# INTRODUCTION

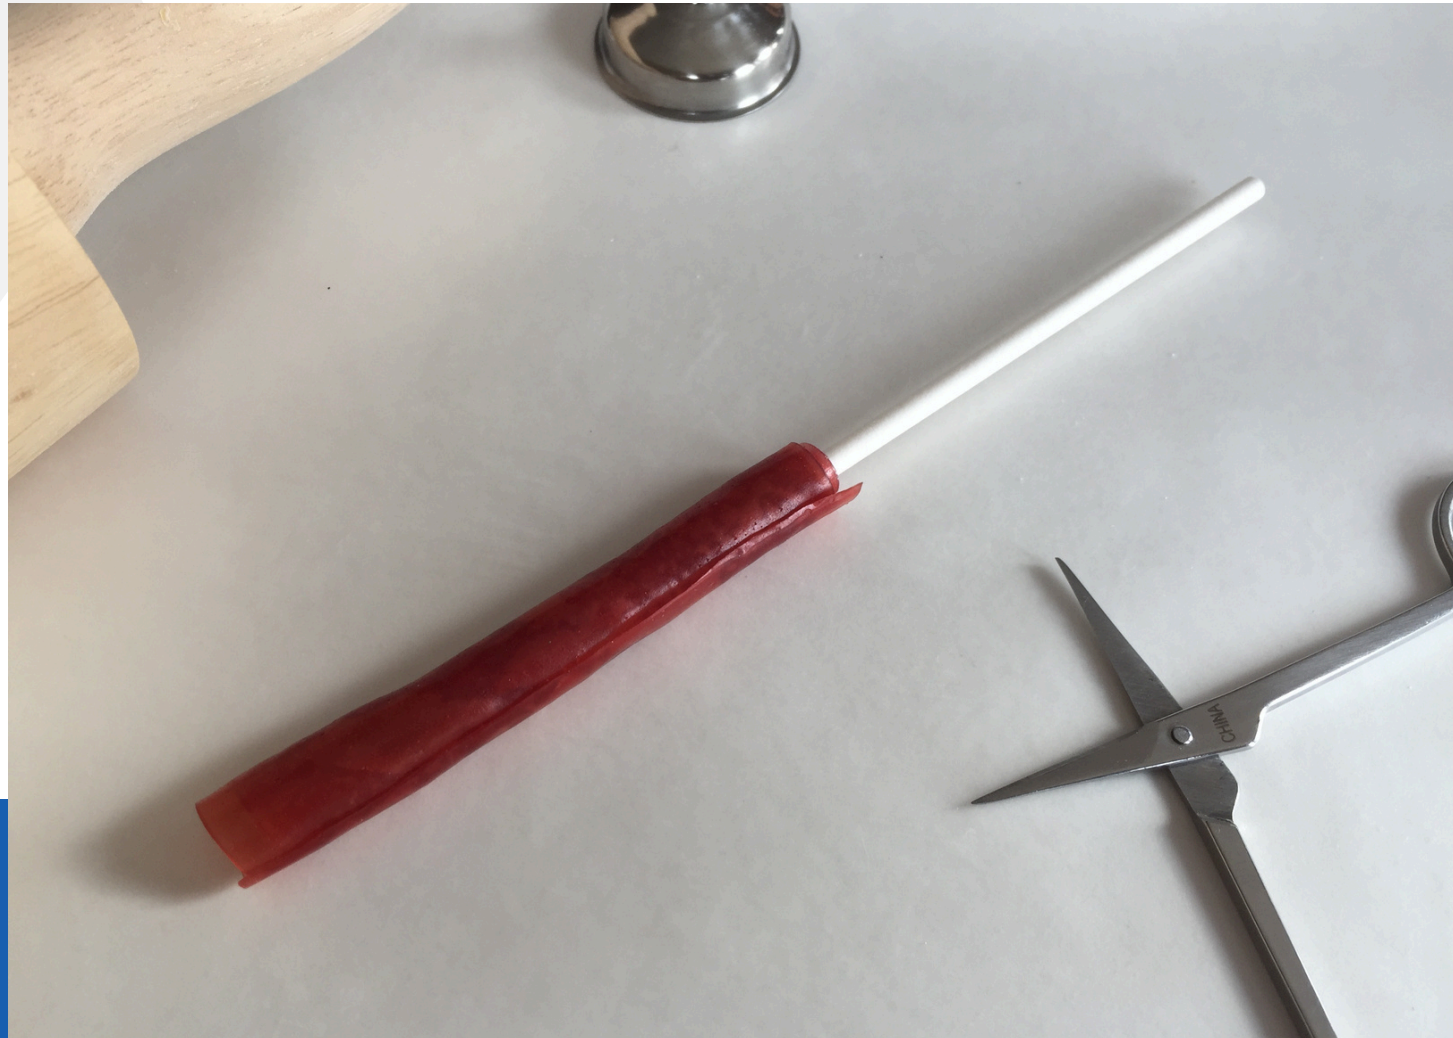

## FOAMING ACTION PHARMACEUTICAL HEMOSTAT

Patent Pending

This FOAMING ACTION pharmaceutical hemostat trademarked as Foam-STAT®, **quickly** stops bleeding in even the most grievous and deep wounds. Foam-STAT® requires no surgical clean out by the surgeon, which can be life saving. Foam-STAT® is the best solution in the field, for accidents, and war injuries for uncontrollable bleeding and internal injuries. Foam-STAT® is a great tool for any “tool box”.

# SIMPLICITY

This “real” demo hemostat is basically clear material.  
For picture illustration red food coloring was used.

Similar to a “popsicle” of gel, is simply removed from it’s sterile pack and inserted into the wound.

Upon contact with blood, Foam-STAT®, foams aggressively to fill the wound and **bleeding is stopped**.

If the wound is large, more Foam-STAT® can be inserted.

Pharmaceuticals included in the foam will spread throughout the wound and treat all tissues and structures.

Nothing is left in the wound, but the foam and the pharmaceuticals.

# BENEFITS

- No foreign matter left in the wound, like competitors.  
(No gauze, No fibers, No sponges ; **NOTHING**)
- Foaming action helps to spread anticoagulants and therapeutic pharmaceuticals deep into and throughout the entire wound.
- Foaming action travels deep into the wound, to stop bleeding faster and begins healing **immediately**.
- Decrease time in Post-Trauma Surgery, due to not having to remove foreign matter. Time is of the essence.

# ADVANTAGES

## FOAM-STAT® IS IMPREGNATED WITH PHARMACEUTICALS TO:

- Stop Bleeding
  - Mitigate Shock
  - Calm the Patient
  - Administer Antibiotics
  - Administer Nano Size Silver for Antisepsis
