Our Company

Our Mission is to provide excellence in security, communications and power service and solution to our clients through bespoke services tailored to their specific needs, giving peace of mind, assurance and quality a priority.

Our Vision is providing security, communication and power services that meet standards and quality to every sector through recruitment of quality people; extensive training; use of advanced technology; and the synchronized action of professionally supervised teams to earn trust of our clients throughout Guyana

A TRUSTED PARTNER TO CUSTOMERS AND SUPPLIERS, GLOBE TECH SERVICES TAKES GREAT PRIDE IN DELIVERING OUTSTANDING EXPERTISE AND SUPERIOR SERVICES.

At Globe Tech Services our commitment to our customer is simple; we will provide an unrivalled end to end electronic security services and communication solutions, working tirelessly to ensure we react to our client's individual requirements.

We design, supply, build and maintain stand-alone and integrated security and communication system. We have the ability to provide full turnkey solutions: taking a customer's requirements, designing and developing the concept, selecting the product that best fits the requirements, and completing the installation.

Our expertise helps to establish our customers as industry leaders, working with them to build standards and exceed compliance regulations, improve lives and develop greater future economic opportunities. To do this, we provide commercial, industrial and government clients with a single source of expertise for all their security needs.

From development and design through installation and ongoing maintenance, we are a true partner, creating sustainable solutions that exceed expectations both now, and for many years to come. Our experience in a wide range of technology, products and systems, combined with strict attention to design detail, meets the diverse needs of our customers.

Our Solutions

We back our engineering, technical and management expertise with dependable maintenance support and training to create cutting-edge solutions, Includes:

Globe Tech Services will take a 360-degree view of your business to develop a comprehensive assessment of your needs. We will carry out a full survey and provide proposals for a fully compliant security, communication and power solutions.

Solutions

We strive to achieve world-class standards, quality and customer service in delivering reliable, on-time, accurate and customized solutions and services for you organization with budget in mind

Close Circuit Television

A video surveillance system is a critical component of a comprehensive security strategy. GTS is proud to offer the experience and expertise to design, install, service, and monitor a system that will fit your unique business needs, as well as integrate with your existing systems.

Whether you're looking for basic local video surveillance systems or looking for your system to do more for your business, GTS can deliver the solution you.

From traditional local video surveillance to cutting-edge IP systems and cloud-based storage options, GTS can design, install, service, and monitor the right video system for your needs. With our expertise, we'll deliver the right video surveillance solution for your needs, including

- Analog, IP and Thermal Camera systems
- Local, network, and cloud-based video storage options
- Video monitoring
- Advanced video analytics capabilities & reporting
- Integration with intrusion, access control, and more

Access Control System

Having true access control for your business doesn't only mean preventing access to high security areas. It also means ensuring that employees and visitors can gain access to the areas needed at the right times with minimal barriers. GTS primarily protect businesses throughout Guyana offering design, installation and maintenance services to protect your company. This includes Access Control Systems which provide an effective and robust security mechanism to allow authorized access.

We can install and design systems from single entry to multiple combined entry systems for both standalone and PC managed installations. Depending on your solution, we can provide either a software- or web-based management application, which your team can use to easily manage your access system.

Access control systems can also be integrated with intrusion systems, video surveillance systems, HR databases, badging, visitor entry systems, and more, allowing for greater control across your security platform

Fire Detection System

GTS provides a proven solution to help you meet your local and national building and fire code requirements. Utilizing code compliant equipment, GTS has the expertise to meet the needs of your fire alarm requirements. Protect employees and visitors to your facility and can reduce the risks to your business.

GTS Emergency Evacuation solutions combine the detection capabilities of our advanced fire alarm with the capabilities of emergency evacuation to provide a comprehensive life safety system for your building. For larger buildings where fire evacuations can be complicated, GTS provides a variety of advanced capabilities. When our code-compliant alarm systems detect fire, they will not only alert authorities, but also activate the building's life safety evacuation and communications systems. This can provide a crucial channel between first responders and your building occupants, ensuring enhanced safety for all involved.

- Building & Fire Code Compliance
- Early Notification
- Stand Alone or Integrated Panels
- Advanced Diagnostics & Occupant Notification
- Life Safety Evacuation Alarm and Communication Systems

Fire Suppression System

GTS solutions are based on a proven, effective and reliable clean agent fire suppression option. This gaseous fire system protects highly valuable assets without damaging the equipment. GTS Clean Agent Fire Suppression Systems are the preferred fire suppression solution for facilities that cannot afford the downtime associated with a fire or typical water-based fire suppression systems. Clean Agent systems extinguish a fire quickly by breaking down the molecular structure of the fire. The suppression agents do not harm the equipment or personnel in the protected room or cause a mess to clean up afterwards.

GTS Clean Agents offer rapid fire extinguishment, suppressing fires within seconds of the agent being discharged into the protected area. The agents are ventilated out of the space and do not leave behind a residue to be cleaned up, allowing your facility to get back to work immediately.

- They are volatile, non-conductive gases.
- They leave behind no residue of any kind.
- They are safe for use in occupied areas when properly designed.
- They are environmentally acceptable to the EPA.
- Non-toxic when used in compliance with NFPA Standard 2001

GTS can design, supply, install, service, and monitor your suppression system. With our expertise, we'll deliver the right solution for your building and personal safety

Intruder Security Systems

Installing reliable security systems is the easiest way for businesses to help prevent intrusion. GTS can design, install, service, and monitor effective security systems for businesses in a wide range of industries including commercial, retail, healthcare, financial, education, government, and more.

Utilizing motion detectors, glass-break sensors, magnetic contacts or sensors, and other electronic security devices from the leading manufacturers. Our skilled technicians will build a comprehensive, intrusion security system that can detect any unauthorized attempt to access your facility, protecting your property, people, and assets.

GTS provides a high standard of security system installation and maintenance. We are dedicated to offering our customers the latest advancements and technologies in home alarm systems. From wireless to smart alarms, you can ensure that we are offering you the latest products fresh to the market. GTS deploys state-of-art technology to provide answers to a diverse range of security problems in both residential and commercial situations. Every property is different so we offer a bespoke solution for our customers. Our system designers will perform a FREE on-site survey of your property to design a system that fits your requirements. In today's society security systems for both residential and commercial properties are paramount. An intruder alarm is a worthwhile and cost-effective investment, giving you peace of mind when your property is vacant.

Time & Attendance System

Automated employee time tracking allows you to get more done. Keeping track of time manually? Automated time and attendance software can reduce your manual — and error-prone — data entry and improve payroll accuracy. It can also increase productivity by ensuring the right people are where you need them every day. Manage your time and attendance with ease. Choose between systems that utilize traditional time cards or more advanced biometric systems. Biometric time clocks scan the fingerprint or handprint of an employee for recognition. These systems can help to eliminate “buddy punching.”

- Create, publish and manage schedules online
- Track, time-off request, approvals and vacations
- Data flows, automatically between HR, payroll and time
- Time, pay, benefits and other information can be accessed from the web

PBX Telephone System

The PABX system provides both internal and external telephone communication, by utilizing diverse communication platforms like VoIP, ISDN or analog. A PABX system further supports you to have more phones than physical lines and provides free calls among users. Besides, it gives facilities such as recording calls, call transfer, voicemail, IVR and call queues. PABX system provides all of the company staffs obtain more than one telephone line via their desk's phone. The PABX systems are comfortable to use and give excellent assistance that will benefit you company

We provide equipment, installation, configuration and phone system wiring services for all types of PBX, PABX, IP PBX and EPABX systems in the Guyana.

Automated Gates & Doors

GTS includes automation systems that perfectly combine functionality and customizable options for gates, sectional and overhead garage doors, and industrial doors and barriers. These products offer a unique design and the most advanced technology. Easy to control and completely reliable, GTS entrance-automation systems optimize efficiency and energy savings while minimizing environmental impact.

- Sliding Gates
- Swing Gates
- Automatic Barriers
- Garage Door Automation
- Automation for industrial doors

Solar Energy Solution

As a provider for photovoltaic (PV) module and smart energy solutions, GTS Solar delivers PV products, applications and services to promote global sustainable development. Through constant innovation. We continue to push the PV industry forward by creating greater grid parity of PV power and popularizing renewable energy.

You can save more money with better solar, and you can save more than just money with GTS. Save time, save fossil fuels, save yourself

Printer & Copier Service

As your premier printer and copier solutions provider. All of our services are proven to increase efficiency while reducing the output costs of your business. From the first acquisition of your copier or printer to the entirety of its lifespan– and all of your organization needs in between– our factory-certified and trained personnel will be there to ensure seamless productivity.

By starting with a comprehensive analysis of your work and print environment, we are able to provide sound guidance in document and print output processes, company workflow, and organization-wide deliverables. Our solutions are customized specifically for you.

Your copier/printer should always work soundly so that your team can avoid the panic of a nonfunctioning machine when it matters most. GTS works diligently to shift this to our own team of experts who will ensure that everything is in working order at all times, so that you can focus on the core competencies of your business.

We represent all the major brands, makes, and models.

Network Infrastructure

Think of network infrastructure as technological resilience, enabling your organization to support and adapt to ever-changing conditions and need. GTS understands the imperative of designing and cultivating a successful network infrastructure that balances flexibility and functionality, reliable connectivity, and cost. We work with our customers to understand their specific needs and goals and then build up the network infrastructure as well as the total solutions. With the successful track record in designing local and wide-area networking solutions, we provide data networking building blocks like routing and switching, networking standards like Ethernet, Gigabit Ethernet, Token Ring and ATM as well as networking protocols like TCP/IP, and IPX.

No matter what applications your business runs, your core LAN must be designed for high speed, extreme reliability, and ease of management. We offer a wide range of consulting, design, and implementation services as well as products with partnership from industry leaders, such as Cisco, HP, Fortinet and Dell to ensure that your core network will be sound, robust, and scalable. Whatever your company is a multinational one, with remote users and business partners located around the world, all these result in integrating your network into a single flexible and reliable architecture.

Our experts, networking consultants and networking engineers, design the most robust and cost-effective WAN solution available, such as IPLC, IPVPN, and VPN, depending on your business needs. We have the right people, the right technology, and the right partners to design, build, and manage your networks.

Structured Cabling System

When your business employs technological solutions before its growth, it often finds itself reaching a limit of its cable infrastructure design. Data Communication speed needs to be improved and structured communications have to be set up in place for your business to run and operate efficient and effective. Cluttering and congesting of cable structures can be a hindrance for both communications infrastructure and the location its placed in.

To solve these issues, structured cabling solutions need to be implemented. GTS certified engineers will design, plan, engineer and execute the wiring foundation needed to meet your current and future needs. From single to multi-point connectivity, we can custom design a cable infrastructure for your organization today that will be scalable for future growth. If you're thinking about rewiring or reorganizing your current setup to prepare for growth, that's well within our wheelhouse too. Our start-to-finish solutions include data center design, fiber optics and wireless design and implementation.

Information Technology Services

We offer functions, maintenance, and support of information technology devices, or services including but not limited to computer systems application development and maintenance systems integration and interoperability; operating systems maintenance and design; computer systems programming; computer systems software support; planning and security relating to information technology devices; data management consultation; information technology education and consulting; information technology planning and standards; and establishment of local area network and workstation management standards.

Building Management System

An Intelligent Building Management System is an innovative system that ensures that all your building systems – Illumination (lighting) control, Electric power control Heating, Ventilation and air-conditioning (HVAC), Video surveillance, Intrusion Prevention, Fire alarm system, Plumbing, Lifts and Elevators, Public addressing system, Parking systems all operate in complete harmony. The system co-ordinates and organizes all the information logically and delivers on a 'need to know' basis. Today's Intelligent Building Management Systems go way beyond their usual role of being an integration platform by laying a foundation for new forms of services. An Intelligent Building Management System drastically improves functionality and overall performance of the various building systems and integrates them into an enhanced IT infrastructure. Today's building is installed with multiple proprietary networks for various systems – the result is a complex and expensive network with management issues, high installation costs with limited functionality and automation.

GTS can help create an intelligent integrated system that provides functionality while integrating all your building system

Domestic and Industrial Electrical Services

As an industry leading company, we provide high-quality installation services for all electrical lighting and power systems. Our wealth of experience has allowed us to successfully partner with clients in the Industrial, Health Care, Commercial, Interiors, Residential Mixed Use, Higher Education, Senior Living, and Retail & Hospitality markets, participating in several projects.

GTS successfully handles projects of any size and complexity, from small installations to larger projects in major hospitals, retail and commercial buildings, & distribution centers.

Whether you need our full range of electrical installation services, from design/build and planning services to low voltage and electrical wiring installation, or a single service, you can rely on us for unparalleled professionalism and customer service.

An overhead view of a meeting around a large table. Several people are seated around the table, looking at various documents and papers spread out before them. The scene is captured in a monochromatic red tone. The documents contain various charts, graphs, and text, including the phrase "BE TEAMWORK".

Services

GLOBE TECH SERVICES offers a full array of repair services, planned maintenance programs, consultancy services and technical training programs.

System Maintenance & Support

All electronic security systems should be regularly maintained. We offer low-cost maintenance packages with uncomplicated terms and conditions. These packages can include planned preventative maintenance only or fully comprehensive maintenance; both will maintain your systems to all of the relevant standards. Contracted customers benefit from discounted labor rates as well as the facility to call us out 24/ giving you complete peace of-mind. It is mandatory requirement that all fire detection and alarm systems are regularly maintained. We understand the mandatory requirements for fire detection and alarm system maintenance and regularly maintain systems for many clients in compliance with the latest standards and at affordable prices.
