# ABOUT US

## Expert, Independent Security Solutions

At Globe Tech Services our commitment to our customer is simple; we will provide an unrivalled end to end electronic security services and communication solutions, working tirelessly to ensure we react to our client's individual requirements.

We are certified and experience in intruder alarms, access control, fire detection and CCTV systems. We have all the expert knowledge to give you peace of mind and are large enough to cope but small enough to care.

Globe Tech Services offer a fully inclusive service to provide protection against security risks. This includes:

- Intruder Alarm Systems
- Access Control Systems
- Close Circuit Television
- Audio/Video Door Entry
- Fire Detection Systems
- Data and Voice Networking Solutions
- Time & Attendance Systems
- Fiber Optic and Structured Cabling System
- Automated Gates and Doors
- Welding and Fabrication Services
- PBX Telephone System
- Solar Energy Solution
- Information Technology Services
- Domestic and Industrial Electrical Services
- Air Condition Services
- System Integration
- System Maintenance and Support

Globe Tech Services will take a 360-degree view of your business to develop a comprehensive assessment of your needs. We will carry out a full survey and provide proposals for a fully compliant fire detection, alarm system and communication solutions.

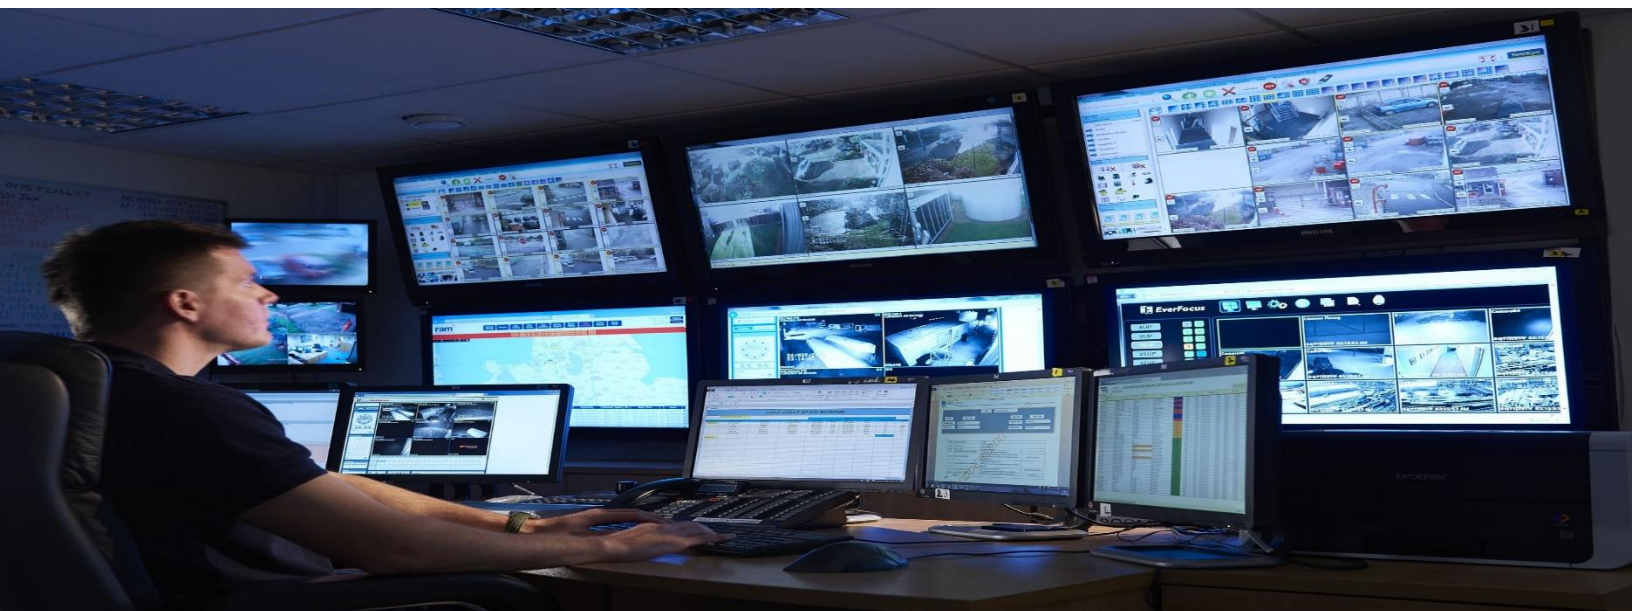

# COMMERICAL SECURITY SERVICES

We offer a wide range of commercial security systems and services, such as:

- Intruder Alarm Systems
- Access Control
- Close Circuit Television System
- Audio and Video Door Entry Systems
- Maintenance Services

Globe Tech Services offer a fully inclusive service to provide protection against security risks. Our systems can have many additional features:

- Wired, wireless or hybrid systems
- Speech dialer
- SMS or email alerts
- Integrated video verification of alarm events
- Remote control via smartphone app

# INTRUDER ALARM SYSTEMS

We offer the design, supply and installation of intruder alarm systems compliant with PD6662:2010 and BS8243:2010, Grade 2 or Grade 3. Many of our alarms have dual path remote signaling to an alarm receiving center over PSTN, GPRS and/or broadband for extra peace of mind.

Our products include:

- DSC Touch
- Maxsys
- Power Series
- Power Series Neo
- Telco Communications

With more options available. Get in touch to find out more

# ACCESS CONTROL SYSTEMS

Globe Tech Services primarily protect businesses throughout Guyana offering design, installation and maintenance services to protect your company. This includes Access Control Systems which provide an effective and robust security mechanism to allow authorized personnel to enter certain areas of your premises. Access will typically be obtained via;

- Pin codes
- Proximity Cards
- Biometric

We can install and design systems from single entry to multiple combined entry systems for both standalone and PC managed installations. We offer the design, supply and installation of access control systems compliant with NSI Code of Practice NCP109, finding solutions to suit your budget and requirements.

Our products:

- RBH Access
- Finger Tech
- ZKT eco

# CLOSE CIRCUIT TELEVISION

We offer the design, supply and installation of CCTV Systems compliant with NSI Code of Practice NCP104 Issue 2. We have extensive experience in both analogue and IP systems to create the CCTV system that's right for you. If you are looking to upgrade a legacy system, get in touch as our experienced team can often utilize existing cabling to run a more enhanced set-up if required.

Our products:

- Hikvision IP and analogy CCTV systems
- Video management software
- Mile Sight VMS

# AUDIO & VIDEO DOOR ENTRY SYSTEMS

Over the years we combined experience in security and fire systems including extensive experience in all types of door entry systems. We have all the expert knowledge to give you peace of mind and are large enough to cope but small enough to care.

Our products:

- Enforcer
- Aiphone

# HOME SECURITY

We offer a range of wired and wireless intruder alarm systems to suit your specific requirements, including:

- SMS or email alerts
- Integrated video verification of alarm events
- Remote control via smartphone app
- Smoke/Heat detectors
- Carbon Monoxide Detectors
- Shock Sensors
- Wired/Wireless Outdoor Detectors
- Wired/Wireless Infrared Beams

We can also upgrade old systems to have latest technology. We will take a 360-degree view of your property and carry out a full survey to provide proposals for a fully compliant alarm system.

## Our Products:

We offer DSC range of wireless intruder alarm equipment including:

- Control panels
- Remote Keypads
- Detection devices
- Sounders

# FIRE DETECTION SYSTEMS

We offer the design, supply and installation of fire detection and alarm systems compliant with BS5839:2013, all categories. We can create wired, wireless or hybrid systems; conventional 4 wire, conventional 2 wire, analogue addressable systems and complex intelligent systems with or without remote signaling to an alarm receiving center.

## Key Products:

- Firelite
- Notifier
- Edwards

# DATA AND VOICE NETWORKING SOLUTIONS

We have a vast experience in the design and installation of data and telecommunications networks with our partner. Data Networks can provide network installations for home, office and large multiple sites. We can also provide integrated solutions for voice and data. The systems we install include CAT5, CAT5e, CAT6 and fiber-optic networks. These networks can be provided for domestic, retail and commercial applications. The systems are installed in rack-mounted cabinets complete with network hardware as required.

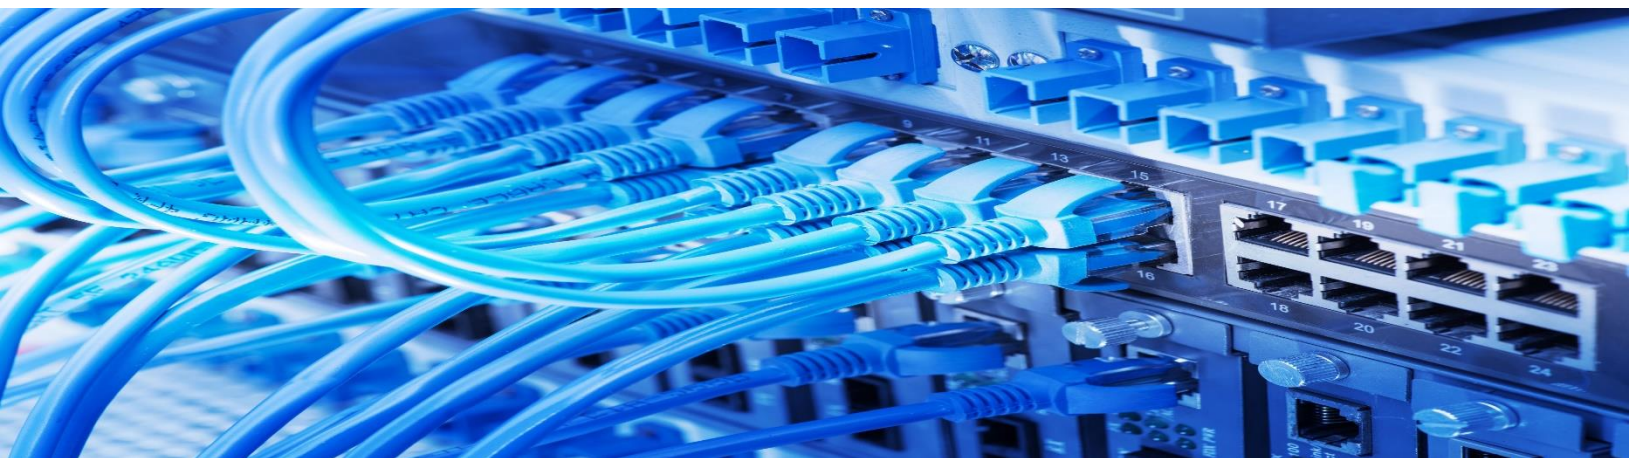

Integrated solutions are provided, which allow interconnection of different systems via Fiber optic backbone into a managed data network solution for large campus installation

## Wired Networks

Data Networks can provide wired networks for both CAT 5E and CAT 6. The networks involve the installation of data points at locations around the building, routed back to a central comms cabinet within the recognized transmission distance.

## Wireless Networks

Wireless networks provide an easily connected communications system for home, office and retail environments. They are ideal for situations where numerous people need to access a network from a variety of devices

# FIBER OPTICS AND STRUCTURED CABLING SOLUTIONS

As part of the installation of IP security systems we can install and test all ranges of fiber optic and structured cabling installations to meet the needs of the site or client requirements.

Our structured cabling service offers the following:

- Design Services
- Cable Repairs
- Fault Finding & Diagnosis
- Enclosed Cabling Installation
- Patch Cable Installations

Our fiber optic services help us provide a complete in-house system without the need for third party contractors.

Our services include:

- Internal and External installations
- System Design
- Multimode cable (OM1, OM2 and OM3)
- Single mode cable (OS1 and OS2)
- ST, SC, MT-RJ, LC Terminations

# TIME & ATTENDANCE SYSTEMS

Automated employee time tracking allows you to get more done. Keeping track of time manually? Automated time and attendance software can reduce your manual — and error-prone — data entry and improve payroll accuracy. It can also increase productivity by ensuring the right people are where you need them every day. Manage your time and attendance with ease. Choose between systems that utilize traditional time cards or more advanced biometric systems. Biometric time clocks scan the fingerprint or handprint of an employee for recognition. These systems can help to eliminate “buddy punching.”

- Create, publish and manage schedules online
- Track, time-off request, approvals and vacations
- Data flows, automatically between HR, payroll and time
- Time, pay, benefits and other information can be accessed from the web

# AUTOMATED GATES AND DOORS

## Robust and reliable solutions

To overcome challenges common to an automatic door opening and closing system, refer to GLOBE TECH broad portfolio of scalable products and solutions. Our offer accommodates a wide range of requirements, regardless of voltage or power. Along with us, you can create compact, efficient noise-free designs that are as robust as they are reliable. Our product offer includes integrated protection and diagnostic features, such as current sensing, as well as innovative sensor solutions for index counting. Today connectivity is a hot topic and our easy-to-integrate security offer preps your designs for integration into smart homes. We are also your one-stop shop for sensors, microcontrollers and power ICs. Browse our solutions to find the best solution for your automatic gate and door opening system design.

- Roger Technology
- Quiko Italy
- Rossi

# BESPOKE SECURITY SERVICES

Our team can have great impact during the planning concept, design or installation stage, or while commissioning interior fit-outs. Our services include:

- Documentation – Manuals, Standard Operating Procedures
- Drawing and Schematics – Full CAD and site management
- Training Recommendations
- Testing and Selection Procedures

## SYSTEMS INTERGRATION

We pride ourselves in our ability to effectively integrate equipment with your existing system, often designing unique solutions. We are also very experienced in designing systems utilizing just one credential (e.g., card / fob) to control multiple systems. If you have an existing system you want to enhance, we can integrate CCTV, access control and intruder alarm systems to create a comprehensive security solution.

## SECURITY SYSTEM MAINTENANCE AND SUPPORT

All electronic security systems should be regularly maintained. We offer low-cost maintenance packages with uncomplicated terms and conditions. These packages can include planned preventative maintenance only or fully comprehensive maintenance; both will maintain your systems to all of the relevant standards. Contracted customers benefit from discounted labor rates as well as the facility to call us out 24/7 giving you complete peace of-mind.

## FIRE ALARM SYSTEM MAINTENANCE AND SUPPORT

It is a mandatory requirement that all fire detection and alarm systems are regularly maintained. We understand the mandatory requirements for fire detection and alarm system maintenance and regularly maintain systems for many clients in compliance with the latest standards and at affordable prices.

# INDUSTRY EXPERIENCE

We work with a number of different industries to support the refurbishment and development of their security and fire systems. Understanding the requirements, potential issues/hazards and having direct experience is absolutely key to a smooth-running project so we're delighted to work as part of your team. For security and fire systems, Globe Tech Services is your perfect partner. Get in touch to find out more and discuss your requirements.

With more options available and years of experience to offer you an expert solution and high levels of customer service, get in touch. Examples of different industries we have worked with in the past are shown on the next page.

## WHY GLOBE TECH SERVICES

- Large enough to cope, small enough to care
- Experience in-house and supported by 3rd party consultants where required
- Our top-quality equipment is supplied and maintained at affordable prices.
- Experienced & security vetted representative
- Cross-industry experience
- Low-cost maintenance packages
- Uncomplicated terms and conditions
- 100% customer satisfaction
- Planned preventative maintenance only or fully comprehensive
- Maintained to all of the relevant standards
- Free consultation & quotation service
