials and delaying or preventing the Public’s real justice from ever being applied.
- Once convicted in a standard court trail and found guilty on absolutely Obvious evidence, the criminal will receive the DP sentence. That execution will then be carried out within 90-days after sentencing.
- Federal law will override any State laws now prohibiting the use of the DP.
- Starting with this proposed SHOG Rule action by State of Missouri, a given State’s singular role will be to certify a criminal’s “Obvious Guilt”. The sentence will be pre-set and requires no jury action in SHOG Rule cases. The Federal government will be responsible for carrying out the sentence and promptly.

That is it folks. The Keep It Simple Stupid or KISS Method of problem-solving. Now for some unfortunate details.

The Sandy Hook Obviously Guilty 90-Day Death Penalty Rule

The SHOG Rule

This is a most serious matter, my fellow Americans. And we all know it!

My viable Death Penalty proposal has had many titles over the years. However, this one is the most fitting and demanding of proper action. It honors for the 20 first and second grade babies that were taken from their families forever.

This will be the public's first Reform legislation targeting our failed Judicial Legal Complex (JLC). The logical reform of the totally abused "unanimous jury" trial procedures will follow!

This common-sense Judicial Reform would soon become federal law and will supersede any and all Death Penalty related laws, statutes, etc., now in force in all 50 States, and Washington, DC (DC). That includes all 40 States that have legislated against the use of the Death Penalty at some level.

The Police officers that I have talked with about this Reform – love it. They told me that in well over 50% of murder cases there is simply no doubt "who did it". The benefits of orchestrated divide and conquer politics against the practical use of the DP will no longer be used to protect murderers from the People's Justice! The defense lawyers lose. Amen.

We the People, Demand that the Death Penalty (DP) administered via pill or lethal injection be brought back into active and aggressive nationwide use. The People's justice will be applied to a few heinous free-will crimes. More crimes will be added to the list.

This SHOG Rule will be applied – whether or not an insanity plea is approved or not. Of course they are insane. However, if they killed someone once – they will also die!

This approach will likely earn the nickname of, "*one and done*" and the SHOG Rule, of course.

The Prime Civil Offense – Murder. The grim mass-murder at Sandy Hook Elementary School is the spiritual name for this legal Reform. It applies to all the ways of taking one or more lives. With a gun, knife, bare hands, brick or a #4 pencil – murderers will pay for their actions and sooner rather than later.

I was both personally surprised and disgusted when I researched the current human numbers behind the Liberal movement against use of the Death Penalty. It began honestly as a movement to prevent innocent people from being falsely accused, convicted, and executed. That is only right. However, over the years it mutated into a "no death penalty" movement, which has done far more harm than good. Unfortunately, today some 40 states no longer allow it at some level.

Now for human numbers.

A recent national statistic shows that on average some 44 of our fellow citizens are murdered every day in America! Unbelievable! The lowest one-day body count is six (6) and the highest is ninety (90). An incredible waste of people.

So, let's go with 44 murders-a-day times 365 days-a-year equals 16,060 murders per year on average. So just for the sake of this discussion let's say 50% or 8,030 should have received the DP for their heinous actions. Key words there were "should have".

In the year 2022, 18 death row inmates were executed in the United States.

2023 is the 9th consecutive year with fewer than 30 people executed (24) and fewer than 50 people were sentenced to death (21). Also, unbelievable!

The stats according to the Death Penalty Information Center.

It is certainly making those that run jails and prisons for profit, a steady fortune.

As I will review below, the Marjory Stoneman Douglas High School shooter in Parkland, Florida slaughtered 14 students and 3 adults and received 17 life sentences, only 3 sentences were without the possibility of parole. No Death Penalty was granted because the jury could not reach a unanimous verdict on it. Under SHOG, the jury will finally be totally removed from the decision process in these cases.

To be clear, a nation where someone can act to kill 17 human beings, with 14 of them being students and not receive a swift death penalty execution – is a nation without Justice. Starting with the Kansas City Parade shooter, We the People, Demand the SHOG Rule for such murderers.

We will act to reverse this initially well-intended effort that is now doing far more harm than good for our society.

Further, I personally believe we must consider that the SHOG Rule could even be applied retroactively in many active cases. Many cases that are in process and even some already closed. Time will tell. Granted this common-sense Reform will bring on a furious and loud public outcry by the Screamers, Progressive Democrats, and the lawyers. That will soon pass. Again, at least 65% of Americans are fed-up with our current in-Justice system.

Finally, we will need to begin consolidating and working on shutting down all Maximum-Security Prisons (MSP). You know, where the JLC warehouses the types of hardened men and women that were so well-represented in the movie, "Con Air" with Nicolas Cage! Those prison facilities will be repurposed and staff will be reassigned.

The costly practice of "for life" warehousing of such criminals that should be dead and buried. The existence of such facilities is a left-over from well-intended but failed era of anti-DP Liberal legislation. Thankfully, bad legislation is correctable. Again, an example of how we will begin correcting the legislative sins of elected fathers and mothers.

The Second Offense, Pre-meditated Rape. Not to include date rape, that too often descends into he-said/she-said idiocy.

There were 133,294 rape cases reported in the US. Again, that is number reported not experienced. Again, unbelievable! 90% of rapes are done by one person.

Frankly, that is all there is to say on the issue, except that both women and men support this Legal Reform.

An odd, yet practically related policy would be Prostitution. It needs to be nationally legalized. Frankly, the long national Prohibition against Prostitution is just as successful as the Prohibition against Alcohol. I bet you weren't expecting this one!

There some 1 million prostitutes in the US today. Not that legalization would dramatically reduce the incidence of rape, because it certainly would not. However, but it is fair to say that if it only prevented some such attacks, it would be worth it. And the police have better things to do.

Details at CommonSense2nd.com and WildmanforUSSenate.com

The Third Offense, Pedophiles – More often than not when I was reviewing the DP Law with anyone for the first time, I only talked about murder and rape. Then I waited. And, they would very often suggest that I had to add pedophiles to the list. It was already on my list. Both men and women were vehement about it. And rightly so! That is when I knew for certain that the majority of the public supported this aggressive, yet Moderate approach. So, there it is.

Society, Demands JUSTICE.

We, have had enough LAW.

We, now Demand PUNISHMENT and ORDER!

To summarize – We the People, now demand the SHOG Rule in the following cases:

1. Murder by any means, except a true crime of passion.
2. Pre-meditated rape, not date rape.
3. Pedophile crimes.

Further, we will continue to identify and legislate civil candidates for the SHOG Rule. A random list of logical DP candidates would be:

1. Hard drug traffickers across our borders
2. Hard drug distributors within our borders
3. Hard drug local dealers of heroin and fentanyl
4. Identity theft
5. Sex Traffickers
6. Internet Hackers and Ransomware Criminals
7. Financial Scammers
8. Others will be added.

It goes without saying, that this prudent and practical solution to a public problem, will really upset some people. However, this is a publicly acceptable solution for a critical problem in our society. We will have peace in our neighborhoods. Such bad acting men and women will be simply and severely punished for such acts, as they are civilly due.

Have no doubt that the bad men and women will know the rules have changed and definitely not in their favor!

Because for some years now, anyone considering walking into a public or any school, church, grocery, etc., and ending the lives of multiple innocent men, women, and children; doesn't see the DP waiting for them. Or at least for years or decades to come.

And, why is that? Simply because the lawyers of the dam Judicial Legal Complex are still making their living getting paid by the hour.

I tell you America. We the People say NO MORE!! At least 7 of 10 Americans will vote for this in a heartbeat. That is a majority. So, let's do it!

A note to those that might think this a bit harsh. This is not a harsh action. The sad fact is that it took so long to correct this particular legislative sin of our Federal and State elected officials.

Correcting Past Well-Intended Legislative Sins

We will begin correcting this *legislative sin* that was unintentionally, but still committed by our legislative fathers and mothers. Yes, ladies’ with equal opportunity means equal responsibility.

Society cannot exist and hope to grow without commonly practiced rules for civil behavior.

There is human pain from years, if not decades, of endless legal games, the expense of multiple trials, witnessing, and re-visiting crime scenes. Yet, there is the certain pain that lingers until the act of closure may be granted the victim’s family and friends.

I submit to you that closure in the case of a murdered loved one, cannot be fully realized until the person that took that life is also deceased – one way or another. Not until that basic civil expectation in a supposedly lawful society, is discharged.

Such a civil expectations may only be satisfied via the expedient trail, conviction, and timely execution of the DP criminal. The Public’s verdict and Demand are, “No mercy was shown, and none shall be granted”.

Not an *eye-for-an-eye* as the *Old Testament* calls for.

It is a *death-for-a-death* as a civil society now Demands.

The parents and families of those precious 12 little girls and 8 little boys (ages 6 and 7) at Sandy Hook were scarred forever. Most of them were shot more than once. A parent should never lose their child, especially, in such a shocking and horrifying manner. There is no greater pain that a mother or a father can be struck with. The inner pain that can become dulled somewhat over the years, but is not quieted until indeed their own life comes to an end. When they can mourn no more...

And we can only wonder what special pain is felt by a grandmother or grandfather upon losing their precious grandbaby.

Further, in the case of Sandy Hook Elementary School, 6 school women teachers also lost their lives and their loved ones had to deal with that sudden tragedy. Also consider, the parents of those 6 women that lost their lives that dreadful day – also lost their children. And while they were grown adults when their lives were taken too early – those parents still had to bury their own dear children. Such tears.

In the case of the Sandy Hook nightmare, the killer thankfully also determined to take his own life at the scene. Thankfully, those parents saw that their destroyer had been destroyed. That some physical measure of vengeance had been given them. Only then could their full healing *slowly begin*. Begin without grinding months and years in courtrooms reliving the nightmare and awaiting a final verdict. A jury verdict that because of Liberal/Progressive DP policies, would most likely not grant the DP.

o o o o

Then on February 14, 2018 there was Marjory Stoneman Douglas High School – Parkland, FL

Why do things like this happen on St. Valentines Day???

I will share minimal data on this grave incident. In this mass murder, 14 students and 3 teachers were slain and 17 others were injured. The unfortunate difference between the Sandy Hook and Parkville incidents is that the shooter did not take his own life at Parkland. Too bad for the families and the taxpayers...

What followed was the all-too-typical court circus brought to us by the useless Judicial Legal Complex (JLC). Finally, on November 1, 2022 the jury declared its weak verdict.

The shooter who carried out the Parkland school shooting had been formally sentenced to life in prison and without the possibility of parole. That is, after a jury failed to unanimously recommend the death penalty, both disappointing and angering many of the families of the 17 people he killed. And rightfully so.

The judge imposed a sentence of a minimum of 20 years to serve on 14 of the 17 counts of attempted murder. And a sentence of life without the possibility of parole for the remaining three counts. The sentences are all to run consecutively.

Thus, that piece of publicly certified, 19-year-old human waste will be supported by the taxpayers for potentially the next half-century! Or until a fellow inmate, takes his life...

Let me repeat those DP numbers from the Death Penalty Information Center.

So, let's go with 44 murders a day times 365 days-a-year equals 16,060 murders per year on average. So just for the sake of this discussion let's say 50% or 8,000 should have received the DP for their actions. Key words there were "should have".

In the year 2022, only 18 death row inmates were executed in the United States.

2023 is the 9th consecutive year with fewer than 30 people executed (24) and fewer than 50 people were sentenced to death (21).

Now to the Kansas City Chiefs Superbowl Victory Parade

On February 14, 2024, our nation bore witness to a mindless, mass shooting at a grand public celebration. The Kansas City Chiefs Superbowl Victory parade.

Herein a refer to the Parade shooter as one person, while there could well be at least two of them.

One (1) person was killed and some 20 others suffered gunshot wounds.

Unfortunately, the parade shooter did not take his own life that day. Thus, the typical, drawn-out, multi-year court circus is about to begin.

Instead of that, here is a serious public supported suggestion for the Jackson County, Missouri Prosecutor Jean Peters Baker. The American public requests that you consider this Death Penalty Reform – the SHOG Rule.

o o o o

Now, my fellow citizens disgusted with the court system, it is time for We the People to Demand the first usage of the Sandy Hook Obviously Guilty 90-Day Death Penalty Rule (the SHOG Rule).

We hereby request and challenge the Jackson County Prosecutor Jean Baker, to charge the shooter under this new and very publicly acceptable Reform. We have your back, all the way!

In short, the heartbroken and outraged people of Kansas City, Missouri in specific and America in general want to see this human waste tried, convicted on absolute guilt evidence, receive the American people's only sentence, and be executed prior to next year's Super Bowl! That would prove to be a dam good start! So, just do it.

Thus, the with SHOG Rule seemingly endless hours of courtroom torture for the families and friends will be significantly reduced. Amen to that. Healing from their losses could begin sooner.

The question of his sanity, does not matter. Of course, he is insane. He shot 21 innocent people and killed one of them! Again, no more lawyer games, no excuses, no matter even if he had a miserable life or any other defense lawyer BS. He is obviously guilty of murder. Of ending another person's life.

Because, if we don't join together to get this DP execution process promptly performed on this murdering piece of human waste – he is likely to be sitting in prison next February and watching next year's Super Bowl!! Get it done!

Some millions of taxpayer dollars to be better spent elsewhere. And there will be a jail cell in some prison that will be freed up for another criminal with a lesser charge!

About the Death Penalty

Finally, to the once Liberal, now Progressive folks – those that say the Death Penalty via pill, gas or lethal injection is cruel and inhumane treatment of shooters. I will first say, "No, it is not". And then point-out that they had their way with the DP for decades, and they were horribly misguided. Time to save society from their impractical theories.

Going forward, anyone that walks into a place and begins shooting holes into just one, let alone 15 or 20 innocent children, men, and women – must and will, expect to die. And the sooner the better.

o o o o

The Big Picture of a No Rules Society

Simply question. Please tell me then, WHAT, DOES THE WORD ILLEGAL EVEN MEAN ANYMORE.

That is why gangs loot retail stores across the country. That is also why car theft is a booming business. That is why identity thieves and financial scammers are not caught, tried, and executed. The list goes on.

Remember that lawyers generally get paid by the hour and often have little interest in doing anything fast or even close to fast. Especially, those defense attorneys. Prison worker industries donate to politicians to keep the JLC running just like it is.

Some words to reflect upon:

“Where there are no rules, there is chaos”.

“The only thing necessary for the triumph of evil is for good men (and women and children) to do nothing”.

And, finally by Robert Kennedy,

We know that we cannot live together without rules which tell us what is right and what is wrong, what is permitted and what is prohibited. We know that it is law which enables men to live together, that creates order out of chaos. We know that law is the glue that holds civilization together.

o o o o

My decades of one-on-one conversations with people of all types, descriptions, and attitudes tells me that well over 65% of Americans will support SHOG Rule, as defined herein. Not to say that they will love it, but they look at what is happening everyday and feel this offers prudent and attainable progress.

Therefore, We the People along with the Kansas City Family, hereby Demand that the Justice officials of Kansas City and the Great State of Missouri – act now to make this happen. To use this horrible incident to first deploy the SHOG Rule. And so, to bring this particular worthless piece of humanity to his own near-term date with death. Amen.

And now my personal closing message to my fellow American citizens. The people I write for.

I do this for you and those you love and otherwise care about – and for the other 340,000,000 of our fellow citizens that we shall never, ever meet...

And may God continue to bless America.

Take care out there,

Andrew J. Wildman
