Director's Message

Welcome to BRAINY SCHOOL. As we embark upon new journey of growth and learning, we are more than certain that with the help of Allah [s] and your continuous support, we will be able to take our school to the next level. At our end, we shall continue working with you for the best interests of our beloved students and society at large. The school is committed to helping students become responsible for their own actions. A variety of progressive discipline strategies are in place and will be applicable as required. As the BRAINY SCHOOL'S Director, I am willing to do all it takes to make all our schools an outstanding institution, where our

students are nurtured through mind, body, and soul. Such a mission will not be possible to accomplish without the full support and cooperation of our team, our parent body, associates partners and community at large.

I pray that each student at BRAINY SCHOOL will be substantial pillar of Islam, instilled with sweetened taste of Iman, and embellished by the glittering lights of Ihsan. This is my and my team's hope, our purpose, our mission for our children in our existing and future schools.

Regards,

Atiq ur Rehman | academics@thedeerwayschool.net

The Vision

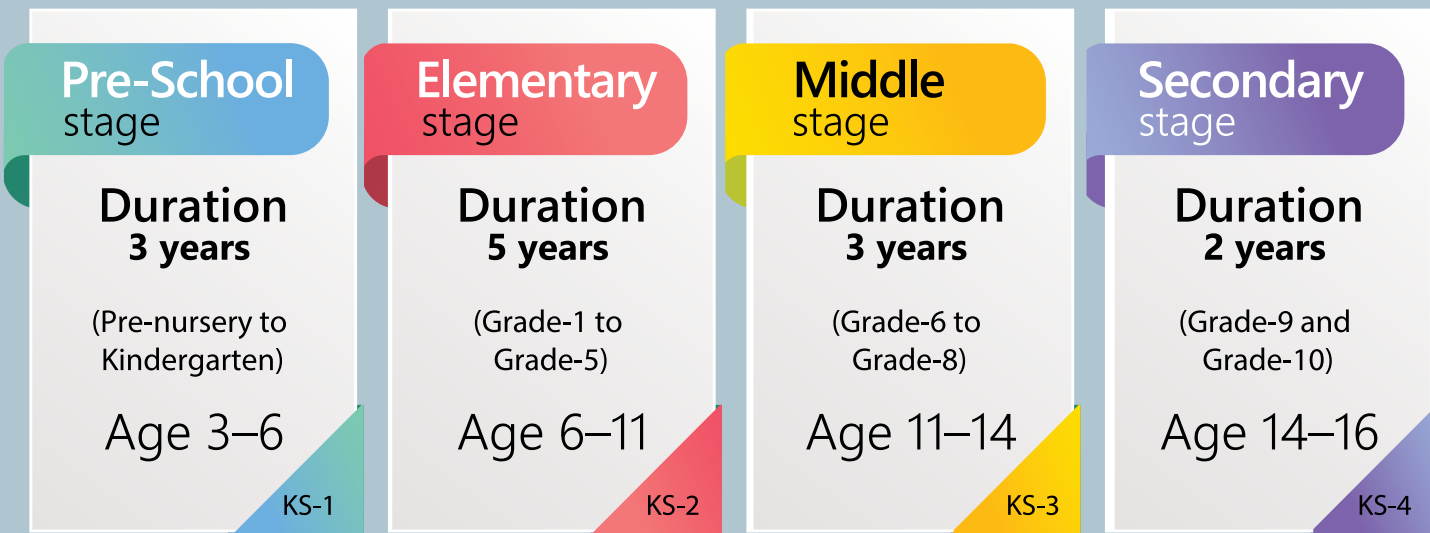

Cultivating lifelong learners with a strong and balanced character who have a clear understanding of their purpose of life, are connected with their Creator, and they serve their Creator by serving humanity.

The Mission

Our holistic education aims to provide the environment for the total and balanced development of every student in every sphere of learning. Directing all these aspects towards the attainment of a conscious relationship with Allah (S.W.T) is the ultimate purpose of life.

The Stages

Your child's time at Brainy School is divided into four key stages.

They will go into the Pre-school Stage when they start schooling. In this stage, which covers their first three years at school, your child will experience well-planned and challenging play that builds on their interests and curiosity. Teachers will encourage them to explore their feelings and emotions and how to work with others. These are basic skills that your child will need throughout their life.

The vital, lifelong skills of talking and listening, reading, writing and maths are also at the heart of the Pre-school stage. Your child will be taught these skills every day in an active and enjoyable way.

Throughout Brainy School, in the Pre-School Stage, Elementary Stage, Middle and Secondary Stage, your child will learn a range of subjects as well as complete Hifz-ul-Quran and develop important skills for life, such as being able to solve problems or to use technology.

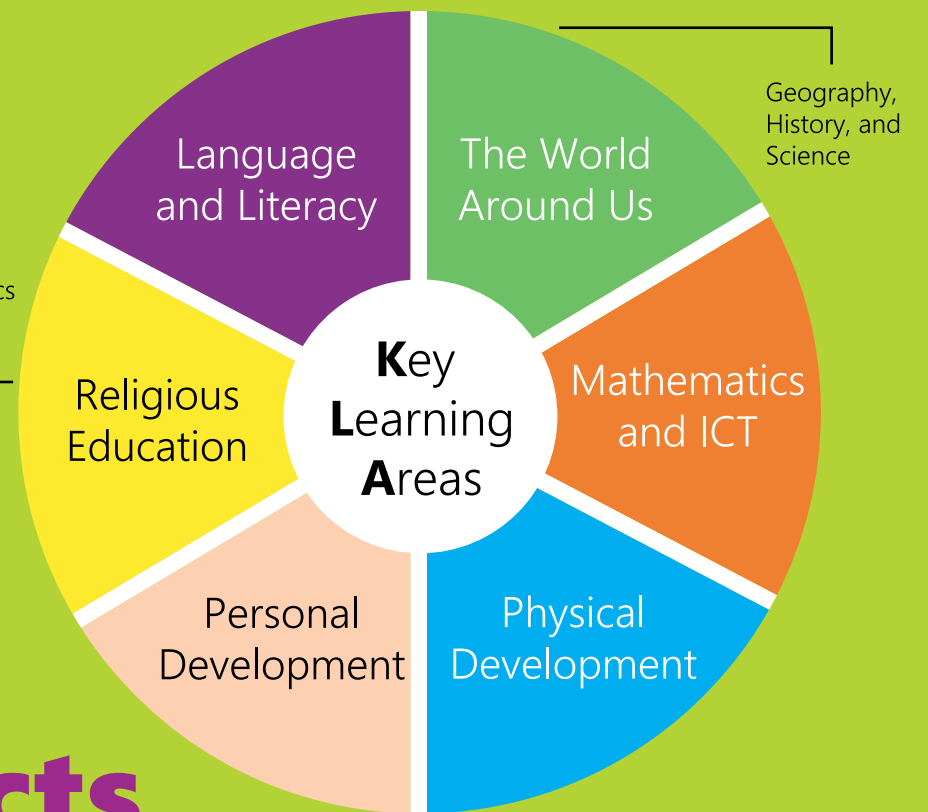

The Subjects

There are many familiar faces in the curriculum, and children still learn about the key subjects, such as maths and science.

Subjects are grouped together under Key Learning Areas. This helps your child see how different parts of the curriculum relate to one another.

For example, the World Around Us Area of Learning brings together geography, history, and science and technology.

Personal Development and Mutual Understanding is a new Area of Learning.

It's designed to help your child develop personally, emotionally and socially; learn how to lead a healthy, safe and fulfilled life; and become a confident, independent and responsible person.

Your child will still learn the essential knowledge and skills for each of these Areas of Learning, and no matter how old your child is or where they go to school, there will always be a focus on the skills they need to succeed, such as reading, writing and maths.

The Connections

Children learn best when learning is relevant and connected.

Where possible, teachers will present your child with activities that allow them to learn about, practise and develop skills from a number of subjects through a single topic.

For example, an activity on the 1970s might have your child talk to an adult who lived during the 1970s and record and present their findings. This teaches them about the history of that decade and develops their talking, listening and writing skills. Further work on the topic might ask them to work in groups to research newspaper, sport or clothing from the decade, and this continues the learning about history.

They may then discuss and present their findings to the rest of the class. This creates an opportunity to use and improve their reading, ICT and managing information skills and their ability to work with others.

Connected activities like these, where work on a topic draws on knowledge and skills pupils have developed in previous learning, allow them to see first-hand how what they know and are able to do can be transferred and adapted in many different ways for different situations.

The Assessments

Pupils learn better when they look at their work and review how they've done.

The curriculum now strongly encourages pupils to take part in their own evaluation. Throughout the year, teachers will help your child understand why they are learning about a topic and how to improve their learning by getting your child to ask and answer questions such as:

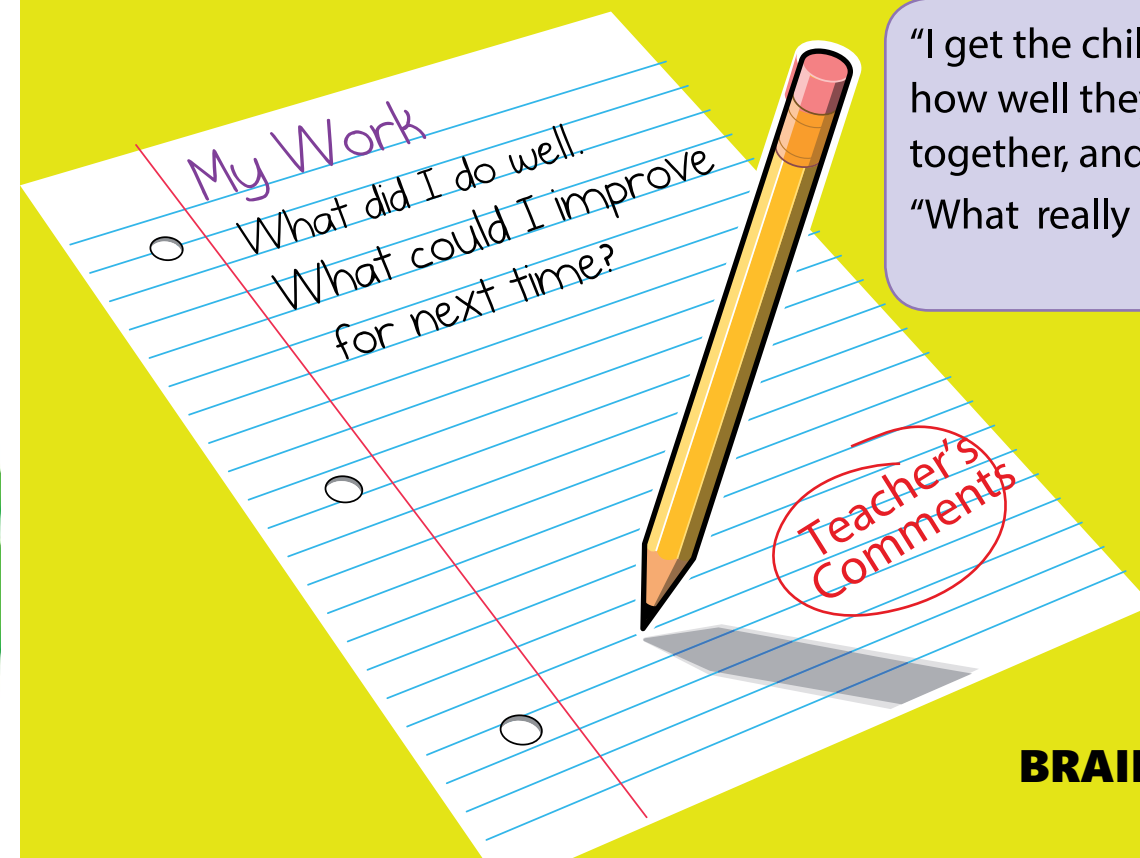

1. What did I do well?
2. What could I improve for next time?

You can also expect to find comments written on your child's work with ideas

about how they can improve.

Each quarter in Years 4–16, your child will complete computer-based assessments for reading and maths. These help to identify your child's strengths and areas for improvement so that the teacher can plan the teaching and learning to meet your child's needs.

At the quarterly parents' meeting, you'll be able to talk to the teacher about your child's progress and how you can help support their learning at home.

"I get the children to think about how well they've worked together, and I use questions like: "What really made you think?"
Teacher

The School

Briany School tries to ensure that all its schools ensure the provision of well-equipped classrooms, libraries, and other physical infrastructure of a good school.

Nazra and Hifz-ul-Qura'n

- Complete Hifz ul Quran (Optional) after Grade-2.
- Nazra and memorization of the selective Surahs (Compulsory) for all students.

Islamic Integrated Books

- Science, literature and all other subjects of the curriculum are integrated with authentic Islamic guidelines.

5D Learning of Students

- 5D learning is comprised of S.P.I.C.E, i.e.
 - ✓ Spiritual Development
 - ✓ Physical Development
 - ✓ Intellectual Development
 - ✓ Cognitional Development
 - ✓ Emotional Development

Hadith and Sunnah

- Memorization of Ahadith from PreK-1.
- Practical oriented classes for learning Sunnah of our Beloved Nabi Kareem [s].
- Persistent emphasis on respect, love and devotion for the Beloved Nabi Kareem [s] through co-curricular activities.

Practising Muslim

- An exclusive program of learning and implementing the ethics and values of Islam in the daily lives. The program concentrates on character building, life skills and personal development of children.

Conceptual Learning

- The teaching methodology at BS is focused on Activity-Based Conceptual Learning. Its main feature is to foster self-learning that allows a child to study according to his or her aptitude and skill.

Research and Development

- Persistent research and development of each subject by respective dedicated researchers is the distinctive feature of our schools.

Parents' Guidance Workshops

- Periodic workshops and lectures by director, scholars and educationists are organised for the guidance of parents so that teachers and parents collectively endeavour for the betterment of children.

Educational Fieldtrip

- Students of our schools are always encouraged to get closer to nature for recreation. Moreover, they have taken field trips to museums, historical sites and other culturally enriching institutions as a way to supplement the lessons they learn in the traditional, yet limited, school setting.

Lessons in Islam

- Related to the age group of students, a comprehensive course on the Lessons in Islam is a part of our education system, that ensures timely understanding of the respective obligatory commandments and their practice.

Exclusive Parents' Portal

- Our school offers an efficient web portal for parents/students and teachers to update them on daily basis about their child academic progress, their financial statement, and many other features.

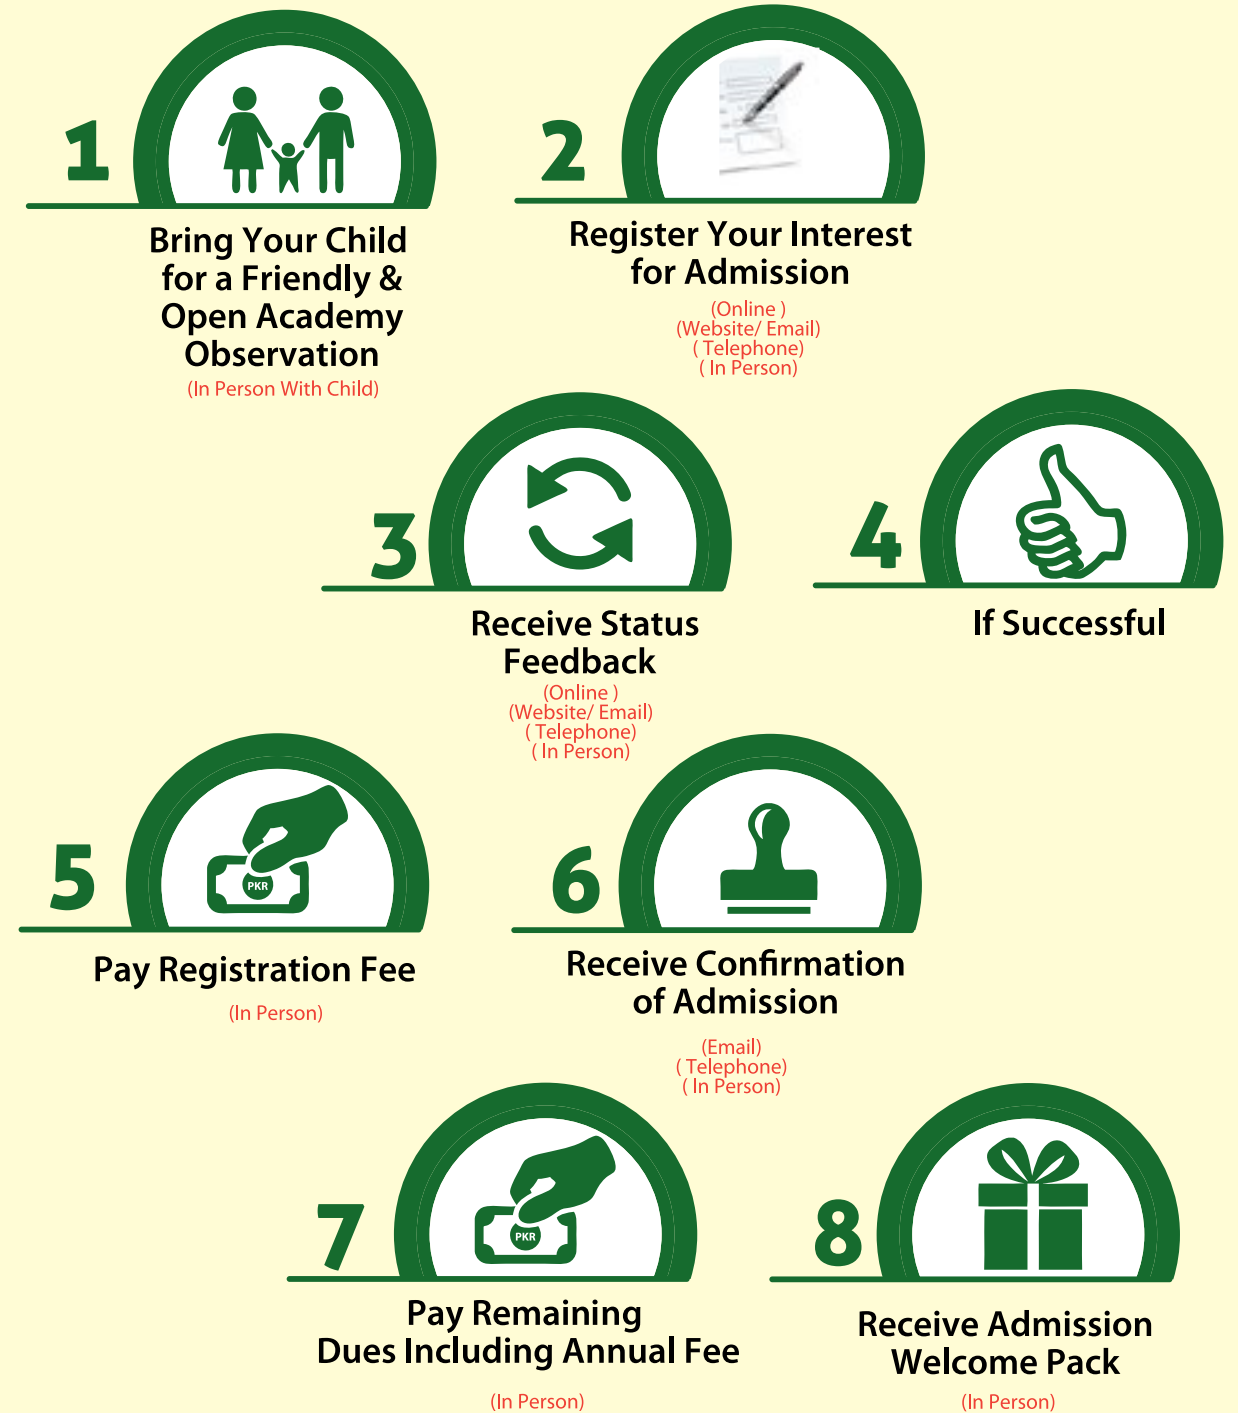

Affordable Quality Education

- Acquisition of quality education is the fundamental right of every child. Our school offers a reasonable fee structure. In addition, scholarship programs for extra ordinary deserving students and sibling discounts are also offered to bring convenience to parents.
