Callistemon Red Rover™

Callistemon hybrid 'Calkwr' PP33,724

GROUND COVER

Red Rover™ brings vivid foliage color and a low, spreading form to the landscape. New growth emerges in brilliant shades of copper, orange, and red, before maturing to deep green. Large, whorled leaves create a dense, richly textured groundcover with year-round appeal. Well suited for mass plantings, slopes, medians, commercial landscapes, and large garden beds. It adapts to a wide range of soils types including poorly drained soils. Once established, Red Rover™ requires infrequent irrigation and maintains a tidy, compact form with little to no pruning to maintain shape. It is not known to flower, so there is no pollen to attract bees.

Details at a Glance	
Size	H 12 - 16" W 5'
Flowering	No flowers
Exposure	Full sun to part shade
	Tolerates drought and frost to 25° F
Pruning	Prune once a year for more compact tidy habit
Water	Low
Soil Type	Most soil types, well to poorly draining.
